

LilyPond

Il compositore tipografico per la musica

Frammenti

Il team di sviluppo di LilyPond

Questo documento contiene una selezione di frammenti LilyPond tratti dal LilyPond Snippet Repository (<https://lsr.di.unimi.it>) (LSR). I frammenti sono nel pubblico dominio.

Desideriamo ringraziare Sebastiano Vigna per la gestione del sito web e del database dell'LSR, e l'università di Milano per l'hosting.

Questo documento non è un sottoinsieme esatto dell'LSR: alcuni frammenti vengono dalla directory `input/new` dei sorgenti di LilyPond; i frammenti tratti dall'LSR vengono convertiti con `convert-ly`, perché l'LSR usa una versione stabile di LilyPond, mentre questo manuale è valido per la versione 2.25.29.

I frammenti sono raggruppati per categorie; le categorie elencate nell'indice corrispondono a una sezione del manuale di notazione di LilyPond. Un frammento potrebbe avere più di una categoria, e non tutte le categorie dell'LSR saranno presenti in questo documento.

Nella versione HTML di questo manuale, si può fare clic sul nome del file o sull'immagine di ciascun esempio per vedere il corrispondente file di input.

Questo manuale è disponibile in altri formati ed è integrato col resto della documentazione. Maggiori informazioni in Sezione “Manuali” in *Informazioni generali*.

La documentazione completa si trova all'indirizzo <https://lilypond.org/>.

Questo documento è stato posto nel pubblico dominio.

Per la versione di LilyPond 2.25.29

Sommario

Pitches	1
Un ambitus per voce	1
Aggiungere un segno di ottava a una sola voce	1
Teste di nota Aiken variante sottile	2
Altering the length of beamed stems	2
Ambitus	3
Ambitus dopo armatura di chiave	3
Ambitus su più voci	4
Applicazione degli stili delle teste di nota in base al grado della scala	4
Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia	5
Changing ottava text	6
Modifica dell'intervallo dell'ambitus	6
Changing the interval of lines on the stave	7
Clefs can be transposed by arbitrary amounts	8
Coloring notes depending on their pitch	8
Creating a sequence of notes on various pitches	9
Creating custom key signatures	9
Direction of merged 'fa' shape note heads	10
Force a cancellation natural before accidentals	10
Forcing a clef symbol to be displayed	11
Generating random notes	11
Nascondere le alterazioni delle note con legatura di valore all'inizio di un nuovo sistema	12
Keep change clefs full sized	12
Esempio di makam	12
Modificare l'inclinazione dell'estensore dell'ottava	13
Armature di chiave non tradizionali	13
Numeri dentro le teste di nota	14
Modello per orchestra, coro e pianoforte	15
Impedire l'inserimento automatico dei bequadri supplementari	19
Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave	20
Quoting another voice with transposition	20
Separating key cancellations from key signature changes	21
Trasposizione delle altezze con numero minimo di alterazioni	22
Turkish Makam example	23
Modifiche manuali della proprietà della chiave	24
Using autochange with more than one voice	26
Rhythms	27
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms	27
Adding drum parts	27
Adjusting grace note spacing	28
Allineare i numeri di battuta	28
Note brevi alternative	29
Appoggiatura or grace note before a bar line	29
Automatic beam subdivisions	30
Automatically change durations	30
Estremità delle travature nel contesto Score	31
Beam nibs	32

Travature che attraversano le interruzioni di linea	33
Modificare la distanza delle travature angolari	34
Modificare la forma delle pause multiple	34
Modifica del numero di punti di aumentazione per nota	34
Modificare il tempo senza mostrare l'indicazione metronomica	35
Modifica del numero del gruppo irregolare	35
Changing time signatures inside a polymetric section using <code>\scaleDurations</code>	36
Notazione per canti e salmi	36
Compound time signatures	37
Segni per la conduzione, segni di raggruppamento della misura	37
Consistently left-aligned bar numbers	38
Controllare la visibilità della parentesi del gruppo irregolare	39
Cow and ride bell example	40
Creare indicazioni metronomiche in modalità testuale	40
Disegnare manualmente le legature di valore	41
Engraving tremolos with floating beams	42
Inserire vari gruppi irregolari usando una sola volta il comando <code>\tuplet</code>	43
Forcing rehearsal marks to start from a given letter or number	43
Generating custom flags	44
Ritmi di accompagnamento per chitarra	45
Heavily customized polymetric time signatures	46
High and Low woodblock example	47
Making an object invisible with the <code>'transparent</code> property	48
Legature di portamento con complesse strutture di tratteggio	48
Manually controlling beam positions	49
Merging multi-measure rests in a polyphonic part	49
Modifying tuplet bracket length	50
Spostare le note puntate in polifonia	50
Regolazione della lunghezza delle pause multiple	51
Testo a margine delle pause multiple	51
Numeri non predefiniti per i gruppi irregolari	51
Numbering single measure rests	52
Partcombine and <code>\autoBeamOff</code>	53
Percussion example	53
Consentire l'interruzione del rigo all'interno di gruppi irregolari con travature	55
Positioning grace note beams at the height of normal note beams	56
Posizionare gli abbellimenti con dello spazio fluttuante	56
Posizionamento delle pause multiple	57
Positioning opposing fermatas on a bar line	58
Preventing final mark from removing final tuplet	58
Mostrare i numeri di battuta a intervalli regolari	59
Printing bar numbers for broken measures	60
Numeri di battuta racchiusi in rettangoli o cerchi	60
Printing bar numbers using <code>modulo-bar-number-visible</code>	61
Stampare i numeri di battuta a intervalli regolari variabili	61
Posizionare il metronomo e i numeri di chiamata sotto il rigo	62
Printing music with different time signatures	62
Mostrare il numero di battuta nella prima misura	66
Printing tuplet brackets on the note head side	66
Ridefinire le impostazioni predefinite globali degli abbellimenti	67
Togliere i numeri di battuta da uno spartito	67
Removing connecting bar lines on <code>StaffGroup</code> , <code>PianoStaff</code> , or <code>GrandStaff</code>	68

Stili di pausa	68
Reverting default beam endings	70
Rhythmic slashes	70
Skips in lyric mode	70
Skips in lyric mode (2)	71
Stemlets	71
Travatura che segue strettamente il battito	72
Suddividere le travature	72
Tam-tam example	73
Tambourine example	73
Three-sided box	74
Time signature in brackets	75
Time signature in parentheses	75
Indicazione di tempo che mostra solo il numeratore (invece della frazione)	75
Modificare l'aspetto degli abbellimenti di un intero brano	76
User defined time signatures	76
Using alternative flag styles	77
Usare il gambo barrato degli abbellimenti con le teste normali	78
Usare le legature di valore con un arpeggio	79
Expressive marks	80
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms	80
Adding parentheses around an expressive mark or chordal note	80
Aggiungere i segni di tempo per i glissandi lunghi	80
Adjusting slur positions vertically	81
Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto	82
Allineare le estremità delle forcelle alle direzioni di NoteColumn	82
Note brevi alternative	83
Asymmetric slurs	83
Breathing signs	83
Broken Crescendo Hairpin	84
Caesura ("railtracks") with fermata	85
Center text below hairpin dynamics	86
Cambiare gli stili del testo e degli estensori per le dinamiche testuali	87
Changing the appearance of a slur from solid to dotted or dashed	88
Cambiare il simbolo del segno di respiro	88
Modifica del numero di punti di aumentazione per nota	88
Combining dynamics with markup texts	89
Glissando contemporaneo	89
Controlling spanner visibility after a line break	89
Controllo dell'ordine verticale degli script	90
Creare un gruppetto ritardato	91
Creare degli arpeggi che attraversano note appartenenti a voci diverse	91
Creare degli arpeggi che attraversano il rigo del pianoforte	91
Creare degli arpeggi che attraversano i rigli in altri contesti	92
Creating double-digit fingerings	93
Creating "real" parenthesized dynamics	93
Creating slurs across voices	94
Creating text spanners	94
Estensore testuale della dinamica personalizzato	95
Estensore testuale della dinamica	96

Glissandi can skip grobs	96
Hairpins with different line styles	96
Nascondere la linea di estensione per le dinamiche testuali	97
Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")	97
Inserire una cesura	101
Laissez vibrer ties	101
Line arrows	102
Legature di portamento con complesse strutture di tratteggio	102
Modificare i valori predefiniti per le abbreviazioni delle articolazioni	103
Moving slur positions vertically	103
Spostare le estremità delle forcelle	104
Positioning arpeggios	105
Posizionare il testo a margine dentro le legature di portamento	105
Stampare le forcelle in vari stili	105
Forcelle con notazione al niente	106
Posizionare il metronomo e i numeri di chiamata sotto il rigo	106
Impostare il comportamento delle forcelle sulle stanghette	107
Impostare la lunghezza minima delle forcelle	107
Showing the same articulation above and below a note or chord	107
Snap-pizzicato or Bartok pizzicato	108
Usare un segno di spunta come simbolo di respiro	108
Usare arpeggioBracket per rendere i divisi più visibili	109
Uso delle doppie legature di portamento per gli accordi legati	109
Uso della proprietà whiteout	110
Vertical line as a baroque articulation mark	110
Vertically aligning dynamics across multiple notes	110
Repeats	112
Aggiungere le parentesi delle volte a altri righi	112
Centered measure numbers	112
Changing the default bar lines	113
Controlling the appearance of tremolo slashes	114
Tremoli attraverso i righi	115
Engraving tremolos with floating beams	116
Ripetizioni con segni di percentuale isolati	117
Measure counter	117
Numbering groups of measures	117
Visibilità del conto della ripetizione con segno percentuale	118
Contatore della ripetizione con segno percentuale	119
Positioning segno and coda (with line break)	119
Impostare la doppia ripetizione predefinita per le volte	120
Accorciare le parentesi delle volte	121
Volta sotto gli accordi	121
Volta brackets in multiple staves	122
Volta text markup using repeatCommands	123
Simultaneous notes	124
Voci ulteriori per evitare le collisioni	124
Changing \partCombine texts	124
Changing a single note's size in a chord	125
Clusters	125

Combinare due parti sullo stesso rigo.....	126
Displaying complex chords.....	127
Forzare lo spostamento orizzontale delle note.....	127
Making an object invisible with the 'transparent property	128
Spostare le note puntate in polifonia	128
Suppressing warnings for clashing note columns	129
Two \partCombine pairs on one staff	129
Staff notation	132
Un ambitus per voce.....	132
Adding an extra staff.....	132
Adding an extra staff at a line break	133
Adding indicators to staves which get split after a break.....	134
Aggiungere citazioni orchestrali a una partitura vocale.....	138
Aggiungere i segni di tempo per i glissandi lunghi	140
Numeri di battuta alternativi	140
Ambitus dopo armatura di chiave	142
Centered measure numbers.....	142
Changing the default bar lines	143
Changing the number of lines in a staff.....	144
Changing the staff size	144
Creating blank staves	145
Creating custom key signatures	147
Creating double-digit fingerings	147
Cross-staff stems.....	147
Mostrare la parentesi anche se c'è un solo rigo nel sistema	148
Extending a TrillSpanner	149
Estendere i glissandi sulle volte delle ripetizioni	149
Flat Ties	151
Forcing measure width to adapt to MetronomeMark's width.....	153
Glissandi can skip grobs	154
Incipit	154
Inserting score fragments above a staff, as markups.....	159
Let TabStaff print the topmost string at bottom.....	159
Letter tablature formatting	160
Lasciare che i glissandi vadano a capo	161
Rendere alcune linee del rigo più spesse delle altre	162
Measure counter	162
Formattazione mensurale (stanghette tra i righi)	163
Modificare l'inclinazione dell'estensore dell'ottava.....	163
Annidare i righi.....	164
Armature di chiave non tradizionali	165
Numbering groups of measures	165
Modello per orchestra, coro e pianoforte.....	166
Print ChordNames with same root and different bass as slash and bass-note	170
Putting lyrics inside the staff.....	172
Quoting another voice	173
Quoting another voice with transposition.....	174
Removing brace on first line of piano score	175
Eliminare la prima linea vuota	176
Setting system separators	177

Shape individual ties in chords	178
Tick bar lines	181
Time signature in brackets	181
Time signature in parentheses	181
Modifiche manuali della proprietà della chiave	182
Two \partCombine pairs on one staff	183
Usare una parentesi quadra all'inizio di un gruppo di righe	185
Using autochange with more than one voice	185
Using marklines in a Frenched score	186
Vertically aligned StaffGroups without connecting SystemStartBar	189
Volta sotto gli accordi	197
Volta brackets in multiple staves	198
Editorial annotations	199
Adding fingerings to a score	199
Adding links to objects	199
Adding markups in a tablature	201
Far sì che la diteggiatura appaia dentro il rigo	201
Numeri di battuta alternativi	202
Parentesi analitiche sopra il rigo	204
Parentesi analitiche con etichette	204
Applicazione degli stili delle teste di nota in base al grado della scala	205
Blanking staff lines using the \whiteout command	206
Changing a single note's size in a chord	206
Changing the appearance of a slur from solid to dotted or dashed	206
Coloring notes depending on their pitch	207
Controllare il posizionamento delle diteggiature di un accordo	208
Creare un gruppetto ritardato	208
Creating blank staves	209
Creating double-digit fingerings	210
Direzione predefinita dei gambi sulla linea centrale del rigo	211
Different font size settings for instrumentName and shortInstrumentName	211
Drawing boxes around grobs	212
Drawing circles around note heads	213
Drawing circles around various objects	213
Embedding native PostScript in a \markup block	214
Modificare l'aspetto delle linee della griglia	214
Grid lines: emphasizing rhythms and notes synchronization	215
Martellato e strappato	216
Martellato e strappato usando accordi	217
Martellato e strappato usando le voci	217
Rendere alcune linee del rigo più spesse delle altre	217
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	217
Measure counter	218
Measure spanner	219
Numbering groups of measures	220
Positioning fingering indications precisely	221
Posizionare il testo a margine dentro le legature di portamento	222
Printing text from right to left	222
String number extender lines	222
Using PostScript to generate special note head shapes	223

Uso della proprietà whiteout	223
Text	225
[OBSOLETE] Adding a QR code	225
Adding markups in a tablature.....	227
Adding the current date to a score	228
Adjusting lyrics vertical spacing.....	229
Aligning and centering instrument names.....	229
Aligning syllables with melisma	231
Blanking staff lines using the \whiteout command.....	231
Center text below hairpin dynamics.....	232
Changing ottava text	233
Changing the default text font family	234
Combining dynamics with markup texts.....	235
Combinare due parti sullo stesso rigo.....	235
Creating "real" parenthesized dynamics	236
Creating text spanners.....	237
Demonstrating all headers	238
Embedding native PostScript in a \markup block	239
Formattazione delle sillabe del testo vocale	239
How to put ties between syllables in lyrics.....	240
Allineamento del testo vocale	240
Markup list.....	240
Testo a margine delle pause multiple	242
Of the ubiquity of markup objects	243
Outputting the version number	244
Modello per pianoforte con testo al centro.....	244
Stampare i numeri di battuta a intervalli regolari variabili	245
Stampare le indicazioni su ogni rigo	245
Printing text from right to left	246
Putting lyrics inside the staff.....	246
Testo separato su due colonne.....	247
String number extender lines.....	247
Three-sided box	248
UTF-8.....	249
Modello per gruppo vocale con testo allineato sotto e sopra i righi	250
Volta text markup using repeatCommands	252
Vocal music	253
Un ambitus per voce.....	253
Adding indicators to staves which get split after a break.....	253
Aggiungere citazioni orchestrali a una partitura vocale.....	257
Adjusting lyrics vertical spacing.....	259
Aligning syllables with melisma	259
Ambitus	260
Ambitus dopo armatura di chiave	261
Ambitus su più voci	261
Modello per notazione antica – trascrizione moderna di musica gregoriana	262
Modello per salmo anglicano	262
Arranging separate lyrics on a single line	265
Changing stanza fonts	266

Notazione per canti e salmi	267
Forcing hyphens to be shown	268
Formattazione delle sillabe del testo vocale	268
How to put ties between syllables in lyrics	268
Modello per inno	269
Allineamento del testo vocale	271
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	271
Ottenere la spaziatura del testo della vecchia versione 2.12	272
Modello per orchestra, coro e pianoforte	275
Modello per pianoforte con melodia e testo	278
Putting lyrics inside the staff	279
Modello per coro SATB - quattro righe	280
Modello di rigo singolo con note, testo e accordi	281
Single staff template with notes, lyrics, chords and frets	282
Modello di rigo singolo con note e testo	283
Skips in lyric mode	284
Skips in lyric mode (2)	284
Usare arpeggioBracket per rendere i divisi più visibili	284
Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente	285
Allineare verticalmente gli ossia e il testo vocale	287
Vertically aligning stanza numbers of different staves	288
Vertically centered common lyrics	289
Modello per complesso vocale	291
Modello per gruppo vocale con riduzione per pianoforte automatica	292
Modello per gruppo vocale con testo allineato sotto e sopra i righe	295
Modello per gruppo vocale con strofa e ritornello	296
Chords	299
Adding a figured bass above or below the notes	299
Aggiungere stanghette al contesto ChordNames	299
Adjusting figured bass alteration glyphs	300
Modifica del separatore dell'accordo	300
Changing the chord names to German or semi-German notation	300
Cambiare la posizione delle alterazioni del basso continuo	301
Eccezioni dei nomi degli accordi	302
Nome dell'accordo di settima maggiore	302
Chord names alternative	303
Chords with stretched fingering for FretBoards and TabVoice	312
Clusters	313
Controllare il posizionamento delle ditekgiature di un accordo	313
Cross-staff chords - beaming problems workaround	314
Customizing the chord grid style	315
Customizing the no-chord symbol	316
Displaying complex chords	316
Manually break figured bass extenders for only some numbers	316
Print ChordNames with same root and different bass as slash and bass-note	317
Mostrare gli accordi nei cambi	319
Canzoniere semplice	319
Modello di rigo singolo con note, testo e accordi	320
Single staff template with notes, lyrics, chords and frets	321
Modello di rigo singolo con note e accordi	322

Vertically centering paired figured bass extenders	322
Volta sotto gli accordi	323
Keyboards	324
Accordion-discant symbols	324
Simboli di registro della fisarmonica	327
Changing the text for sustain markings	328
Clusters	328
Controllare il posizionamento delle diteggiature di un accordo	329
Creating slurs across voices	329
Cross-staff chords - beaming problems workaround	330
Tremoli attraverso i righi	331
Fine-tuning pedal brackets	332
Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio	332
Modello per combo jazz	333
Laissez vibrer ties	339
Modello per pianoforte (semplice)	340
Modello per pianoforte con testo al centro	340
Modello per pianoforte con melodia e testo	341
Removing brace on first line of piano score	342
Using autochange with more than one voice	343
Modello per gruppo vocale con riduzione per pianoforte automatica	344
Percussion	347
Adding drum parts	347
Cow and ride bell example	348
Heavily customized polymetric time signatures	348
High and Low woodblock example	349
Modello per combo jazz	350
Percussion beaters	356
Percussion example	359
Printing music with different time signatures	361
Tam-tam example	364
Tambourine example	364
Fretted strings	366
Adding fingerings to a score	366
Adding fingerings to tablatures	366
Adding markups in a tablature	367
Far sì che la diteggiatura appaia dentro il rigo	367
Automatic Fretboards Barre	368
Cambiare l'orientamento della tastiera	368
Glissando di accordi in intavolatura	369
Cambi di accordo nei diagrammi dei tasti	370
Chords with stretched fingering for FretBoards and TabVoice	371
Controllare il posizionamento delle diteggiature di un accordo	371
Personalizzare la tastiera del diagramma dei tasti	372
Personalizzare il diagramma dei tasti di tipo markup	373
Definire diagrammi dei tasti predefiniti per altri strumenti	375
Faking a hammer in tablatures	377

Diteggiature, indicazioni di corda e diteggiature della mano destra	377
Flamenco notation	378
Fret diagrams explained and developed	382
Tabelle alternative per i diagrammi dei tasti	389

Engravers one-by-one	457
Formattazione mensurale (stanghette tra i righi)	460
Annidare i righi	460
Numbering groups of measures	461
Print <code>ChordNames</code> with same root and different bass as slash and bass-note	462
Togliere i numeri di battuta da uno spartito	464
Usare una parentesi quadra all'inizio di un gruppo di righi	465
Using marklines in a Frenched score	465
Modello per gruppo vocale con testo allineato sotto e sopra i righi	468
Modello per gruppo vocale con strofa e ritornello	470
 Tweaks and overrides	 472
Aggiungere un segno di ottava a una sola voce	472
Adding links to objects	472
Adding markups in a tablature	474
Aggiungere i segni di tempo per i glissandi lunghi	475
Adjusting grace note spacing	476
Adjusting lyrics vertical spacing	476
Adjusting slur positions vertically	477
Altering the length of beamed stems	478
Numeri di battuta alternativi	478
Parentesi analitiche sopra il rigo	480
Parentesi analitiche con etichette	480
Asymmetric slurs	481
Breaking vertical alignment of dynamics and textscripts	481
Caesura ("railtracks") with fermata	482
Changing a single note's size in a chord	482
Changing beam thickness and spacing	483
Modificare la forma delle pause multiple	483

Changing properties for individual grobs	483
Cambiare gli stili del testo e degli estensori per le dinamiche testuali	484
Changing the default text font family	484
Changing the staff size	485
Modificare il tempo senza mostrare l'indicazione metronomica	486
Changing the text for sustain markings	486
Controlling spanner visibility after a line break	487
Controlling the appearance of tremolo slashes	487
Controllo dell'ordine verticale degli script	489
Controllare la visibilità della parentesi del gruppo irregolare	490
Creare un gruppetto ritardato	490
Creating custom key signatures	491
Creating double-digit fingerings	491
Creating text spanners	492
Cross-staff chords - beaming problems workaround	493
Cross-staff stems	493
Custodes	494
Personalizzare la tastiera del diagramma dei tasti	495
Personalizzare il diagramma dei tasti di tipo markup	496
Mostrare la parentesi anche se c'è un solo rigo nel sistema	498
Displaying grob ancestry	499
Dotted harmonics	500
Drawing boxes around grobs	501
Drawing circles around various objects	501
Estensore testuale della dinamica personalizzato	502
Estensore testuale della dinamica	502
Extending a TrillSpanner	503
Estendere i glissandi sulle volte delle ripetizioni	503
Fine-tuning pedal brackets	505

Pitches

See also Sezione “Pitches” in *Guida alla Notazione*.

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, occorre spostare l’incisore `Ottava_spanner_engraver` nel contesto `Voice`.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
  }
}
```

```

\ottava -1
<b,,, b,,,>4 ~ |
q2
\ottava 0
<c e>2
}
>>
}

```

Teste di nota Aiken variante sottile

Le teste di nota Aiken bianche sono più difficili da leggere a dimensioni del rigo più piccole, specialmente coi tagli addizionali. Perdendo lo spazio bianco interno le fa apparire come note di un quarto.

```

\score {
{
\aikenHeads
c''2 a' c' a

% Switch to thin-variant noteheads
\set shapeNoteStyles = ##(doThin reThin miThin
                           faThin sol laThin tiThin)
c'' a' c' a
}
}

```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the beamed-lengths property of the details of the Stem. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```

\relative c'' {
\override Stem.details.beamed-lengths = #'(2)
a8[ a] a16[ a] a32[ a]
\override Stem.details.beamed-lengths = #'(8 10 12)
a8[ a] a16[ a] a32[ a] r8
\override Stem.details.beamed-lengths = #'(8)
a8[ a]
\override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
}

```

```
\revert Stem.details.beamed-lengths
a8[ a] a16[ a] a32[ a] r16
}
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}
```

```
<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}

\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}

>>
```

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus su più voci

Se si aggiunge l'incisore `Ambitus_engraver` al contesto `Staff` viene creato un solo ambitus per il rigo, anche nel caso di righe che hanno più voci.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
  \new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono permesse espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzonieri americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

```
fragment = {
```

```

\key c \major
c2 d
e2 f
g2 a
b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }

  \break

  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

    \fragment
  }
}

```

Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia

LilyPond può modificare la direzione del gambo della nota centrale di un rigo in modo che segua la melodia: occorre aggiungere l'incisore `Melody_engraver` al contesto `Voice`.

La proprietà di contesto `suspendMelodyDecisions` può essere usata per disattivare questo comportamento localmente.

```

\relative c' {
  \time 3/4
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t
  a b g f b g |
  \unset suspendMelodyDecisions
  c b d c b c |
}

```

```

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
  }
}

```

```

\autoBeamOff
}
}

```

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to 8va or 8vb) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```

{
  c'2
  \ottava 1
  \set Staff.ottavation = "8"
  c''2
  \ottava 0
  c'1
  \ottava 1
  \set Staff.ottavation = "Text"
  c''1
}

```

Modifica dell'intervallo dell'ambitus

È possibile cambiare le impostazioni predefinite dell'intervallo tra le teste di nota dell'ambitus e la linea che le collega.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

```

```

\new Staff {
  \time 2/4
  % Default setting
  c'4 g''
}

```

```

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 0
  c'4 g''
}

```

```

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 1
  c'4 g''
}

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = 1.5
  c'4 g''
}

\paper { tagline = ##f }

```

Changing the interval of lines on the staff

`staffLineLayoutFunction` is used to change the position of notes. This snippet shows setting its value to `ly:pitch-semitones` in order to produce a chromatic scale with the distance between each space and line of the staff equal to one semitone.

```

scale = \relative c' {
  a4 ais b c
  cis4 d dis e
  f4 fis g gis
  a1
}

\new Staff \with {
  \remove "Accidental_engraver"
  staffLineLayoutFunction = #ly:pitch-semitones
}
{
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##f
      \scale
    }
  >>
}

```

}

Clefs can be transposed by arbitrary amounts

Clefs can be transposed by arbitrary amounts, not just by octaves.

```
\relative c' {
  \clef treble
  c4 c c c
  \clef "treble_8"
  c4 c c c
  \clef "treble_5"
  c4 c c c
  \clef "treble^3"
  c4 c c c
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

%Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))
```

%Compare pitch and alteration (not octave).

```
#(define (pitch-equals? p1 p2)
  (and
```

```
(= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
(= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
        (cdr color))))

#(define (color-notehead grob)
  (pitch-to-color
   (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}
```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout *Mars*, from Gustav Holst's *The Planets*.

```
rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
```

```

% presumably sharps are also printed in both octaves
\override KeySignature.sharp-positions = #'((-6 . 7))
\override KeyCancellation.sharp-positions = #'((-6 . 7))

\override Clef.stencil = #
(lambda (grob)(grob-interpret-markup grob
#{ \markup\combine
  \musicglyph "clefs.C"
  \translate #'(-3 . -2)
  \musicglyph "clefs.F"
#})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}

```

Direction of merged 'fa' shape note heads

Using property `NoteCollision.fa-merge-direction`, the direction of “fa” shape note heads (“fa”, “faThin”, etc.) can be controlled independently of the stem direction if two voices with the same pitch and different stem directions are merged. If this property is not set, the “down” glyph variant is used.

```

{
  \clef bass

  << { \aikenHeads
    f2
    \override Staff.NoteCollision.fa-merge-direction = #UP
    f2 }
  \\ { \aikenHeads
    f2
    f2 }
  >>
}

```

Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

```

\relative c' {
  \key es \major

```

```

bes c des
\tweak Accidental.restore-first ##t
eis
}

```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the `\clef` command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command `\set Staff.forceClef = ##t`.

```

\relative c' {
  \clef treble
  c1
  \clef treble
  c1
  \set Staff.forceClef = ##t
  c1
  \clef treble
  c1
}

```

Generating random notes

This Scheme-based snippet generates random notes. Use as

```
\randomNotes n from to dur
```

to generate n random notes between pitches *from* and *to*, with duration *dur*.

```

randomNotes =
#(define-music-function (n from to dur)
  (integer? ly:pitch? ly:pitch? ly:duration?)
  (let ((from-step (ly:pitch-steps from))
        (to-step (ly:pitch-steps to)))
    (make-sequential-music
     (map (lambda (_)
            (let* ((step (+ from-step
                              (random (- to-step from-step))))
                  (pitch (ly:make-pitch 0 step 0)))
              #{ $pitch $dur #}))
          (iota n))))))

```

```
\randomNotes 24 c' g' 8
```

Nascondere le alterazioni delle note con legatura di valore all'inizio di un nuovo sistema

Questo frammento mostra come nascondere le alterazioni delle note unite alla figura precedente mediante una legatura di valore all'inizio di un nuovo sistema

```
\relative c' {
  \override Accidental.hide-tied-accidental-after-break = ##t
  cis1~ cis~
  \break
  cis
}
```

```
\paper { tagline = ##f }
```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with full-size-change.

```
\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}
```

Esempio di makam

Makam è un tipo di melodia proveniente dalla Turchia che usa alterazioni microtonali di 1/9. Consultare il file di inizializzazione 'ly/makam.ly' per vedere come sono definiti i nomi delle altezze e le alterazioni.

```
% Initialize makam settings
```

```
\include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
  c4 cc db fk
  gbm4 gfc gfb efk
  fk4 db cc c
}
```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```
\relative c' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =

  \override Staff.OttavaBracket.right-bound-info =
    #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava 1
  c1
  c''1
}
```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, `ottava` indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), `grado` indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e `alterazione` può essere `,SHARP` ,`FLAT` ,`DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, (grado . alterazione), ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonali dove un “diesis” non è 100 centesimi, alterazione si riferisce alla proporzione di un duecentesimo di tono intero.

```
\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                   (1 . ,SEMI-FLAT)
                                   (2 . ,FLAT)
                                   (5 . ,FLAT)
                                   (6 . ,SEMI-FLAT))

  %\set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dodsdo do do |
}
```

Numeri dentro le teste di nota

Le teste di nota con nome della nota usano la proprietà `note-names` dell’oggetto `NoteHead` per determinare cosa appaia all’interno della testa. È possibile sovrascrivere questa proprietà e mostrare numeri corrispondenti ai gradi della scala.

Si può creare un semplice incisore che faccia questo per ogni oggetto testa di nota che incontra.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
        (let* ((context (ly:translator-context engraver))
              (tonic-pitch (ly:context-property context 'tonic))
              (tonic-name (ly:pitch-notename tonic-pitch))
              (grob-pitch
                (ly:event-property (event-cause grob) 'pitch))
              (grob-name (ly:pitch-notename grob-pitch))
              (delta (modulo (- grob-name tonic-name) 7))
              (note-names
                (make-vector 7 (number->string (1+ delta))))))
          (ly:grob-set-property! grob 'note-names note-names))))))

Impedire l'inserimento automatico dei bequadri supplementari

Secondo le norme tipografiche tradizionali, un segno di bequadro viene inserito prima di un diesis o di un bemolle se un precedente doppio diesis o bemolle sulla stessa nota è cancellato. Per cambiare questo comportamento e seguire la pratica contemporanea, si imposta la proprietà `extraNatural` su `f` (falso) nel contesto `Staff`.

```
\relative c' ' {
  aeses4 aes ais a
  \set Staff.extraNatural = ##f
  aeses4 aes ais a
}
```

Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave

Quando l'armatura di chiave cambia, vengono inseriti automaticamente i segni di bequadro per annullare le alterazioni di precedenti armature. Si può evitare questo comportamento impostando su *f* (falso) la proprietà *printKeyCancellation* nel contesto *Staff*.

```
\relative c' {
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
  \set Staff.printKeyCancellation = ##f
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using *\transpose*. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
```

}

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

The value of `break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. Each list describes the default order of prefatory matter at the end, in the middle, and at the beginning of a line, respectively. We are only interested in changing the behaviour in the middle of a line.

If you look up the definition of `break-align-orders` in LilyPond's Internal Reference (see the `BreakAlignment` (<https://lilypond.org/doc/v2.22/Documentation/internals/breakalignment>) grob), you get the following order in the second element:

```
...
staff-bar
key-cancellation
key-signature
...
```

We want to change that, moving `key-cancellation` before `staff-bar`. To make this happen we use the `grob-transformer` function, which gives us access to the original vector as the second argument of the lambda function, here called *orig* (we don't need the first argument, *grob*). We return a new vector, with unchanged first and last elements. For the middle element, we first remove `key-cancellation` from the list, then adding it again before `staff-bar`.

```
#(define (insert-before where what lst)
  (cond
    ((null? lst)           ; If the list is empty,
     (list what))         ; return a single-element list.
    ((eq? where (car lst)) ; If we find symbol `where`,
     (cons what lst))     ; insert `what` before curr. position.
    (else                  ; Otherwise keep building the list by
     (cons (car lst)      ; adding the current element and
           (insert-before ; recursing with the next element.
             where what (cdr lst))))))

cancellationFirst =
\override Score.BreakAlignment.break-align-orders =
#(grob-transformer
  'break-align-orders
  (lambda (grob orig)
    (let* ((middle (vector-ref orig 1))
           (middle (delq 'key-cancellation middle))
           (middle (insert-before
             'staff-bar 'key-cancellation middle)))

Trasposizione delle altezze con numero minimo di alterazioni

Questo esempio usa del codice Scheme per imporre delle modifiche enarmoniche alle note che permettano di avere il numero minimo di alterazioni. In questo caso si applica la seguente regola:

Le doppie alterazioni devono essere eliminate

Si diesis -> Do

Mi diesis -> Fa

Do bemolle -> Si

Fa bemolle -> Mi

In questo modo vengono scelti i suoni enarmonici più semplici.

```

#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        (a (* 4 (ly:pitch-alteration p)))
        ;; alteration, a, in quarter tone steps,
        ;; for historical reasons
        (n (ly:pitch-notename p)))
    (cond
      ((and (> a 1) (or (eqv? n 6) (eqv? n 2)))
       (set! a (- a 2))

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```

{
  % The default treble clef
  \key f \major
  c'1
  % The standard bass clef
  \set Staff.clefGlyph = "clefs.F"
  \set Staff.clefPosition = 2
  \set Staff.middleCPosition = 6
  \set Staff.middleCClefPosition = 6
  \key g \major
  c'1
}

```

```

% The baritone clef
\set Staff.clefGlyph = "clefs.C"
\set Staff.clefPosition = 4
\set Staff.middleCPosition = 4
\set Staff.middleCClefPosition = 4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = "clefs.G"
\set Staff.clefPosition = -2
\set Staff.clefTransposition = -7
\set Staff.middleCPosition = 1
\set Staff.middleCClefPosition = 1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = 0
\set Staff.clefTransposition = 0
\set Staff.middleCPosition = -4
\set Staff.middleCClefPosition = -4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = 0
c'1

Rhythms

See also Sezione “Rhythms” in *Guida alla Notazione*.

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8] }
  g16( a \tuplet 3/2 { b d e') }
  g8[( a \tuplet 3/2 { b d') e'] ~ }
  \time 2/4
  \tuplet 5/4 { e'32\ ( a b d' e' } a'4.\)
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
  \new DrumStaff \with {
    instrumentName = "timbales"
```

```

    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
  }
  <<
    \timb
  >>
  \new DrumStaff \with { instrumentName = "drums" }
  <<
    \new DrumVoice { \stemUp \drh }
    \new DrumVoice { \stemDown \drl }
  >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows a musical score for two staves: 'timbales' and 'drums'. Both staves are in common time (C). The timbales staff features a series of eighth and sixteenth notes with grace notes, including a 'crash' and 'h.h.' (hi-hat) sound. The drums staff also features a series of eighth and sixteenth notes with grace notes, including a 'crash' and 'h.h.' (hi-hat) sound. The notation is complex, with many grace notes and specific drum sounds indicated by symbols like 'x' and 'o'.

Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

The image shows a musical score on a single staff in common time (C). It features a sequence of notes with grace notes. The notation is complex, with many grace notes and specific drum sounds indicated by symbols like 'x' and 'o'.

Allineare i numeri di battuta

Per impostazione predefinita i numeri di battuta sono allineati a destra rispetto al loro oggetto genitore. Di solito si tratta del margine sinistro della linea oppure, se i numeri appaiono all'interno della linea, del lato sinistro della stanghetta. I numeri possono essere posizionati anche direttamente sopra la stanghetta oppure allineati a sinistra della stanghetta.

```

\relative c' {

```

```

\set Score.currentBarNumber = 111
\override Score.BarNumber.break-visibility = #all-visible
% Increase the size of the bar number by 2
\override Score.BarNumber.font-size = 2
% Print a bar number every second measure
\set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
c1 | c1
% Center-align bar numbers
\override Score.BarNumber.self-alignment-X = #CENTER
c1 | c1
% Left-align bar numbers
\override Score.BarNumber.self-alignment-X = #LEFT
c1 | c1
}

```

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```

\relative c' ' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}

```

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. They can however be printed before, simply by adding an invisible BarLine and then the visible one, as demonstrated here.

```

{
  R1
  %% default
  \appoggiatura d''8 c''4 r2.
  %% cheated
  \appoggiatura { \bar "" d''8 \bar "|" } c''4 r2.
}

```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided whenever possible. The intervals and depth of subdivision can be limited with properties `beamMinimumSubdivision` and `beamMaximumSubdivision` respectively.

```
\new Staff {
  \relative c'' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32[ a g f c' b a g
      b32^"subdivide beams" a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
    >>
    \oneVoice
    \once \set beamMinimumSubdivision = #1/8
    b32^"beamMinimumSubdivision 1/8"[ a g f c' b a g]
    \once \set beamMaximumSubdivision = #1/16
    b32^"beamMaximumSubdivision 1/16"[ a g f c' b a g]
  }
}
```

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music.

It takes two arguments – the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```
\paper {
  indent = 0
  tagline = ##f
}

music = \relative c'' { a1 b2 c4 d8 r }
```

```

\time 4/2
\music
\time 4/4
\shiftDurations 1 0 \music
\time 2/4
\shiftDurations 2 0 \music
\time 4/1
\shiftDurations -1 0 \music
\time 8/1
\shiftDurations -2 0 \music
\time 6/2
\shiftDurations 0 1 \music
\time 7/2
\shiftDurations 0 2 \music
}

```

Estremità delle travature nel contesto Score

Le regole relative alle estremità delle travature definite nel contesto Score si applicano a tutti i rigli, ma possono essere modificate anche ai livelli Staff e Voice:

```

\relative c' {
  \time 5/4
  % Set default beaming for all staves
  \set Score.beatBase = #1/8
  \set Score.beatStructure = 3,4,3
  <<
    \new Staff {
      c8 c c c c c c c c c
    }
    \new Staff {
      % Modify beaming for just this staff
      \set Staff.beatStructure = 6,4
      c8 c c c c c c c c c
    }
    \new Staff {
      % Inherit beaming from Score context
      <<
        {
          \voiceOne
          c8 c c c c c c c c c
        }
      }
  }
}

```

```

% Modify beaming for this voice only
\new Voice {
  \voiceTwo
  \set Voice.beatStructure = 6,4
  a8 a a a a a a a a
}
>>
}
>>
}

```

Beam nibs

Beam nibs at the start and end of beams together with beams attached to solitary notes that look like flat flags are possible with a combination of `stemLeftBeamCount`, `stemRightBeamCount`, and paired `[]` beam indicators.

For imitating right-pointing flat flags on lone notes, use paired `[]` beam indicators and set `stemLeftBeamCount` to zero. For imitating left-pointing flat flags on lone notes, set `stemRightBeamCount` to zero instead (line one).

For right-pointing nibs at the end of a run of beamed notes, set `stemRightBeamCount` to a positive value. For left-pointing nibs at the start of a run of beamed notes, set `stemLeftBeamCount` instead (line two).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing nib. Do this with paired `[]` beam indicators alone (line three).

Note that `\set stemLeftBeamCount` is always equivalent to `\once \set`. In other words, the beam count settings are not “sticky”, so the pair of nibs attached to the lone 16th note in the last example has nothing to do with the `\set` command for the beam before.

```

Travature che attraversano le interruzioni di linea

Le interruzioni di linea sono di norma proibite quando le travature attraversano la stanghetta di una battuta. Si può cambiare questo comportamento nel modo seguente:

```

music = {
  \repeat unfold 8 c8
  c8 \repeat unfold 7 { c[ c] } c
  \repeat unfold 8 c8
}

\relative c'' {
  <>\markup { \typewriter Beam.breakable set to \typewriter "#t" }
  \override Beam.breakable = ##t
  \music
}

\relative c'' {
  <>\markup { \typewriter Beam.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
  tagline = ##f
}

```

Modificare la distanza delle travature angolari

Le travature angolari vengono inserite automaticamente quando viene rilevata un'ampia distanza tra le teste di nota. Questo comportamento può essere regolato attraverso la proprietà `auto-knee-gap`. Viene disegnata una travatura angolare se la distanza è più grande del valore di `auto-knee-gap` più la larghezza della travatura (che dipende dalla durata delle note e dall'inclinazione della travatura). Il valore predefinito di `auto-knee-gap` è 5.5 spazi rigo.

```
{
  f8 f''8 f8 f''8
  \override Beam.auto-knee-gap = 6
  f8 f''8 f8 f''8
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di lunga e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = 3
    R1*2 | R1*5 | R1*9
  }
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
```

```

c4.. a16 r2 |
\override Dots.dot-count = 4
c4.. a16 r2 |
\override Dots.dot-count = 0
c4.. a16 r2 |
\revert Dots.dot-count
c4.. a16 r2 |
}

```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```

\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c

    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}

```

Modifica del numero del gruppo irregolare

Di norma compare sulla parentesi del gruppo irregolare solo il numeratore del numero del gruppo irregolare, ovvero il numeratore dell'argomento del comando `\tuplet`. Ma è possibile mostrare la frazione *num:den* del numero del gruppo irregolare oppure nascondere del tutto il numero.

```

\relative c' {
  \tuplet 3/2 { c8 c c }
  \tuplet 3/2 { c8 c c }
  \override TupletNumber.text = #tuplet-number::calc-fraction-text
  \tuplet 3/2 { c8 c c }
  \omit TupletNumber
  \tuplet 3/2 { c8 c c }
}

```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
  }
  \context {

  \stemOff a'\breve~\markup { \italic flexe }
  \stemOn g'2 \fine
}
```

Compound time signatures

Odd 20th century time signatures (such as “5/8”) can often be played as compound time signatures (e.g. “3/8 + 2/8”), which combine two or more unequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

```
\relative c' {
  \compoundMeter #'((2 8) (3 8))
  c8 d e fis gis
  c8 fis, gis e d
  c8 d e4 gis8
}
```

Segni per la conduzione, segni di raggruppamento della misura

Il raggruppamento delle pulsazioni all’interno della misura è regolato dalla proprietà di contesto `beatStructure`. I valori di `beatStructure` per varie indicazioni di tempo vengono stabiliti in `scm/time-signature-settings.scm`. Questi valori possono essere impostati o modificati con `\set`. Altrimenti, si può usare `\time` per impostare sia l’indicazione di tempo che la struttura delle pulsazioni. Per farlo si specifica il raggruppamento interno delle pulsazioni in una misura in una lista di numeri (nella sintassi di Scheme) prima dell’indicazione di tempo.

`\time` agisce nel contesto `Timing`, dunque non reimposterà i i valori di `beatStructure` e `beatBase` che sono impostati in altri contesti di più basso livello, come `Voice`.

Se si include l’incisore `Measure_grouping_engraver` in uno dei contesti che regolano l’aspetto, appariranno i segni di raggruppamento della misura. Tali segni facilitano la lettura di musica moderna ritmicamente complessa. Nell’esempio la misura di 9/8 è raggruppata in due diversi schemi usando due metodi differenti, mentre la misura di 5/8 è raggruppata in base alle impostazioni predefinite in `scm/time-signature-settings.scm`:

```
\score {
  \new Voice \relative c'' {
    \time 9/8
    g8 g d d g g a( bes g) |
```

```

\set Timing.beatStructure = 2,2,2,3
g8 g d d g g a( bes g) |
\time 4,5 9/8
g8 g d d g g a( bes g) |
\time 5/8

  ragged-right = ##t
  ragged-last = ##t
}

```

```

\paper { tagline = ##f }

```

The image displays three systems of musical notation, each consisting of two staves. The first system shows measures 114 and 117, each containing a single eighth note. The second system shows measures 120, 123, and 126, each containing a single eighth note. The third system shows measures 129, 132, and 135, each containing a single eighth note. The notation is simple, focusing on the placement of the notes within the measures.

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà 'bracket-visibility' su #t (mostra sempre la parentesi), #'if-no-beam (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o #f (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto @code{TupletBracket} dall'output.

```

music = \relative c'' {

}

```

Disegnare manualmente le legature di valore

Le legature di valore possono essere disegnate a mano cambiando la proprietà `tie-configuration` dell'oggetto `TieColumn`. Il primo numero indica la distanza dal centro del rigo nell'unità di metà spazio rigo, mentre il secondo numero indica la direzione (1 = su, -1 = giù).

Si noti che LilyPond fa una distinzione tra valori precisi e imprecisi per il primo numero. Se si usa un valore preciso (ovvero un intero o una frazione come $(/ 4 5)$), il valore serve come posizione verticale approssimata che viene ulteriormente aggiustata da LilyPond per far sì che la legatura di valore eviti le linee del rigo. Se si usa un valore impreciso, come una virgola mobile, viene usato per la posizione verticale senza ulteriori regolazioni.

```

\relative c' {
  <>^"default"

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap property.

```

\relative c' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.67
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.33
  \repeat tremolo 8 { a32 f }
}

```

}

Inserire vari gruppi irregolari usando una sola volta il comando `\tuplet`

La proprietà `tupletSpannerDuration` imposta la durata di ognuno dei gruppi irregolari compresi tra parentesi dopo il comando `\tuplet`. In questo modo si possono inserire molti gruppi irregolari consecutivi all'interno di una singola espressione `\tuplet`, risparmiando così tempo e spazio.

Ci sono vari modi per impostare `tupletSpannerDuration`. Il comando `\tupletSpan` la imposta su una certa durata e poi la annulla quando invece di una durata viene specificato `\default`. Altrimenti si può usare un argomento opzionale con `\tuplet`.

```
\relative c' {
  \time 2/4
  \tupletSpan 4
  \tuplet 3/2 { c8~"\tupletSpan 4" c c c c c }
  \tupletSpan \default
  \tuplet 3/2 { c8~"\tupletSpan \default" c c c c c }
  \tuplet 3/2 4 { c8~"\tuplet 3/2 4 {...}" c c c c c }
}
```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c' {
  c1 \mark \default
  c1 \mark \default
  c1 \mark \default

High and Low woodblock example

Two Woodblocks, entered with 'wbh' (high woodblock) and 'wbl' (low woodblock). The length of the barline has been altered with an `\override` command otherwise it would be too short. The positions of the two stafflines also have to be explicitly defined.

```
\paper { tagline = ##f }
```

```
% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
```

```
#(define mydrums '((hiwoodblock default #f 3)
                    (lowwoodblock default #f -2)))
```

```
woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}
```

```
\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbl8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}
```

}

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

```
\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}
```

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

```
normalPos = \revert MultiMeasureRest.direction
```

```
{
  <<
  {
    c''1
    R1
    c''1
    \normalPos
    R1
  }
  \\\
  {
    c'1
    R1
    c'1
    \normalPos
    R1
  }
  >>
}
```

Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```
\new RhythmicStaff {
  % Set tuplets to be extendable...
  \set tupletFullLength = ##t
  % ...to cover all items up to the next note
  \set tupletFullLengthNote = ##t
  \time 2/4
  \tuplet 3/2 { c4 4 4 }
  % ...or to cover just whitespace
  \set tupletFullLengthNote = ##f
  \time 4/4
  \tuplet 5/4 { 4 1 }
  \time 3/4
  2.
}
```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>
```

Regolazione della lunghezza delle pause multiple

Le pause multiple hanno una lunghezza che dipende dalla loro durata totale e tale lunghezza è regolata da `MultiMeasureRest.space-increment`. Nota che il valore predefinito è 2.0.

```
\relative c' {
  \compressEmptyMeasures
  R1*2 R1*4 R1*64 R1*16
  \override Staff.MultiMeasureRest.space-increment = 2.5
  R1*2 R1*4 R1*64 R1*16
}
```

```
\paper { tagline = ##f }
```

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```
\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_\markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^\markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}
```

Numeri non predefiniti per i gruppi irregolari

LilyPond fornisce anche funzioni di formattazione che permettono di creare numeri di gruppi irregolari diversi dalla frazione vera e propria, così come di aggiungere un valore di nota al numero o alla frazione di un gruppo irregolare.

```
\relative c' {
```

```

\once \override TupletNumber.text =
  #(tuplet-number::non-default-tuplet-denominator-text 7)
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::non-default-tuplet-fraction-text 12 7)
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    (tuplet-number::non-default-tuplet-fraction-text 12 7)
    (ly:make-duration 3 0))
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    tuplet-number::calc-denominator-text
    (ly:make-duration 2 0))
\tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    tuplet-number::calc-fraction-text
    (ly:make-duration 2 0))
\tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(tuplet-number::fraction-with-notes
    (ly:make-duration 2 1) (ly:make-duration 3 0))
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::non-default-fraction-with-notes 12
    (ly:make-duration 3 0) 4 (ly:make-duration 2 0))
\tuplet 3/2 { c4. c4. c4. c4. }
}

```

Numbering single measure rests

Multi measure rests show their length by a number except for single measures. This can be changed by setting `restNumberThreshold`.

```

{
  \compressEmptyMeasures
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 0
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 10
  R1 R1*10 R1*11
}

```

Partcombine and \autoBeamOff

The function of `\autoBeamOff` when used with `\partCombine` can be difficult to understand. It may be preferable to use

```
\set Staff.autoBeaming = ##f
```

instead to ensure that auto-beaming is turned off for the entire staff. Use this at a spot in your score where no beam generated by the auto-beamer is still active.

Internally, `\partCombine` works with four voices – stem up single, stem down single, combined, and solo. In order to use `\autoBeamOff` to stop all auto-beaming when used with `\partCombine`, it is necessary to use *four* calls to `\autoBeamOff`.

```
{
  % \set Staff.autoBeaming = ##f % turns off all auto-beaming

  \partCombine {
    \autoBeamOff % applies to split up-stems
    \repeat unfold 4 a'16
    % \autoBeamOff % applies to combined stems
    \repeat unfold 4 a'8
    \repeat unfold 4 a'16
    % \autoBeamOff % applies to solo
    \repeat unfold 4 a'16
    r4
  } {
    % \autoBeamOff % applies to split down-stems
    \repeat unfold 4 f'8
    \repeat unfold 8 f'16 |
    r4
    \repeat unfold 4 a'16
  }
}
```

Percussion example

A short example taken from Stravinsky's *L'histoire du Soldat*.

```
#(define mydrums '((bassdrum default #f 4)
                   (snare default #f -4)
                   (tambourine default #f 0)))
```

```

  \tuplet 11/8 { a16[ b c d e f e d c b a] }
  \repeat unfold 28 a16 \bar "||"
}

\paper { tagline = ##f }
```

manually forced line break

Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the stave. Grace notes beams are shorter and grace notes on ledger lines may well have beams outside the stave. You can override this beaming for grace notes.

```
\relative c {
  f8[ e]
  \grace {
    f8[ e]
    \override Stem.no-stem-extend = ##f
    f8[ e]
    \revert Stem.no-stem-extend
  }
  f8[ e]
}
```

Posizionare gli abbellimenti con dello spazio fluttuante

Se si imposta la proprietà 'strict-grace-spacing, le colonne musicali degli abbellimenti 'fluttuano', ovvero si scollegano dalle note normali: prima vengono spaziate le note normali, poi le colonne musicali degli abbellimenti vengono messe a sinistra delle colonne delle note principali.

```
\relative c'' {
  <<
  \override Score.SpacingSpanner.strict-grace-spacing = ##t
  \new Staff \new Voice {
    \afterGrace c4 { c16[ c8 c16] }
    c8[ \grace { b16 d } c8]
    c4 r
  }
  \new Staff {
    c16 c c c c c c c c4 r
  }
  >>
}
```

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia, nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

```
\relative c'' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
  \override MultiMeasureRest.staff-position = -2
  R1
  \override MultiMeasureRest.staff-position = 0
  R1
  \override MultiMeasureRest.staff-position = 2
  R1
  \override MultiMeasureRest.staff-position = 3
  R1
  \override MultiMeasureRest.staff-position = 6
  R1
  \revert MultiMeasureRest.staff-position
  \break

  % In two Voices, odd-numbered voices are under the top line
  << { R1 } \\\ { a1 } >>
  % Even-numbered voices are under the bottom line
  << { a1 } \\\ { R1 } >>
  % Multi-measure rests in both voices remain separate
  << { R1 } \\\ { R1 } >>

  % Separating multi-measure rests in more than two voices
  % requires an override
  << { R1 } \\\ { R1 } \\\
    \once \override MultiMeasureRest.staff-position = 0
    { R1 }
  >>

  % Using compressed bars in multiple voices requires another override
  % in all voices to avoid multiple instances being printed
  \compressMMRests
  <<
    \revert MultiMeasureRest.direction
    { R1*3 }
    \\\
  >>
```

```

\revert MultiMeasureRest.direction
{ R1*3 }
>>
}

```

Positioning opposing fermatas on a bar line

This snippet demonstrates a command that prints fermatas both above and below a bar line. If there would not otherwise be a bar line, it adds a double bar line. Semantically, the command codes a longer-than-normal caesura, which might be considered misuse depending on the situation.

```

twoWayFermata = {
  \once \set Staff.caesuraType = #'((underlying-bar-line . "||"))
  \once \set Staff.caesuraTypeTransform = ##f
  \caesura ~\fermata _\fermata
}

music = {
  f'1 \twoWayFermata
  R1
  f'2 \twoWayFermata f'2
  R1
  b'1 \twoWayFermata \fine
}

```

```

\new GrandStaff <<
  \new Staff \music
  \new Staff \music
>>

```

Preventing final mark from removing final tuplet

The addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to false.

```

% due to issue 2362 a long mark such as
% \textEndMark "Composed Feb 2007 - Feb 2008"
% cannot be used here.

```

```

\paper { tagline = ##f }

\new Staff {
  \set tupletFullLength = ##t
  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

\new Staff {
  \set tupletFullLength = ##t
  \override TupletBracket.full-length-to-extent = ##f

  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

```

Mostrare i numeri di battuta a intervalli regolari

Impostando la proprietà `barNumberVisibility` si possono far apparire i numeri di battuta a intervalli regolari. In questo esempio vengono mostrati ogni due misure eccetto alla fine della linea.

```

\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.currentBarNumber = 11
  % Print a bar number every second measure
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
  c1 | c | c | c | c
  \break
  c1 | c | c | c | c
}

```

```

\paper { tagline = ##f }

```

Printing bar numbers for broken measures

By default a BarNumber of a broken measure is not repeated at the beginning of the new line. Use `first-bar-number-invisible-save-broken-bars` for `barNumberVisibility` to get a parenthesized BarNumber there.

```
\layout {
  \context {
    \Score
    barNumberVisibility = #first-bar-number-invisible-save-broken-bars
    \override BarNumber.break-visibility = ##(#f #t #t)
  }
}
```

```
\relative c' {
  c1 | d | e | f2 \bar "" \break
  fis | g1 | e2 \bar "" \break
  <>~"reenabled default"
  % back to default -
  % \unset Score.barNumberVisibility would do so as well
  \set Score.barNumberVisibility =
    #first-bar-number-invisible-and-no-parenthesized-bar-numbers
  es | d1 | c
}
```

```
\paper { tagline = ##f }
```

Numeri di battuta racchiusi in rettangoli o cerchi

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```
\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = 2

  % Draw a box round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }
```

```
% Draw a circle round the following bar number(s)
\override Score.BarNumber.stencil
  = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
\repeat unfold 4 { c1 } \bar "|."
}
```

Printing bar numbers using modulo-bar-number-visible

If the remainder of the division of the current BarNumber by the first argument of modulo-bar-number-visible equals its second argument print the BarNumber.

Useful to print the BarNumber at certain distances, p.e.:

- (modulo-bar-number-visible 3 2) -> prints 2,5,8
- (modulo-bar-number-visible 4 2) -> prints 2,6,10
- (modulo-bar-number-visible 3 1) -> prints 3,5,7
- (modulo-bar-number-visible 5 2) -> prints 2,7,12

```
\layout {
  \context {
    \Score
    \override BarNumber.break-visibility = ##(f #t #t)
    barNumberVisibility = #(modulo-bar-number-visible 3 2)
  }
}
```

```
\relative c' {
  c1 | d | e | f \break
  g1 | e | d | c
}
```

```
\paper { tagline = ##f }
```

Stampare i numeri di battuta a intervalli regolari variabili

Tramite la funzione di contesto {set-bar-number-visibility} si possono modificare gli intervalli dei numeri di battuta.

```
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context Score \applyContext #(set-bar-number-visibility 4)
  \repeat unfold 10 c'1
}
```

```
\context Score \applyContext #(set-bar-number-visibility 2)
\repeat unfold 10 c
}
```

```
\paper { tagline = ##f }
```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
  indent = #0
}
```

```

    ragged-right = ##t
    tagline = ##f
}

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

\layout {
  \context {
    \Score

Mostrare il numero di battuta nella prima misura

Il primo numero di battuta di una partitura viene soppresso se è inferiore o uguale a '1'. Se si imposta `barNumberVisibility` su `all-bar-numbers-visible`, verrà mostrato il numero di battuta della prima misura e di tutte quelle successive. Si noti che perché funzioni è necessario inserire una stanghetta invisibile prima della prima nota.

```
\layout {
  indent = 0
  ragged-right = ##t
}

\relative c' {
  \set Score.barNumberVisibility = #all-bar-numbers-visible
  c1 | d | e | f \break
  g1 | e | d | c
}
```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```
music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8]
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
```

```

\override TupletBracket.bracket-visibility = #'if-no-beam
{ \textMark \markup \typewriter "'if-no-beam" \music }
}
}

```

Ridefinire le impostazioni predefinite globali degli abbellimenti

Le impostazioni globali predefinite degli abbellimenti sono salvate nei seguenti identificatori:

```

startGraceMusic
stopGraceMusic
startAcciaccaturaMusic
stopAcciaccaturaMusic
startAppoggiaturaMusic
stopAppoggiaturaMusic

```

Sono definiti nel file `ly/grace-init.ly`. Ridefinendoli si possono ottenere effetti diversi.

```

startAcciaccaturaMusic = {
  <>(
    \override Flag.stroke-style = "grace"
    \slurDashed
  )
}

```

```

stopAcciaccaturaMusic = {

  <>^\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>^\markup \typewriter { default } \restsB \bar "" \break
}

\paper {
  indent = 0
  tagline = ##f
}

```

The image displays five musical staves, each illustrating a different rest style. Each staff begins with a treble clef and a key signature of one sharp (F#). The staves are labeled as follows:

- mensural:** Shows rests as horizontal lines of varying lengths on a five-line staff.
- neomensural:** Shows rests as vertical lines of varying heights on a five-line staff.
- classical:** Shows rests as horizontal lines of varying lengths, with some rests having a 'z' shape at the end.
- z-style:** Shows rests as horizontal lines of varying lengths, with some rests having a 'z' shape at the end.
- default:** Shows rests as horizontal lines of varying lengths, with some rests having a 'z' shape at the end.

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

```
\relative c' ' {
  \time 12/8

  % Default beaming
  a8 a a a a a a a a a a

  % Set new values for beam endings
  \set Score.beatStructure = 3,4,3,2
  a8 a a a a a a a a a a
}
```

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

```
startPat = {
  \improvisationOn
  \omit Stem
}
stopPat = {
  \improvisationOff
  \undo \omit Stem
}

\new Voice \with {
  \consists Pitch_squash_engraver
} {
  c'4 d' e' f' |
  \startPat
  4 4 4 4 |
  \stopPat
  f'4 e' d' c'
}
```

Skips in lyric mode

The s syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the \skip command is recommended.

<<

```
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

Skips in lyric mode (2)

Although `s` skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores () are available.

So for example:

```
<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop ‘stemlets’ to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the ‘stemlet-length’ property of `Stem`, while rests are hidden by setting ‘transparent = ##t’.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper { ragged-right = ##f }

{
  c'16~\markup { traditional } d' r f'
  g'16[~\markup { beams over rests } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[~\markup { stemlets over rests } d' r f']
  g'16[~\markup { stemlets and no rests } f'
  \once \hide Rest
  r16 d']
}
```

Travatura che segue strettamente il battito

Si possono impostare i tratti di suddivisione della travatura in modo che siano rivolti verso la relativa pulsazione. La prima travatura fa sì che non spuntino i tratti di suddivisione (comportamento predefinito); la seconda travatura è orientata verso la pulsazione.

```
\relative c' ' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}
```

Suddividere le travature

Le travature di note consecutive di un sedicesimo (o più brevi) non vengono suddivise, ovvero i tre (o più) tratti della travatura si estendono, senza spezzarsi, sugli interi gruppi di note. Questo comportamento può essere modificato in modo da suddividere le travature in sottogruppi attraverso la proprietà `subdivideBeams`. Se impostata, le travature che comprendono più sottogruppi verranno suddivise a intervalli definiti dal valore attuale di `beatBase`, riducendo le travature multiple al numero di travature che indica il valore metrico della suddivisione. Se il gruppo successivo alla suddivisione è più breve del valore metrico corrente (di solito perché la travatura è incompleta), il numero di travature riflette il gruppo di suddivisione più lungo possibile. Tuttavia, se rimane una sola nota dopo la divisione, questa restrizione non viene applicata. Si noti che `beatBase`, se non impostata esplicitamente, equivale a uno fratto il denominatore dell'attuale indicazione di tempo. Deve quindi essere impostata su una frazione che stabilisca la durata del sottogruppo di travature; lo si può fare usando la funzione `ly:make-moment`, come è mostrato in questo frammento di codice. Inoltre quando `beatBase` cambia, anche `beatStructure` deve essere modificato per accordarsi con `beatBase`:

```
\relative c' ' {
  c32[ c c c c c c c]

  \set subdivideBeams = ##t
  c32[ c c c c c c c]

  % Set minimum beam subdivision interval to 1/8 just for this beam
  \once \set beamMinimumSubdivision = #1/8
  c32[ c c c c c c c]

  % Set maximum beam subdivision interval to 1/16 just for this beam
  \once \set beamMaximumSubdivision = #1/16
  c32[ c c c c c c c]

  % Set maximum beam subdivision interval to 3/8 just for this beam
  \once \set beamMaximumSubdivision = #3/8
  [ \repeat unfold 16 c64 ] r2.

  % Set maximum beam subdivision interval to 1/64 to limit subdivision depth,
  % despite not being metrically correct
  \once \set beamMinimumSubdivision = #1/32
```

```

\once \set beamMaximumSubdivision = #1/64
[ \repeat unfold 32 c128 ] r2.

% Shorten beam by 1/32
c32[ c c c c c c ] r32

% Shorten beam by 3/32
c32[ c c c c ] r16.

% Respect the incomplete beams of the previous two examples
\set respectIncompleteBeams = ##t
c32[ c c c c c c ] r32
% no visual change here as last two stems are exempt from this
% special rule
c32[ c c c c ] r16.
}

```

```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```
% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil
                  (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))
```

% Test it:

```
\relative c' {
  c1~\markup { \NWS-box ABCD }
  c1~\markup { \NWS-box \note {4} #1.0 }
}
```

Time signature in brackets

The time signature can be enclosed within brackets.

```
\relative c' ' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

Enclose the time signature in parentheses.

```
\relative c' ' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (numero 7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-number`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a cifra singola (single-number) a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c' ' {
  \time 3/4
  c4 c c
  % Change the style permanently
```

```

\override Staff.TimeSignature.style = #'single-number
\time 2/4
c4 c
\time 3/4
c4 c c
% Revert to default style:
\revert Staff.TimeSignature.style
\time 2/4
c4 c
% single-number style only for the next time signature
\once \override Staff.TimeSignature.style = #'single-number
\time 5/4
c4 c c c c
\time 2/4
c4 c
}

```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di Stem nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```

\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}

```

User defined time signatures

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

```

#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))

```

```
<<
```

```
\new Staff {
```

```

\time 3/4 f'2.
\override Score.TimeSignature.style = #'topsy-turvy
\time 3/4 R2. \bar "|."
}
\new Staff {
  R2. e''
}
>>

```

Using alternative flag styles

Alternative shapes for flags on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. LilyPond provides the following functions: `modern-straight-flag`, `old-straight-flag`, and `flat-flag`. Use `\revert` to restore the default shape.

To get stacked (i.e., vertically more compact) flags, call the command `\flagStyleStacked`, which can be reset with `\flagStyleDefault`.

Overriding the `Flag` stencil does not change how flag elements are positioned vertically. This is especially noticeable for flat flags: LilyPond doesn't dynamically adjust the vertical gaps between flag elements in the same way as it does for beams. A possible solution to harmonize the appearance is to replace flat flags with half beams, as shown in the second staff; however, this can't be done automatically. In the code of this snippet, such half beams are entered with `@` as a prefix, for example `@c8`.

Be aware that half beams are *not* `Flag` grobs. This means in particular that modifying `Flag` properties won't have any effect on them (you have to use `Beam` properties instead), and properties for their associated `Stem` grob will also behave beam-like.

```

"@ =
#(define-music-function (music) (ly:music?)
  #{ \set stemLeftBeamCount = 0 $music [] #})

testnotes = {
  \autoBeamOff
  c8 d16 e''32 f64 \acciaccatura { g,,,8 } a128 b
}

\relative c' {
  \override TextScript.staff-padding = 6
  \time 1/4
  <>^"default" \testnotes
  \override Flag.stencil = #modern-straight-flag
  <>_"modern straight" \testnotes
  \override Flag.stencil = #old-straight-flag
  <>^"old straight" \testnotes
  \override Flag.stencil = #flat-flag
  <>_"flat" \testnotes
}

```

```

\revert Flag.stencil

\flagStyleStacked
  <>^"stacked" \testnotes
\flagStyleDefault
  <>_"default" \testnotes
}

\relative c' {
  \time 3/4
  \override Flag.stencil = #flat-flag

  <>^"flat" c8 c[ c] d16 d[ d] e''32 e[ e] f64 f[ f]
  \acciaccatura { g,,,8 } a128 a[ a a a]
  <>^"beam-like" @c8 c[ c] @d16 d[ d] @e''32 e[ e] @f64 f[ f]
  \acciaccatura { g,,,8 } @a128 a[ a a a]
}

\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}

```

Usare il gambo barrato degli abbellimenti con le teste normali

Il gambo barrato presente nelle acciaccature può essere applicato in altre situazioni.

```

\relative c' {
  \override Flag.stroke-style = "grace"
  c8( d2) e8( f4)
}

```

Usare le legature di valore con un arpeggio

Le legature di valore vengono usate talvolta per scrivere un arpeggio. In questo caso, le due note da legare devono non essere consecutive. Per ottenere tale risultato occorre impostare la proprietà `tieWaitForNote` su `#t`. Questa funzionalità serve anche a legare un tremolo a un accordo e in generale qualsiasi coppia di note consecutive.

```
\relative c' {
  \set tieWaitForNote = ##t
  \grace { c16[ ~ e ~ g] ~ } <c, e g>2
  \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
  e8 ~ c ~ a ~ f ~ <e' c a f>2
  \tieUp
  c8 ~ a
  \tieDown
  \tieDotted
  g8 ~ c g2
}
```

Expressive marks

See also Sezione “Expressive marks” in *Guida alla Notazione*.

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8] }
  g16( a \tuplet 3/2 { b d e' ) }
  g8[( a \tuplet 3/2 { b d' ) e' ] ~ }
  \time 2/4
  \tuplet 5/4 { e'32\ ( a b d' e' ) a'4.\ )
}
```

Adding parentheses around an expressive mark or chordal note

The `\parenthesize` function is a special tweak that encloses objects in parentheses. The associated grob is `ParenthesesItem`.

```
\relative c' {
  c2-\parenthesize ->
  \override Parentheses.padding = #0.1
  \override Parentheses.font-size = #-4
  <d \parenthesize f a>2
}
```

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
}
```

```

\hide NoteHead
\override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

\relative c' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}

```

Adjusting slur positions vertically

Using `\override Slur.positions` it is possible to set the vertical position of the start and end points of a slur to absolute values (or rather, forcing LilyPond's slur algorithm to consider these values as desired). In many cases, this means a lot of trial and error until good values are found. You probably have tried the `\offset` command next just to find out that it doesn't work for slurs, emitting a warning instead.

The code in this snippet allows you to tweak the vertical start and end positions by specifying *relative* changes, similar to `\offset`.

Syntax: `\offsetPositions #'(dy1 . dy2)`

```

offsetPositions =
#(define-music-function (offsets) (number-pair?)
  #{
    \once \override Slur.control-points =
      #(\lambda (grob)
        (match-let (((_ . y1) _ _ (_ . y2))
                    (ly:slur::calc-control-points grob)))

```

```

      ((off1 . off2) offsets))
    (set! (ly:grob-property grob 'positions)
      (cons (+ y1 off1) (+ y2 off2)))
    (ly:slur::calc-control-points grob)))
#})

\relative c' {
  c4(^"default" c, d2)
  \offsetPositions #'(0 . 1)
  c'4(^"(0 . 1)" c, d2)
  \offsetPositions #'(0 . 2)
  c'4(^"(0 . 2)" c, d2)
  \bar "||"
  g4(^"default" a d'2)
  \offsetPositions #'(1 . 0)
  g,,4(^"(1 . 0)" a d'2)
  \offsetPositions #'(2 . 0)
  g,,4(^"(2 . 0)" a d'2)
}

```

Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto

La proprietà `shortest-duration-space` può essere modificata per cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto.

```

\relative c' {
  \override Score.SpacingSpanner.shortest-duration-space = 4.0
  c2-\bendAfter 5
  c2-\bendAfter -4.75
  c2-\bendAfter 8.5
  c2-\bendAfter -6
}

```

Allineare le estremità delle forcelle alle direzioni di NoteColumn

Le estremità delle forcelle possono essere allineate alle direzioni `LEFT`, `CENTER` o `RIGHT` dei grob `NoteColumn` modificando la proprietà `endpoint-alignments`, che è costituita da una coppia di numeri che rappresentano le estremità sinistra e destra della forcella. `endpoint-alignments` devono essere direzioni (-1, 0 o 1). Valori diversi verranno trasformati emettendo un avviso. Non ha effetto quando l'estremità destra di una forcella termina su una pausa; in questo caso termina sempre sul margine sinistro della pausa.

```
{
```

```

c'2\< <c' d'\>\! |
\override Hairpin.endpoint-alignments = #'(1 . -1)
c'2\< <c' d'\>\! |
\override Hairpin.endpoint-alignments = #'(,LEFT . ,CENTER)
c'2\< <c' d'\>\! |
}

```

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```

\relative c' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}

```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```

\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}

```

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c' {
```

```

\key es \major
\time 3/4
% this bar contains no \breathe
<< { g4 as g } \ { es4 bes es } >> |
% Modern notation:
% by default, \breathe uses the rcomma, just as if saying:
% \override BreathingSign.text =
%   #(make-musicglyph-markup "scripts.rcomma")
<< { g4 as g } \ { es4 \breathe bes es } >> |

% rvarcomma and lvarcomma are variations of the default rcomma
% and lcomma
% N.B.: must use Staff context here, since we start a Voice below
\override Staff.BreathingSign.text =
  \markup { \musicglyph "scripts.rvarcomma" }
<< { g4 as g } \ { es4 \breathe bes es } >> |

% raltcomma and laltcomma are alternative variations of the
% default rcomma and lcomma
\override Staff.BreathingSign.text =
  \markup { \musicglyph "scripts.raltcomma" }
<< { g4 as g } \ { es4 \breathe bes es } >> |

% vee
\override BreathingSign.text =
  \markup { \musicglyph "scripts.uupbow" }
es8[ d es f g] \breathe f |

% caesura
\override BreathingSign.text =
  \markup { \musicglyph "scripts.caesura.curved" }
es8[ d] \breathe es[ f g f] |
es2 r4 \bar "||"
}

```

Broken Crescendo Hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

The markup command with-dimensions tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property staff-padding prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```

\relative c' {
  <<

```

```

{
  \dynamicUp
  r2 r16 c'8.\pp r4
}
\\
{
  \override DynamicLineSpanner.layer = #0
  des,2\mf\< ~
  \override TextScript.layer = #2
  \once\override TextScript.staff-padding = #6
  \once\override TextScript.vertical-skylines = #'()
  des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
    \with-color #white
    \filled-box #'(2 . 7) #'(0 . 2) #0
  r8. des4 ~ des16->\sff r8.
}
>>
}

```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```

\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breath mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|"
}

```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
\paper { tagline = ##f }

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))

Cambiare gli stili del testo e degli estensori per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà `'style` di `DynamicTextSpanner`. Il valore predefinito è `'dashed-line`; gli altri valori possibili sono `'line`, `'dotted-line` e `'none`.

```

\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}

```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}
```

Cambiare il simbolo del segno di respiro

Il glifo del respiro può essere modificato sovrascrivendo la proprietà `text` dell'oggetto di formattazione `BreathingSign` con qualsiasi testo incluso in un blocco markup.

```
\relative c' ' {
  c2
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  \breathe
  d2
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = 4
  c4.. a16 r2 |
  \override Dots.dot-count = 0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

}

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }
```

```
\layout { ragged-right = ##f }
```

```
\relative c' ' {  
  c2\f c-\piuF  
}
```

Glissando contemporaneo

Un glissando contemporaneo senza una nota finale può essere creato usando una nota nascosta e un tempo di cadenza.

```
\relative c' ' {  
  \time 3/4  
  \override Glissando.style = #'zigzag  
  c4 c  
  \cadenzaOn  
  c4\glissando  
  \hideNotes  
  c,,4  
  \unHideNotes  
  \cadenzaOff  
  \bar "|"   
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper {
```

```

ragged-right = ##t
tagline = ##f
}

\relative c' ' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\stopTextSpan
}

```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà 'script-priority. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto TextScript) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto Script) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```

\relative c' ' ' {
  \once \override TextScript.script-priority = -100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = -100
  a2^\prall^\markup { \sharp }

  \set fingeringOrientations = #'(up)
  <c-2 a-1>2
  <a-1 c>\tweak script-priority -100 -2>2
}

```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `#f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione `2/3` si aggiusta la posizione orizzontale.

```
\relative c' ' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}
```

Creare degli arpeggi che attraversano note appartenenti a voci diverse

Si può disegnare un *arpeggio* che attraversa delle note in voci diverse dello stesso rigo se si aggiunge l'incisore `Span_arpeggio_engraver` nel contesto `Staff`:

```
\new Staff \with {
  \consists "Span_arpeggio_engraver"
}
\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
    { <e' g>4\arpeggio <d f> <d f>2 }
    \\\
    { <d, f>2\arpeggio <g b>2 }
  >>
}
```

Creare degli arpeggi che attraversano il rigo del pianoforte

In un rigo per pianoforte (`PianoStaff`), è possibile far sì che un *arpeggio* attraversi i rigi impostando la proprietà `PianoStaff.connectArpeggios`.

```
\new PianoStaff \relative c' ' <<
```

```

\set PianoStaff.connectArpeggios = ##t
\new Staff {
  <c e g c>4\arpeggio
  <g c e g>4\arpeggio
  <e g c e>4\arpeggio
  <c e g c>4\arpeggio
}
\new Staff {
  \clef bass
  \repeat unfold 4 {
    <c,, e g c>4\arpeggio
  }
}
>>

```

Creare degli arpeggi che attraversano i righi in altri contesti

Si possono creare *arpeggi* che attraversano i righi in contesti diversi da GrandStaff, PianoStaff e StaffGroup se l'incisore `Span_arpeggio_engraver` è incluso nel contesto `Score`.

```

<<
\new PianoStaff <<
  \new Voice \relative c' {
    <c e>2\arpeggio <d f>2\arpeggio
    <c e>1\arpeggio
  }
  \new Voice \relative c {
    \clef bass
    <c g'>2\arpeggio <b g'>2\arpeggio
    <c g'>1\arpeggio
  }
}
>>

\new Staff \relative c {
  \set Score.connectArpeggios = ##t
  \clef bass
  c2\arpeggio g\arpeggio
  c1\arpeggio
}
>>

\layout {
  \context {
    \Score
    \consists "Span_arpeggio_engraver"
  }
}

```

```
}
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    #}))
```

```
\relative c' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}
```

```

\override TextSpanner.style = #'line
\once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
a4 \startTextSpan
b4 c
a4 \stopTextSpan

\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
  \markup { \draw-line #'(0 . 1) }
\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2

a4 \startTextSpan
b4 c
a4 \stopTextSpan

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Estensore testuale della dinamica personalizzato

Funzioni postfix per estensori testuali personalizzati del crescendo. Gli estensori devono iniziare sulla prima nota della misura; e bisogna usare `-\mycresc`, altrimenti l'inizio dell'estensore viene assegnato alla nota successiva.

*% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.*

```

mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

\relative c' {

```

```

c4-\mycresc "custom cresc" c4 c4 c4 |
c4 c4 c4 c4 |
c4-\mydecrec "custom decrec" c4 c4 c4 |
c4 c4\! c4 c4
}

```

Estensore testuale della dinamica

Si possono definire estensori testuali personalizzati che fanno uso delle forcine e dei crescendo testuali. `\<` e `\>` generano le forcine, `\cresc` etc. generano gli estensori testuali.

% Some sample text dynamic spanners, to be used as postfix operators

```

crpoco =
#(make-music 'CrescendoEvent
             'span-direction START
             'span-type 'text
             'span-text "cresc. poco a poco")

```

```

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decrec c4\!
}

```

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```

\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}

```

Hairpins with different line styles

Hairpins can take any style from `line-interface` - dashed-line, dotted-line, line, trill or zigzag.

```

\relative c' {
  c2\< c\!
}

```

```

\override Hairpin.style = #'dashed-line
c2\< c\!
\override Hairpin.style = #'dotted-line
c2\< c\!
\override Hairpin.style = #'line
c2\< c\!
\override Hairpin.style = #'trill
c2\< c\!
\override Hairpin.style = #'zigzag
c2\< c\!
\revert Hairpin.style
c2\< c\!
}

```

Nascondere la linea di estensione per le dinamiche testuali

I cambi di dinamica in stile testuale (come *cresc.* e *dim.*) appaiono con una linea tratteggiata che mostra la loro estensione. Questa linea può essere soppressa nel modo seguente:

```

\relative c' ' {
  \override DynamicTextSpanner.style = #'none
  \crescTextCresc
  c1\< | d | b | c\!
}

```

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the `\pp`, there are several approaches:

- Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (`\hspace 7.1`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once\overrideX-offset =` Drawback: `\once\override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `\with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other

stuff there, causing collisions (which are not detected by LilyPond's collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.

- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won't have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```
\paper {
  ragged-right = ##f
  indent = 2.5\cm
  tagline = ##f
}
```

```
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
```

```
% Solution 2: Using a dynamic script & shifting with
%             \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 3: Padding the dynamic script so the center-alignment
%             puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1))))
```

```
% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
```

```

                                #:italic "sempre"
                                #:dynamic "pp"))))

% Solution 5: Dynamic with explicit shifting inside the scheme function
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
semppMII =
#(make-dynamic-script
  (markup #:line (#:right-align
    #:normal-text
    #:italic "sempre"
    #:dynamic "pp"))))

}

```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```

\relative c' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}

```

Legature di portamento con complesse strutture di tratteggio

Le legature di portamento possono avere schemi di tratteggio complessi definendo la proprietà `dash-definition`. `dash-definition` è una lista di `dash-elements`. Un `dash-element` è una lista di parametri che definiscono il comportamento del tratteggio per un segmento della legatura.

La legatura di portamento è definita come il parametro `t` della curva di bezier che va da 0 sul margine sinistro della legatura fino a 1 su quello destro. `dash-element` è una lista di (`inizio-t` `fine-t` `frazione-trattino` `punto-trattino`). La regione della legatura di portamento che va da `inizio-t` a `fine-t` avrà una `frazione` `frazione-trattino` di ogni `punto-trattino` nero. `punto-trattino` viene definito in spazi rigo. `frazione-trattino` è impostato su 1 per una legatura di portamento continua.

```

\relative c' {
  \once \override

```

```

    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                                (0.3 0.6 1 1)
                                (0.65 1.0 0.4 0.75))

c4( d e f)
\once \override
    Slur.dash-definition = #'((0 0.25 1 1)
                                (0.3 0.7 0.4 0.75)
                                (0.75 1.0 1 1))

c4( d e f)
}

```

Modificare i valori predefiniti per le abbreviazioni delle articolazioni

Le abbreviazioni sono definite in ‘ly/script-init.ly’, dove sono assegnati valori predefiniti alle variabili `dashHat`, `dashPlus`, `dashDash`, `dashBang`, `dashLarger`, `dashDot` e `dashUnderscore`. Questi valori predefiniti possono essere modificati. Ad esempio, per associare l’abbreviazione `+` (`dashPlus`) al simbolo del *trillo* invece che al simbolo `+` predefinito, si assegna il valore `trill` alla variabile `dashPlus`:

```

\paper { tagline = ##f }

\relative c' { c1-+ }

dashPlus = \trill

\relative c' { c1-+ }

```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```

\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
}

```

```

\override Slur.positions = #'(2 . 2)
e4( a)
\override Slur.positions = #'(3 . 3)
e4( a)
\override Slur.positions = #'(4 . 4)
e4( a)
\override Slur.positions = #'(5 . 5)
e4( a)
\override Slur.positions = #'(0 . 5)
e4( a)
\override Slur.positions = #'(5 . 0)
e4( a)
\stemUp
\override Slur.positions = #'(-5 . -5)
e4( a)
\stemDown
\revert Slur.positions
e4( a)
}

```

Spostare le estremità delle forcelle

Le estremità delle forcelle possono essere spostate in modo relativo alla loro posizione predefinita (offset) impostando la proprietà `shorten-pair` dell'oggetto `Hairpin`. Valori positivi spostano le estremità a destra, valori negativi le spostano a sinistra. Diversamente dalla proprietà `minimum-length`, questa proprietà modifica solo l'aspetto della forcella; non cambia la spaziatura orizzontale (inclusa la posizione delle dinamiche confinanti). Questo metodo è quindi utile per ritoccare una forcella entro lo spazio ad essa allocato.

```

{
  c'1~\<
  c'2~ c'\!
  \once \override Hairpin.shorten-pair = #'(2 . 2)
  c'1~\<
  c'2~ c'\!
  \once \override Hairpin.shorten-pair = #'(-2 . -2)
  c'1~\<
  c'2~ c'\!
  c'1~\p-\tweak shorten-pair #'(2 . 0)\<
  c'2~ c'\ffff
}

```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(~\markup { \halign #-10 \natural } d4.) c8
}
```

Stampare le forcelle in vari stili

Il segno di dinamica della forcina può avere diversi stili

```
\paper { tagline = ##f }
```

```
\relative c' {
  \override Hairpin.stencil = #flared-hairpin
  a4< a a a\ff
  a4\p< a a a\ff
  a4\sffz< a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4< a a a\ff
  a4\p< a a a\ff
  a4\sffz< a a a\!
  \override Hairpin.stencil = #flared-hairpin
  a4> a a a\ff
  a4\p> a a a\ff
  a4\sffz> a a a\!
  \override Hairpin.stencil = #constante-hairpin
}
```

```

a4\> a a a\f
a4\p\> a a a\ff
a4\sفز\> a a a\!
}

```

Forcelle con notazione al niente

Le forcelle di dinamica possono essere rappresentate con una punta tonda (notazione “al niente”) impostando la proprietà `circled-tip` dell’oggetto `Hairpin` su `#t`.

```

\relative c' {
  \override Hairpin.circled-tip = ##t
  c2\< c\!
  c4\> c\< c2\!
}

```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```

\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c' '1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c' '1
}

```

Impostare il comportamento delle forcelle sulle stanghette

Se la nota che termina una forcella si trova sul primo battito di una battuta, la forcella si ferma prima della stanghetta che precede la nota. Si può controllare questo comportamento modificando la proprietà 'to-barline.

```
\relative c' ' {
  e4\< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4\< e2.
  e1\!
}
```

Impostare la lunghezza minima delle forcelle

Se le forcelle sono troppo corte, possono essere allungate modificando la proprietà minimum-length dell'oggetto Hairpin.

```
<<
{
  \after 4 \< \after 2 \> \after 2. \! f'1
  \override Hairpin.minimum-length = 8
  \after 4 \< \after 2 \> \after 2. \! f'1
}
{
  \repeat unfold 8 c'4
}
>>
```

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
```

```

<>~"Wrong"
c2_\fermata~\fermata % The second fermata is ignored!
<e d'>2~\flageolet_\flageolet

\stopStaff s1 \startStaff

<>~"Works if written inside a chord"
<e_\flageolet d'~\flageolet>2
<e_\flageolet d'~\flageolet>2
<e_\flageolet~\flageolet>2
<e_\fermata~\fermata>2
}

```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```

\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4~\snappizzicato
  <c, e g>4_\snappizzicato
}

```

Usare un segno di spunta come simbolo di respiro

La musica vocale e per fiati usa frequentemente il segno di spunta come segno di respiro. Questo indica un respiro che sottrae un po' di tempo alla nota precedente invece di prendere una piccola pausa, indicata dal segno di respiro rappresentato dalla virgola. Il segno può essere spostato un po' su per allontanarlo dal rigo.

```

\relative c' ' {
  c2
  \breathe
  d2
  \override BreathingSign.Y-offset = #2.6
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.tickmark" }
  c2
  \breathe
  d2
}

```

}

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gambi che forniscano questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"
```

```
\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper"
      <<
        { \voiceOne \arpeggioBracket
          a2( b2
            <b d>1\arpeggio)
            <cs e>\arpeggio ~
            <cs e>4
          }
        \addlyrics { \lyricmode { A -- men. } }
      >>
      \new Voice = "lower"
      { \voiceTwo
        a1 ~
        a
        a ~
        a4 \bar "|"
      }
    >>
  }
  \layout { ragged-right = ##t }
}
```

Uso delle doppie legature di portamento per gli accordi legati

Alcuni compositori scrivono due *legature di portamento* per indicare gli accordi legati. Si può ottenere questo risultato impostando `doubleSlurs`.

```
\relative c' {
  \set doubleSlurs = ##t
  <c e>4( <d f> <c e> <d f>)
}
```

Uso della proprietà whiteout

Qualsiasi oggetto grafico può essere posizionato sopra uno sfondo bianco per mascherare parti degli oggetti che si trovano sotto. Ciò può essere utile per migliorare l'aspetto delle collisioni in situazioni complesse in cui il riposizionamento degli oggetti è troppo difficile. Bisogna impostare esplicitamente la proprietà `layer` (livello) per controllare quali oggetti debbano essere mascherati dallo sfondo bianco.

In questo esempio la collisione della legatura di valore con l'indicazione di tempo viene migliorata mascherando la parte della legatura che incrocia l'indicazione di tempo impostando la proprietà `whiteout` di `TimeSignature`. Per farlo si sposta `TimeSignature` su un livello superiore a `Tie`, che viene lasciato al livello predefinito 1; e `StaffSymbol` viene spostato su un livello superiore a `TimeSignature` in modo che non venga mascherato.

```
{
  \override Score.StaffSymbol.layer = 4
  \override Staff.TimeSignature.layer = 3
  b'2 b'~
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}
```

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
\ tweak stencil
  #(\lambda (grob)
    (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
  \stopped

\relative c' {
  a'4~\upline a( c d')_ \upline
}
```

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

```

\relative c' {
  \override DynamicLineSpanner.staff-padding = #4
  c2\p f\mf
  g2\< b4\> c\!
}

```

Repeats

See also Sezione “Repeats” in *Guida alla Notazione*.

Aggiungere le parentesi delle volte a altri righi

L’incisore `Volta_engraver` risiede nel contesto `Score`, quindi le parentesi delle ripetizioni appaiono di norma soltanto sul rigo superiore. Questo comportamento può essere modificato aggiungendo l’incisore `Volta_engraver` al contesto `Staff` in cui si desidera far apparire le parentesi; si veda anche il frammento “Volta multirigo”.

```
<<
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff \with { \consists "Volta_engraver" } { c'2 g' e' a' }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
>>
```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
```

```

    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

% <http://lsr.di.unimi.it/LSR/Item?id=964>

%%=> <http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html>

%%=> <http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357>

```

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    measureBarType = "!"
    startRepeatBarType = "[|:"
    endRepeatBarType = ":|]"
    doubleRepeatBarType = ":||[|:"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {

```

```

{ c' }
{
  %% v2.18 workaround
  \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
  c'
}
}
\bar "|"
}

```

Controlling the appearance of tremolo slashes

Using various properties of the `StemTremolo` grob it is possible to control the appearance of tremolo slashes.

- Property `slope` sets the slope for tremolo slashes.
- Property `shape` determines whether tremolo slashes look like rectangles (value `rectangle`) or like very small beams (value `beam-like`).
- Property `style` sets both the slope and the shape depending on whether the note has flags, beams, or only a plain stem. This is in contrast to the previous two properties, which change the slope and shape unconditionally. There are two styles defined.
 - `default`: slashes for down-stem flags are longer and more sloped than slashes for up-stem flags; slashes on beamed notes have a rectangular shape and are parallel to the beam.
 - `constant`: all slashes are beam-like and have the same slope except for down-stem flags.

```

music = {
  a''4:32 a':
  e''8: \noBeam e':
  a'':[ a':]
  f':[ g':]
  d':[ d':]
}

\new Staff {
  <>\markup "default"
  \music
}

\new Staff {
  <>\markup \typewriter "style = #'constant"
  \override StemTremolo.style = #'constant
  \music
}

\new Staff {
  <>\markup \typewriter "shape = #'rectangle"
  \override StemTremolo.shape = #'rectangle
}

```

```

\music
}

\new Staff {
  <>^\markup \typewriter "shape = #'beam-like"
  \override StemTremolo.shape = #'beam-like
  \music
}

\new Staff {
  <>^\markup \typewriter "slope = -0.2"
  \override StemTremolo.slope = -0.2
  \music
}

\paper {
  indent = 0
  tagline = ##f
}

```

Tremoli attraverso i righi

Dato che `\repeat tremolo` si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando `\change Staff`.

```

\new PianoStaff <<
  \new Staff = "up" \relative c' {
    \key a \major
    \time 3/8

```

```

s4.
}
\new Staff = "down" \relative c'' {
  \key a \major
  \time 3/8
  \voiceOne
  \repeat tremolo 6 {
    <a e'>32
    {
      \change Staff = "up"
      \voiceTwo
      <cis a' dis>32
    }
  }
}
}
>>

```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap property.

```

\relative c'' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.67
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.33
  \repeat tremolo 8 { a32 f }
}

```

Ripetizioni con segni di percentuale isolati

Si possono stampare anche segni di percentuale isolati.

```
makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly:music-length note)))

\relative c'' {
  \makePercent s1
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
  \clef bass
  c4 r g r
  c4 r g r
  c4 r g r
  c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}

\paper { tagline = ##f }
```

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

```
\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}
```

Contatore della ripetizione con segno percentuale

Le ripetizioni di misura che hanno più di due ripetizioni possono avere un contatore se si cambia la proprietà opportuna, come mostra questo esempio:

```
\relative c' {
  \set countPercentRepeats = ##t
  \repeat percent 4 { c1 }
}
```

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
%% Updating this snippet with convert-ly to 2.25. returns:
%%
%% "Not smart enough to convert music following \fine.
%%
%% Warning: \fine no longer enforces the end of the music. If your piece
%% has music following \fine that you want to exclude when it is
%% unfolded, use \volta to exclude it.
%% Please refer to the manual for details, and update manually."
%%
%% Alas, the use of \fine here is not problematic here --harm
```

```
{
  \relative c' {
    c4 c c c c c c c c c c c
    \repeat segno 2 {
      c4 c c c c c c c
      \alternative {
        \volta 1 {
          c4 c c c c c c c c c c c
        }
      }
    }
  }
}
```

```

% If you don't use \break at Coda, use \noBreak here
% and after \bar "" below.
\noBreak
\section % double bar line
\cadenzaOn % pause bar count
\stopStaff % remove staff lines
% Increasing the unfold counter will expand the staff-free space
\repeat unfold 6 {
  s1
  \bar ""
}
% Place JumpScript where the staff would normally be.
\once \override Score.JumpScript.outside-staff-priority = ##f
\once \override Score.JumpScript.Y-offset = 0
\startStaff % resume bar count
\cadenzaOff % show staff lines again
}
}
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\repeat unfold 8 { c4 c c c }
\fine
}
}

\paper { tagline = ##f }

```

6

D.S. % al ϕ

(9) Coda

Impostare la doppia ripetizione predefinita per le volte

Esistono tre diversi stili di doppie ripetizioni per le volte, che si possono impostare con `doubleRepeatBarType`.

```

\relative c' {
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\dots:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\dots:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = ":\dots:"
}

```

```
\repeat volta 2 { c1 }
}
```

Accorciare le parentesi delle volte

Per impostazione predefinita, le parentesi delle volte si estendono per tutta l'alternativa, ma si possono accorciare impostando `voltaSpannerDuration`. Nell'esempio seguente, la parentesi dura una misura, che ha una durata di 3/4.

```
\fixed c'' {
  \time 3/4
  c4 c c
  \repeat volta 5 {
    d4 d d
    \alternative {
      \volta 1,2,3,4 {
        \once \override Score.VoltaBracket.musical-length =
        \musicLength 2.
        e4 e e
        f4 f f
      }
      \volta 5 {
        g4 g g
        g2.
      }
    }
  }
}
```

Volta sotto gli accordi

Aggiungendo l'incisore `Volta_engraver` al rigo, è possibile inserire le volte sotto gli accordi.

```
\score {
  <<
    \chords {
      c1
      c1
    }
    \new Staff \with {
      \consists "Volta_engraver"
    }
    {
      \repeat volta 2 { c'1 }
      \alternative { c' }
    }
  }
}
```

```

>>
\layout {
  \context {
    \Score
    \remove "Volta_engraver"
  }
}

```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, voltes can be put over staves other than the topmost one in a score.

```

voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}

<<
\new StaffGroup <<
  \new Staff \voltaMusic
  \new Staff \voltaMusic
>>
\new StaffGroup <<
  \new Staff \with { \consists "Volta_engraver" }
    \voltaMusic
  \new Staff \voltaMusic
>>
>>

```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { \volta-number { 1. 2. 3... } \italic { ad lib. } }
```

```
\relative c' ' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Simultaneous notes

See also Sezione “Simultaneous notes” in *Guida alla Notazione*.

Voci ulteriori per evitare le collisioni

In alcuni casi di musica polifonica complessa sono necessarie delle voci ulteriori per evitare le collisioni tra note. Se servono più di quattro voci parallele, si possono aggiungere altre voci definendo una variabile con la funzione Scheme function `context-spec-music`.

```
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

```
\relative c' ' {
  \time 3/4
  \key d \minor
  \partial 2
  <<
    \new Voice {
      \voiceOne
      a4. a8
      e'4 e4. e8
      f4 d4. c8
    }
    \new Voice {
      \voiceTwo
      d,2
      d4 cis2
      d4 bes2
    }
    \new Voice {
      \voiceThree
      f'2
      bes4 a2
      a4 s2
    }
    \new Voice {
      \voiceFive
      s2
      g4 g2
      f4 f2
    }
  >>
}
```

Changing \partCombine texts

When using the automatic part combining feature, the printed text for the solo and unison sections may be changed.

```
\new Staff <<
```

```

\set Staff.soloText = "girl"
\set Staff.soloIIIText = "boy"
\set Staff.aDueText = "together"
\partCombine
  \relative c'' {
    g4 g r r
    a2 g
  }
  \relative c'' {
    r4 r a( b)
    a2 g
  }
}
>>

```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```

\relative c' {
  <\tweak font-size #-2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e }_~\markup { A big c }
}

```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```

fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>

```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come “solo” e “a2” sono aggiunte automaticamente; per toglierle basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c’è bisogno di aggiungere i testi “solo/a2”, quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c’è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

```
musicUp = \relative c'' {
  \time 4/4
  a4 c4.( g8) a4 |
  g4 e' g,( a8 b) |
  c b a2.
}

musicDown = \relative c'' {
  g4 e4.( d8) c4 |
  r2 g'4( f8 e) |
  d2 \stemDown a
}

\score {
  <<
    \new Staff \with {
      instrumentName = "standard polyphony"
    } << \musicUp \\\musicDown >>

    \new Staff \with {
      instrumentName =
        \markup { \typewriter "\\partCombine" without text}
      printPartCombineTexts = ##f
    } \partCombine \musicUp \musicDown

    \new Staff \with {
      instrumentName =
        \markup { \typewriter "\\partCombine" with text}
    } \partCombine \musicUp \musicDown
  >>

  \layout {
    indent = 6.0\cm
    \context {
```

```

\Score
% Setting this to a large value avoids a bar line at the
% beginning that would connect the three staves otherwise.
\override SystemStartBar.collapse-height = 30
}
}
}

```

standard polyphony

\partCombine without text

\partCombine with text

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```

fixA = {
  \once \override Stem.length = #11
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}

```

Forzare lo spostamento orizzontale delle note

Quando il motore tipografico non riesce a risolvere una situazione, si può usare la sintassi che sovrascrive le decisioni tipografiche. L'unità di misura usata è lo spazio del rigo.

```

\relative c' <<
{
  <d g>2 <d g>
}

```

```

}
\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = 1.7
  <b f'>2
}
>>

```

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}

```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```

\new Staff \relative c' <<
{
  f2. f4
}

```

```

\override Staff.NoteCollision.prefer-dotted-right = ##f
f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##t
f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>

```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}

```

Two \partCombine pairs on one staff

The \partCombine function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from \partCombine can have their layout properties adjusted in the usual way. Here we define extensions of \partCombine to make it easier to put four voices on a staff.

```

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

```

```

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b'
  \partCombineUp \soprano \alto

```

```

\partCombineDown \tenor \bass
>>

Staff notation

See also Sezione “Staff notation” in *Guida alla Notazione*.

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```
\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
      } <<
        {
          c1 | d
        }
      \new Staff {
        \once \omit Staff.TimeSignature
        c1 | b
      }
    }
  >>
  c1
}
```

```

    }
  >>
}

```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```

\paper { tagline = ##f }

\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
}

```

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)
        #:concat (#:draw-line (cons length 0)
          #:arrow-head X RIGHT fill))))))

S A
 T B

a b c d
 a b c d

The image displays two systems of musical notation. The first system consists of three staves: SI SII (Soprano I and II), AI AII (Alto I and II), and T B (Tenor and Bass). The second system consists of two staves: S A (Soprano and Alto) and T B (Tenor and Bass). All staves show a sequence of notes corresponding to the letters e, f, g, h, i, j, k, l.

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per semplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi o `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

`cueWhile =`

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}
```

```
glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}
```

```
\relative c' ' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
music = \relative c' {
  \repeat volta 3 {
    c4 d e f |
    \alternative {
      \volta 1 { c4 d e f | c2 d \break }
      \volta 2 { f4 g a b | f4 g a b | f2 a | \break }
    }
  }
}
```

```

        \volta 3 { c4 d e f | c2 d } } }
c1 \bar "|"
}

\markup "default"
{
  \music
}

\markup \typewriter "'numbers"
{
  \set Score.alternativeNumberingStyle = #'numbers
  \music
}

\markup \typewriter "'numbers-with-letters"
{
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \music
}

\paper { tagline = ##f }

default

```

Three staves of music in treble clef, common time (C). The first staff starts with a first ending bracket labeled '1.' over the last two measures. The second staff starts with a second ending bracket labeled '2.' over the last two measures. The third staff starts with a third ending bracket labeled '3.' over the last two measures. The music consists of eighth and quarter notes.

'numbers

Three staves of music in treble clef, common time (C). The first staff starts with a first ending bracket labeled '1.' over the last two measures. 'numbers-with-letters

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
```

```

\Score
\remove "Bar_number_engraver"
}
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

% <http://lsr.di.unimi.it/LSR/Item?id=964>

%%=> <http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html>

%%=> <http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357>

```

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    measureBarType = "!"
    startRepeatBarType = "[|:"
    endRepeatBarType = ":|]"
    doubleRepeatBarType = ":||[|:"
  }
}

```

%% example:

```

{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
}

```

```

\alternative {
  { c' }
  {
    %% v2.18 workaround
    \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
    c'
  }
}
\bar "|"

```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the `StaffSymbol` property `line-count`.

```

upper = \relative c'' {
  c4 d e f
}

```

```

lower = \relative c {
  \clef bass
  c4 b a g
}

```

```

\score {
  \context PianoStaff <<
    \new Staff {
      \upper
    }
    \new Staff {
      \override Staff.StaffSymbol.line-count = #4
      \lower
    }
  >>
}

```

Changing the staff size

Though the simplest way to resize staves is to use `#{set-global-staff-size xx}`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```

<<
  \new Staff {

```

```

\relative c'' {
  \dynamicDown
  c8\ff c c c c c c c
}
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\ff c c c
}
>>

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 20)

```

```

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
}
}

```

```
line-width = 7.5\in
left-margin = 0.5\in
bottom-margin = 0.25\in
top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
    #{ \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
    #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct

voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```
\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g4 |
  }
>>
```

Mostrare la parentesi anche se c'è un solo rigo nel sistema

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```
\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
```

```

}
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
}

```

```
\paper { tagline = ##f }
```

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```

\relative c' {
  \key c \minor
  \time 2/4
  c16( as') c, -. des-.
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4
  \startTrillSpan { d16[( \stopTrillSpan es)] }
  c( c' g es c g' es d
  \hideNotes
  c8)
}

```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi `\alternative` può essere simulato aggiungendo all'inizio di ogni blocco `\alternative` una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = 3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {

    \new Staff <<
      \new Voice { \clef "G_8" \music }
    >>
  \new TabStaff <<
    \new TabVoice { \clef "moderntab" \music }
  >>
>>
}

\paper { tagline = ##f }
```

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

%% <http://lsr.di.unimi.it/LSR/Item?id=1031>

```
#(define ((flared-tie coords) grob)

Forcing measure width to adapt to MetronomeMark's width

By default, metronome marks do not influence horizontal spacing.

This can be solved through a simple override, as shown in the second half of the example.

```
example = {
```

```
  \tempo "Allegro"
```

```
  R1*6
```

```
  \tempo "Rall."
```

```
  R1*2
```

```
  \tempo "A tempo"
```

```
  R1*8
```

```
}
```

```
{
```

```
  \compressMMRests {
```

```
    \example
```

```
  R1
```

```

R1
\override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
\example
}
}

```

The image shows two staves of musical notation. The first staff starts with a treble clef and a common time signature 'C'. It contains three measures: the first measure is marked 'Allegro 6' and contains a single eighth note; the second measure is marked 'Rall. 2' and contains a single eighth note; the third measure is marked 'A tempo 8' and contains a single eighth note. The second staff starts with a treble clef and a common time signature 'C'. It contains three measures: the first measure is marked 'Allegro 6' and contains a single eighth note; the second measure is marked 'Rall. 2' and contains a single eighth note; the third measure is marked 'A tempo 8' and contains a single eighth note. The staves are connected by a brace on the left.

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```

\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}

```

The image shows a single staff of musical notation with a treble clef and a common time signature 'C'. It contains three measures: the first measure contains a single eighth note; the second measure contains a single eighth note; the third measure contains a single eighth note. A glissando line is drawn over the second and third measures, indicating a glissando effect.

Incipit

Quando si trascrive musica mensurale, un incipit all'inizio del brano è utile per indicare il tempo e l'armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all'epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

Inserting score fragments above a staff, as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

```
tuning = \markup {
  \score {
    \new Staff \with { \remove "Time_signature_engraver" }
    {
      \clef bass
      <c, g, d g>1
    }
    \layout { ragged-right = ##t indent = 0\cm }
  }
}

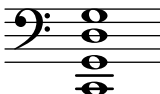

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
  tagline = ##f
}

\layout { ragged-right = ##f }

\relative c' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}
```

Solo Cello Suites

Suite IV

Originalstimmung: 

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in layout as well.

```
%\layout {
% \context {
%   \Score
%   stringOneTopmost = ##f
% }
```

```

% \context {
%   \TabStaff
%   tablatureFormat = #fret-letter-tablature-format
% }
%}

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

<<
\new Staff { \clef "G_8" <>_"default" \m <>_"italian (historic)"\m }
\new TabStaff
{
  \m
  \set Score.stringOneTopmost = ##f
  \set TabStaff.tablatureFormat = #fret-letter-tablature-format
  \m
}
>>

```

The image displays a musical score with two staves. The top staff is a treble clef with a common time signature (C). It contains two measures of music. The first measure is labeled 'default' and the second is labeled 'italian (historic)'. The bottom staff is a tablature staff with a G-clef and a 'B' symbol. It contains two measures of tablature corresponding to the notes in the top staff. The first measure is labeled 'default' and the second is labeled 'italian (historic)'.

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```

music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
}

<<
\new Staff {
  \clef "G_8"
  \music
}
\new TabStaff \with {
  tablatureFormat = #fret-letter-tablature-format
}
{
  \music
}
>>

```

>>

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà `breakable` e `after-line-breaking` su `#t`:

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

music = {
  \repeat unfold 16 f8 |
  f1\glissando |
  a4 r2. |
  \repeat unfold 16 f8 |
  f1\glissando \once\glissandoSkipOn |
  a2 a4 r4 |
  \repeat unfold 16 f8
}

\relative c' {
  <>\markup { \typewriter Glissando.breakable
              set to \typewriter "#t" }
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  \music
}

\relative c' {
  <>\markup { \typewriter Glissando.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
  indent = 0
  tagline = ##f
}
```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spesso una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizionarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
  \clef bass
  c4 r g r
  c4 r g r
  c4 r g r
  c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
```

>>

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}
```

```
music = \fixed c'' {
  c1
  d2 \section e2
  f1 \fine
}
```

```
\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>
```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```
\relative c'' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text
```

```

\override Staff.OttavaBracket.right-bound-info =
  #ly:horizontal-line-spanner::calc-right-bound-info
\ottava 1
c1
c''''1
}

```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```

\new StaffGroup
\relative c'' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
      (SystemStartSquare b) ) c ) d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>

```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, *ottava* indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), *grado* indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e *alterazione* può essere `,SHARP`, `,FLAT`, `,DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, `(grado . alterazione)`, ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonali dove un “diesis” non è 100 centesimi, *alterazione* si riferisce alla proporzione di un duecentesimo di tono intero.

```
\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  %\set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dodsdb do do |
}
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
```

```

\startMeasureCount
\repeat unfold 7 {
  c'4 d' e' f'
}
\stopMeasureCount
\bar "||"
g'4 f' e' d'
\override Staff.MeasureCounter.count-from = #2
\startMeasureCount
\repeat unfold 5 {
  g'4 f' e' d'
}
g'4 f'
\bar ""
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount
}

```

```
\paper { tagline = ##f }
```

Modello per orchestra, coro e pianoforte

Questo modello mostra come usare i contesti annidati `StaffGroup` e `GrandStaff` per creare sottogruppi degli strumenti dello stesso tipo. Mostra anche come usare `\transpose` in modo che le variabili mantengano la musica per gli strumenti traspositori nell'intonazione reale.

```
#(set-global-staff-size 17)
```

```

\paper {
  indent = 3.0\cm % add space for instrumentName
  short-indent = 1.5\cm % add less space for shortInstrumentName

```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
  \new Staff <<
    \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
  >>
  \new Lyrics \with {

```

```

\override LyricText.extra-offset = #'(0 . 8.6)
\override LyricExtender.extra-offset = #'(0 . 8.6)
\override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }
>>

```

Quoting another voice

The `quotedEventTypes` property determines the music event types which should be quoted. The default value is (note-event rest-event tie-event beam-event tuplet-span-event), which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the `\quoteDuring` expression.

In the following example, a 16th rest is not quoted since `rest-event` is not in `quotedEventTypes`.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```

quoteMe = \relative c' {
  fis4 r16 a8.-> b4\ff c
}
\addQuote quoteMe \quoteMe

original = \relative c'' {
  c8 d s2
  \once \override NoteColumn.ignore-collision = ##t
  es8 gis8
}

<<
\new Staff \with { instrumentName = "quoteMe" }
\quoteMe

\new Staff \with { instrumentName = "orig" }
\original

\new Staff \with {
  instrumentName = "orig+quote"
  quotedEventTypes = #'(note-event articulation-event)
}
\relative c''
<<
\original
\new Voice {
  s4
  \set fontSize = #-4
  \override Stem.length-fraction = #(magstep -4)
  \quoteDuring "quoteMe" { \skip 2. }
}

```

>>
>>

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
}
```

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`, together with the clefs.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```
someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' { \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}

\paper { tagline = ##f }
```

Eliminare la prima linea vuota

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`, a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righe non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>

\paper { tagline = ##f }
```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
  tagline = ##f
}
```

```
notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}
```

```
\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

Shape individual ties in chords

To shape individual ties in chords use the method demonstrated below.

```
\paper { tagline = ##f }
```

```
\markup "Chords can be tied note by note"
```

```
{ <c'~ e'~ g'~ c''~>2 q }
```

```
\markup \wordwrap {
```

Affecting those *ties* with "`\\shape`" will not succeed, because *TieColumn* positions them on its own behalf and more or less ignores the "`\\shape-input`".

You may surpress this by setting '*positioning-done*' true. Alas, '*positioning-done*' is an internal property, setting it true means: all positioning is done, don't do anything further. So you better take care you really did. See the example below where this is missed: All directions are down and the *thickness* is not accurate:

```
}
```

```
{
```

```
<c'~ e'~ g'~ c''~>2
```

```
\once \override TieColumn.positioning-done = ##t
```

```
q
```

```
}
```

```
\markup "To cure that, enter ties with explicit direction-modifiers"
```

```
{
```

```
<c'_~ e'_~ g'_~ c''^~>2
```

```

\once \override TieColumn.positioning-done = ##t
q
}

\markup "Now you can use \shape for each tie as usual"

{
<c'-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
>2
\once \override TieColumn.positioning-done = ##t
q
}

\markup "This works at line break as well."

{
<c'-\shape #'(((0 . 0) (0 . -10) (0 . -10) (0 . 0))
              ((0 . 0) (0 . -10) (0 . -10) (0 . 0)))
~
e'-\shape #'(((0 . 0) (0 . -5) (0 . -5) (0 . 0))
              ((0 . 0) (0 . -5) (0 . -5) (0 . 0)))
~
g'-\shape #'(((0 . 0) (0 . -2) (0 . -2) (0 . 0))
              ((0 . 0) (0 . -2) (0 . -2) (0 . 0)))
~
c''-\shape #'(((0 . 0) (0 . 5) (0 . 5) (0 . 0))
              ((0 . 0) (0 . 5) (0 . 5) (0 . 0)))
~
>2
\break
\once \override TieColumn.positioning-done = ##t
q
}

\markup "Same with tieWaitForNote"

{
\set tieWaitForNote = ##t
c'4-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
\once \override TieColumn.positioning-done = ##t
<c' e' g' c''>1
}

```

Chords can be tied note by note

Affecting those ties with `\shape` will not succeed, because `TieColumn` positions them on its own behalf and more or less ignores the `\shape-input`. You may surpress this by setting `'positioning-done true`. Alas, `'positioning-done` is an internal property, setting it true means: all positioning is done, don't do anything further. So you better take care you really did. See the example below where this is missed: All directions are down and the thickness is not accurate:

To cure that, enter ties with explicit direction-modifiers

Now you can use `\shape` for each tie as usual

This works at line break as well.

Same with `tieWaitForNote`

Tick bar lines

'Tick' bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

```
\relative c' {
  \set Score.measureBarType = #"'"
  c4 d e f
  g4 f e d
  c4 d e f
  g4 f e d
  \bar "|."
}
```

Time signature in brackets

The time signature can be enclosed within brackets.

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

Enclose the time signature in parentheses.

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
\set Staff.middleCPosition = 6
\set Staff.middleCClefPosition = 6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = "clefs.C"
\set Staff.clefPosition = 4
\set Staff.middleCPosition = 4
\set Staff.middleCClefPosition = 4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = "clefs.G"
\set Staff.clefPosition = -2
\set Staff.clefTransposition = -7
\set Staff.middleCPosition = 1
\set Staff.middleCClefPosition = 1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = 0
\set Staff.clefTransposition = 0
\set Staff.middleCPosition = -4
\set Staff.middleCClefPosition = -4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
```

```

c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = 0
c'1
}

```

```
\paper { tagline = ##f }
```

Two \partCombine pairs on one staff

The `\partCombine` function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from `\partCombine` can have their layout properties adjusted in the usual way. Here we define extensions of `\partCombine` to make it easier to put four voices on a staff.

```

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

```

```

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b'
  \partCombineUp \soprano \alto
  \partCombineDown \tenor \bass
>>

```

```

\layout {
  \context {
    \Staff
    \accepts "VoiceBox"
  }
}

```

```

\context {

```

Using marklines in a Frenched score

Using MarkLine contexts (such as in LSR1010 (<https://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two MarkLines are removed in one system. The `Keep_alive_together_engraver` can be used within each StaffGroup to keep the MarkLine alive only as long as the other staves in the group stay alive.

```

bars = {
  \tempo "Allegro" 4=120
  s1*2
  \repeat unfold 5 { \mark \default s1*2 }
  \bar "||"
  \tempo "Adagio" 4=40
  s1*2
  \repeat unfold 8 { \mark \default s1*2 }
  \bar "|."
}

winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }

#(set-global-staff-size 16)
\paper {
  systems-per-page = 5
}

```

```

```

The musical score is divided into four systems, each containing staves for Winds, Trumpet, Trombone, and Strings. The tempo markings are **Allegro** (♩ = 120) for the first two systems and **Adagio** (♩ = 40) for the last two. Section labels A through H are placed above the staves to indicate different parts of the music.

System 1 (Measures 1-4): Tempo **Allegro** (♩ = 120). Section labels **A** and **B** are above the Winds staff. The Trumpet and Trombone staves have rests in measures 3 and 4. The Strings staff has a continuous eighth-note pattern.

System 2 (Measures 5-8): Section labels **C** and **D** are above the Winds staff. The Strings staff continues with the eighth-note pattern.

System 3 (Measures 9-12): Tempo **Adagio** (♩ = 40). Section labels **E** and **F** are above the Winds staff. The Trombone staff has rests in measures 10 and 12. The Strings staff continues with the eighth-note pattern.

System 4 (Measures 13-16): Section labels **G** and **H** are above the Winds staff. The Strings staff continues with the eighth-note pattern.

The image shows a musical score snippet with two systems of staves. The first system (measures 21-25) consists of three staves: Winds, Tpt (Trumpet), and Strings. The second system (measures 26-30) consists of two staves: Winds and Strings. Measures are labeled with letters J, K, L, M, and N above the staves. The Winds and Strings staves in both systems show a continuous eighth-note pattern, while the Tpt staff in the first system shows a pattern of eighth notes and rests.

Vertically aligned StaffGroups without connecting SystemStartBar

This snippet shows how to achieve vertically aligned StaffGroups with a SystemStartBar for each StaffGroup, but without connecting them.

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

A musical score for a simple setting of the choral, presented in a grand staff (treble and bass clefs) with a common time signature (C). The melody is written in the treble clef, and the bass line is in the bass clef. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is simple, using mostly whole and half notes, with a few accidentals (sharps and naturals).

Pupil: Here's my version!

A musical score for the Pupil's version of the choral, presented in a grand staff (treble and bass clefs) with a common time signature (C). The melody is written in the treble clef, and the bass line is in the bass clef. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is more complex than the Teacher's version, using more eighth and sixteenth notes, and includes some accidentals (sharps and naturals).

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

A musical score for the Teacher's reference version of the choral, presented in a grand staff (treble and bass clefs) with a common time signature (C). The melody is written in the treble clef, and the bass line is in the bass clef. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is more complex than the Pupil's version, using more eighth and sixteenth notes, and includes some accidentals (sharps and naturals).

Volta sotto gli accordi

Aggiungendo l'incisore `Volta_engraver` al rigo, è possibile inserire le volte sotto gli accordi.

```
\score {
  <<
    \chords {
      c1
      c1
    }
    \new Staff \with {
      \consists "Volta_engraver"
    }
    {
      \repeat volta 2 { c'1 }
      \alternative { c' }
    }
  >>
  \layout {
    \context {
      \Score
      \remove "Volta_engraver"
    }
  }
}
```

```

    }
  }
}

```

Volta brackets in multiple staves

By adding the `Volta_engraver` to the relevant staff, voltes can be put over staves other than the topmost one in a score.

```

voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
    \alternative {
      \volta 1 { d1 }
      \volta 2 { e1 }
    }
  }
}

<<

  \new Staff \voltaMusic
  \new Staff \voltaMusic
>>
\new StaffGroup <<
  \new Staff \with { \consists "Volta_engraver" }
  \voltaMusic
  \new Staff \voltaMusic
>>
>>

```

The image shows two systems of musical notation. Each system consists of two staves grouped by a brace on the left. The first system has a treble clef on the top staff and a common time signature 'C'. The first measure of the top staff contains a whole note 'C'. The second measure is part of a first ending bracket labeled '1.' above it, containing a whole note 'C'. The third measure is part of a second ending bracket labeled '2.' above it, containing a whole note 'C'. The second system is identical to the first. Both systems end with a double bar line and repeat dots.

Editorial annotations

See also Sezione “Editorial annotations” in *Guida alla Notazione*.

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' ' {
  c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: point-and-click is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```
#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (let* ((x-ext (ly:stencil-extent stil X))
                 (y-ext (ly:stencil-extent stil Y))
                 (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
                 (new-stil
                  (ly:stencil-add
                   (ly:make-stencil url-expr x-ext y-ext)
                   stil)))
            (ly:grob-set-property! grob 'stencil new-stil))))))
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in

modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
music = \relative c' {
  \repeat volta 3 {
    c4 d e f |
    \alternative {
      \volta 1 { c4 d e f | c2 d \break }
      \volta 2 { f4 g a b | f4 g a b | f2 a | \break }
      \volta 3 { c4 d e f | c2 d } } }
  c1 \bar " | ."
}

\markup "default"
{
  \music
}

\markup \typewriter "'numbers"
{
  \set Score.alternativeNumberingStyle = #'numbers
  \music
}

\markup \typewriter "'numbers-with-letters"
{
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \music
}
```

```
\paper { tagline = ##f }
```

default

'numbers

'numbers-with-letters

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```
\paper { tagline = ##f }

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup |
  c''-\tweak HorizontalBracketText.text
    \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
  d'' e'' f'' | \break
  g'' a'' b'' c'''\stopGroup
}
```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono permesse espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzonieri americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

```

fragment = {
  \key c \major
  c2 d
  e2 f
  g2 a
  b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }

  \break

  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

    \fragment
  }
}

```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e } _\markup { A big c }
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
}
```

```
c4( d e c)
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

%Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))

%Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
      (cdr color))))

#(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4

  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}
```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `##f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione `2/3` si aggiusta la posizione orizzontale.

```
\relative c' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
  }
}
```

```

\once \hideNotes
cis8\turn \noBeam
}
d4.( e8)
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 20)

```

```

\score {

               (lambda (g)
                 (ly:grob-set-property! g 'font-size (cdr font-size-pair)))
               (cdr siblings))))))
    #})
```

```
\paper { tagline = ##f }
```

```

\layout {
  \context {
    \Staff
    \InstrumentNameFontSize #'(6 . -3)
  }
}

\new StaffGroup <<
  \new Staff
    \with {
      instrumentName = "Flute"
      shortInstrumentName = "Fl."
    }
    { c''1 \break c'' \break c'' }
  \new Staff
    \with {
      instrumentName = "Violin"
      shortInstrumentName = "Vl."
    }
    { c''1 \break c'' \break c'' }
>>

```

The image displays three musical staves, each with a brace grouping two staves. The first staff is labeled 'Flute' and 'Violin'. The second staff is labeled 'Fl.' and 'Vl.' with a '2' above the first staff. The third staff is labeled 'Fl.' and 'Vl.' with a '3' above the first staff. Each staff contains a single note on a five-line staff.

Drawing boxes around grobs

The print-function can be overridden to draw a box around an arbitrary grob.

```

\relative c'' {
  \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c'4~"foo"

  \override Stem.stencil =

```

```

    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
\override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
b8

\revert Stem.stencil
\revert Flag.stencil
c4. c4
\mark \default
c1
}

```

Drawing circles around note heads

Here is how to circle a note.

```

circle =
\once \override NoteHead.stencil = #(lambda (grob)
  (let* ((note (ly:note-head::print grob))
        (combo-stencil (ly:stencil-add
                          note
                          (circle-stencil note 0.1 0.8))))
    (ly:make-stencil (ly:stencil-expr combo-stencil)
      (ly:stencil-extent note X)
      (ly:stencil-extent note Y))))
{ \circle c' ' }

```

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```

\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d~\markup {
    \override #'(thickness . 3) {
      \circle \finger 2
    }
  }
}

```

```
\override Score.BarNumber.break-visibility = #all-visible
\override Score.BarNumber.stencil =
  #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

```
\relative c'' {

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second staff invisible, and make the lines shorter like in this snippet.

```

\score {
  \new ChoirStaff {
    \relative c'' <<
    \new Staff {
      \time 12/8
      \stemUp
      c4. d8 e8 f g4 f8 e8. d16 c8
    }
    \new Staff {
      % hides staff and notes so that only the grid lines are visible
      \hideNotes
      \hide Staff.BarLine
      \override Staff.StaffSymbol.line-count = #0
      \hide Staff.TimeSignature
      \hide Staff.Clef

      % dummy notes to force regular note spacing
      \once \override Score.GridLine.thickness = #4.0
    }
  }
}

```

```

      c8 c c
      \once \override Score.GridLine.thickness = #3.0
      c8 c c
      \once \override Score.GridLine.thickness = #4.0
      c8 c c
      \once \override Score.GridLine.thickness = #3.0
      c8 c c
    }
  >>
}
\layout {
  \context {
    \Score
    \consists "Grid_line_span_engraver"
    % center grid lines horizontally below note heads
    \override NoteColumn.X-offset = #-0.5
  }
  \context {
    \Staff
    \consists "Grid_point_engraver"
    gridInterval = #1/8
    % set line length and positioning:
    % two staff spaces above center line on hidden staff
    % to four spaces below center line on visible staff
    \override GridPoint.Y-extent = #'(2 . -4)
  }
  ragged-right = ##t
}
}

```

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un “doppio arco” impostando la proprietà `doubleSlurs` su `#t`.

```
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}
```

Martellato e strappato usando le voci

L'arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spesso una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizionarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
```

```

\override Stem.stencil =
  #(lambda (grob)
    (let* ((x-parent (ly:grob-parent grob X))
      (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
        empty-stencil
        (ly:stencil-combine-at-edge
          (ly:stem::print grob)
          Y
          (- (ly:grob-property grob 'direction))
          (grob-interpret-markup grob
            (markup #:center-align #:fontsize -4
              #:musicglyph "noteheads.s2cross")))
          -2.3))))))
}

speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
}

\score {
  \new Staff {
    \relative c'' {
      a4 b a c
      \speakOn
      g4 f r g
      b4 r d e
      \speakOff
      c4 a g f
    }
  }
}

```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```

<<
\context Voice = "foo" {
  \clef bass
  c4 r g r
  c4 r g r
  c4 r g r
  c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t

```

```

\hide PercentRepeat
\override PercentRepeatCounter.staff-padding = #1
\repeat percent 4 { s1 }
}
>>

```

Measure spanner

Measure spanners are an alternate way to print annotated brackets. As opposed to horizontal brackets, they extend between two bar lines rather than two notes. The text is displayed in the center of the bracket.

```

\paper { tagline = ##f }

\layout {
  \context {
    \Staff
    \consists Measure_spanner_engraver
  }
}

<<
\new Staff \relative c'' {
  \key d \minor
  R1*2
  \tweak text "Answer"
  \startMeasureSpanner
  \tuplet 3/2 8 {
    a16[ b c] d[ c b] c[ d e] f[ e d]
  }
  e8 a gis g
  fis f e d~ d c b e
  \stopMeasureSpanner
}
\new Staff \relative c' {
  \key d \minor
  \tweak text "Subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  \tuplet 3/2 8 {
    d16[ e f] g[ f e] f[ g a] bes[ a g]
  }
  a8 d cis c
  b bes a g~ g f e a
  \stopMeasureSpanner
  \tweak text "Counter-subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  f8 e a r r16 b, c d e fis g e
  a gis a b c fis, b a gis e a4 g8
}

```

```

\stopMeasureSpanner
}
>>

```

The image shows a musical score snippet with three staves. The top staff is empty. The middle staff is labeled "Subject" and contains a melodic line with triplets. The bottom staff is labeled "Counter-subject" and contains a counter-melodic line with triplets. The word "Answer" is written above the middle staff.

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {

```

```

    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}

```

```
\paper { tagline = ##f }
```

Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to be positioned more precisely the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 d-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>4
  \set fingeringOrientations = #'(down)
  <c-1 d-2 a'-5>4
  <c-\tweak extra-offset #'(0 . -1.1)-1
    d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>4
  \set fingeringOrientations = #'(up)
  <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
    a'-\tweak extra-offset #'(0 . 1)-5>4
  <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
    a'-\tweak extra-offset #'(0 . 1.4)-5>4
}

```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f' _\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
}
```

```

\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

%% Updaters remark:
%% For unknown reasons this snippet returns a gs-error, but only, if compiled
%% with multiple others like: lilypond *.ly
%% Thus changing to a path-stencil.
%% TODO description needs to get adjusted --harm

```

```

parallelogram =
  #(\ly:make-stencil
    '(path 0.1
      (rmoveto 0 0.25
        lineto 1.3125 0.75
        lineto 1.3125 -0.25
        lineto 0 -0.75)
      round
      round
      #t)
    (cons 0 1.3125)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

```

```

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Uso della proprietà whiteout

Qualsiasi oggetto grafico può essere posizionato sopra uno sfondo bianco per mascherare parti degli oggetti che si trovano sotto. Ciò può essere utile per migliorare l'aspetto delle collisioni in situazioni complesse in cui il riposizionamento degli oggetti è troppo difficile. Bisogna impostare

esplicitamente la proprietà `layer` (livello) per controllare quali oggetti debbano essere mascherati dallo sfondo bianco.

In questo esempio la collisione della legatura di valore con l'indicazione di tempo viene migliorata mascherando la parte della legatura che incrocia l'indicazione di tempo impostando la proprietà `whiteout` di `TimeSignature`. Per farlo si sposta `TimeSignature` su un livello superiore a `Tie`, che viene lasciato al livello predefinito 1; e `StaffSymbol` viene spostato su un livello superiore a `TimeSignature` in modo che non venga mascherato.

```
{
  \override Score.StaffSymbol.layer = 4
  \override Staff.TimeSignature.layer = 3
  b'2 b'~
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}
```

Text

[OBSOLETE] Adding a QR code

This snippet lets you draw a QR-code, for example to provide a link to the composer’s, or the music editor’s website.

Actually encoding the URL into a QR-code is not done here (this just draws the QR-code from a grid of "black" or "white" values), but see the code for a short Python snippet you can use to avoid having to fill for each small square if it’s black or white.

This snippet is obsolete starting from LilyPond 2.25.3, which adds a `\qr-code markup` command that takes a URL directly instead of a grid of "black" and "white" values. It is used like `\markup \qr-code #10 "https://lilypond.org"`.

%% Original thread: <https://lists.gnu.org/archive/html/lilypond-user-fr/2022-07/msg00005.html>

%% (snippet author: Jean Abou Samra <jean@abou-samra.fr>)

Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
```

```
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }
```

```
low = { c4 r4 c8 r8 g,8 b, }
```

```
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\\ \low \\\ \pulse >>

```

```

}
\layout {
  \context {
    \TabStaff
    \clef moderntab
    \revert TextScript.stencil
    \override TextScript.font-series = #'bold
    \override TextScript.font-size = #-2
    \override TextScript.color = #red
  }
  \context {
    \Score
    proportionalNotationDuration = #1/8
  }
}

```

	1 & 2 & 3 & 4 &	1 & 2 & 3 & 4 &
T	1-1	1-1
A	0-0	0-0
B	3 3 2	3 3 2

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }
```

```
% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))
```

```
% use it in the title block:
```

```
\header {
  title = "Including the date!"
  subtitle = \date
}
```

```
\score {
  \relative c'' {
    c4 c c c
  }
}
```

```
% and use it in a \markup block:
```

```
\markup {
  \date
}
```

Including the date!

27-09-2025

27-09-2025

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
    }
  >>
}
```

```

    }
    shortInstrumentName = "Left"

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
  <<
    \new Staff {
      \relative c''
      \new Voice = "vocal" {
        c d~\markup default d e
        c d~\markup "right aligned" d e
        c d~\markup "center aligned" d e
        c d~\markup "reset to default" d e
      }
    }
    \new Lyrics \lyricsto "vocal" {
      word word word
      \set lyricMelismaAlignment = #RIGHT
      word word word
      \set lyricMelismaAlignment = #CENTER
      word word word
      \unset lyricMelismaAlignment
      word word word
    }
  >>
}
```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}
```

```
\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
```

```
c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
\paper { tagline = ##f }

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to 8va or 8vb) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief `ottava` is used.

```

{
  c'2
  \ottava 1
  \set Staff.ottavation = "8"
  c''2
}

```

```

\ottava 0
c'1
\ottava 1
\set Staff.ottavation = "Text"
c''1
}

```

Changing the default text font family

The default font families for text can be overridden.

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```

piuF = \markup { \italic più \dynamic f }

```

```

\layout { ragged-right = ##f }

```

```

\relative c'' {
  c2\f c-\piuF
}

```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come “solo” e “a2” sono aggiunte automaticamente; per toglierle basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c’è bisogno di aggiungere i testi “solo/a2”, quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c’è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

```

musicUp = \relative c'' {
  \time 4/4

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
\pad-x #0.2 #(ly:music-property dyn 'text)
\normal-text \italic \fontsize #2 )
    }
    #})))
```

```
\relative c' ' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }
```

```
\relative c' ' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
```

```
\override TextSpanner.style = #'line
\once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
a4 \startTextSpan
b4 c
a4 \stopTextSpan
```

```
\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
  \markup { \draw-line #'(0 . 1) }
\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2
```

```
a4 \startTextSpan
b4 c
a4 \stopTextSpan
```

```
\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
```

```

\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Demonstrating all headers

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

```

\relative c'' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke " }

  b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
  s2
  a'1
}

```

Formattazione delle sillabe del testo vocale

La modalità markup può essere usata per formattare le singole sillabe del testo vocale.

```

mel = \relative c'' { c4 c c c c1 }
lyr = \lyricmode {
  Your lyrics \markup { \italic can } \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}

```

```

<<
  \new Voice = melody \mel
  \new Lyrics \lyricsto melody \lyr
>>

```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}

wa o a
```

Allineamento del testo vocale

L'allineamento orizzontale del testo vocale si imposta attraverso la proprietà `self-alignment-X` dell'oggetto `LyricText`. #-1 è sinistra, #0 è centro e #1 è destra; si possono usare anche `#LEFT`, `#CENTER` e `#RIGHT`.

```
\layout { ragged-right = ##f }

\relative c' ' {
  c1
  c1
  c1
}

\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "This is left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "This is centered"
  \once \override LyricText.self-alignment-X = 1
  "This is right-aligned"
}
```

Markup list

Text that can spread over pages is entered with the `\markuplist` command.

%% updated/modified by P.P.Schneider on Feb. 2014

```
\paper { tagline = ##f }

#(set-default-paper-size "a6")

#(define-markup-list-command (paragraph layout props args) (markup-list?)

Il y avait en Westphalie, dans le château de M. le baron de Thunder-ten-tronckh, un jeune garçon à qui la nature avait donné les mœurs les plus douces. Sa physionomie annonçait son âme. Il avait le jugement assez droit, avec l'esprit le plus simple ; c'est, je crois, pour cette raison qu'on le nommait Candide. Les anciens domestiques de la maison soupçonnaient qu'il était fils de la sœur de monsieur le baron et d'un bon et honnête

gentilhomme du voisinage, que cette demoiselle ne voulut jamais épouser parce qu'il n'avait pu prouver que soixante et onze quartiers, et que le reste de son arbre généalogique avait été perdu par l'injure du temps.

Monsieur le baron était un des plus puissants seigneurs de la Westphalie, car son château avait une porte et des fenêtres. Sa grande salle même était ornée d'une tapisserie. Tous les chiens de ses basses-cours composaient une meute dans le besoin; ses palefreniers étaient ses piqueurs; le vicaire du village était son grand-aumônier. Ils l'appelaient tous monseigneur, et ils riaient quand il faisait des contes.

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```
\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_\markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^\markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}
```

The musical notation consists of three measures on a single staff. The first measure contains a whole rest, with the label '[MAJOR GENERAL]' above it and the number '19' below it. The second measure also contains a whole rest, with the label 'A' above it and the number '30' below it. Below the staff in the second measure, the text 'Cue: ... it is yours' is written. The third measure contains three eighth notes: 'd', 'f', and 'c', with the label 'CHORUS' above them.

Of the ubiquity of markup objects

Text objects are entered either as simple strings between double quotes or as `\markup` blocks that can accept a variety of advanced text formatting and graphical enhancements.

As such, markup blocks may be used:

- in any `TextScript` object (attached to notes with `-`, `^` or `_`),
- any `TextMark` introduced with the `\textMark` keyword, or `\textEndMark` command, or other similar objects such as `MetronomeMark` introduced with `\tempo`,
- as standalone markup blocks, entered at the top level outside of any `\score` block,
- in any definition inside the `\header` block (e.g. title, subtitle, composer) or in some variables defined inside the `\paper` block such as `evenHeaderMarkup` for page numbers.

`\markup` may additionally be used for lyrics, in chord names, and as dynamics. In fact, it is possible to use `\markup` to customize the appearance of virtually any object, as demonstrated in this example using various methods.

    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}

```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }
>>

```

Testo separato su due colonne

Il testo separato può essere disposto su varie colonne con i comandi di `\markup`:

```
\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { 0 sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column \italic {
      \line { 0 sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    }
  }
  \hspace #1
}
```

O sacrum convivium
in quo Christus sumitur,
recolitur memoria passionis ejus,
mens impletur gratia,
futurae gloriae nobis pignus datur.
Amen.

*O sacred feast
in which Christ is received,
the memory of His Passion is renewed,
the mind is filled with grace,
and a pledge of future glory is given to us.
Amen.*

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  \define-music-function (StringNumber) (string?)
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
      \markup { \circle \number $StringNumber }
  #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
```

```

\textSpannerDown
a8\startTextSpan
b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil
                  (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}

```

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding, and using a Pango based backend. Depending on the fonts installed, this fragment will render Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { \volta-number { 1. 2. 3... } \italic { ad lib. } }

\relative c' ' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Vocal music

See also Sezione “Vocal music” in *Guida alla Notazione*.

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = 2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding indicators to staves which get split after a break

This snippet defines the commands `\splitStaffBarLine`, `\convUpStaffBarLine`, and `\convDownStaffBarLine`. These add arrows at a bar line to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)

```

Three musical staves showing vocal parts (Soprano, Alto, Tenor, Bass) and piano accompaniment. The first staff shows a four-measure vocal line with notes a, b, c, d. The second staff shows a four-measure vocal line with notes e, f, g, h. The third staff shows a four-measure vocal line with notes i, j, k, l. The piano accompaniment is shown in the bass clef.

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per semplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi o `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

cueWhile =

```
#(define-music-function
  (instrument name dir music)

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>
```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
  <<
```

```

\new Staff {
  \relative c''
  \new Voice = "vocal" {
    c d~\markup default d e
    c d~\markup "right aligned" d e
    c d~\markup "center aligned" d e
    c d~\markup "reset to default" d e
  }
}
\new Lyrics \lyricsto "vocal" {
  word word word
  \set lyricMelismaAlignment = #RIGHT
  word word word
  \set lyricMelismaAlignment = #CENTER
  word word word
  \unset lyricMelismaAlignment
  word word word
}
>>
}

```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4

  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}

```

>>

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
chant = \relative c' {

O come let us **sing** | unto • the | Lord : let
us heartily re**joice** in the | strength of | our
sal | vation.

8. Today if ye will hear his voice *
harden ' not your ' hearts : as in the pro-
vocation * and as in the **day** of tempt- '
-ation ' in the ' wilderness.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```
\header { tagline = ##f }

\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup
      .nonstaff-nonstaff-spacing
      .minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...

    \voiceOne
    s2 a'8^\aliceSings a' b'4 |
```

```

\oneVoice
g'1
}
\new Voice = "eve" {
s1 |
a'2^\eveSings g' |
s1 |
a'2^\eveSings g'
% ...

\voiceTwo
f'4^\eveSings a'8 g' f'4 e' |
\oneVoice
s1
}
>>
\new Lyrics \lyricsto "alice" {
may -- be
sec -- ond
% ...
Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
that the
words are
% ...
...and then I was like--
}
>>

```

The musical score is written on four staves. The first staff contains the lyrics 'may - be' and 'that the' with notes for Alice and Eve. The second staff contains 'sec - ond' and 'words are' with notes for Alice and Eve. The third staff contains '...and then I' and 'Shut up, you like--' with notes for Eve and Alice. The fourth staff contains 'fool!' with a note for Alice.

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

```

%{
You may have to install additional fonts.

```

Red Hat Fedora

dejavu-fonts-all

Debian GNU/Linux, Ubuntu

```

    fonts-dejavu-core
    fonts-dejavu-extra
%}

\relative c' ' {
  \time 3/4
  g2 e4
  a2 f4
  g2.
}
\addlyrics {
  \set stanza = #"1. "
  Hi, my name is Bert.
}
\addlyrics {
  \override StanzaNumber.fonts.serif = "DejaVu Sans"
  \set stanza = #"2. "
  \override LyricText.font-family = #'typewriter
  Oh, ché -- ri, je t'aime
}

```

1. Hi, my name is Bert.
2. Oh, ché-ri, je t'aime

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```

stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn

    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \fine
  }
}

```

Forcing hyphens to be shown

If LilyPond does not think there is space for a hyphen, it will be omitted. The behaviour can be overridden with the minimum-distance property of `LyricHyphen`.

```
\relative c'' {
  c32 c c c
  c32 c c c
  c32 c c c
  c32 c c c
}
\addlyrics {
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #1.0
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #2.0
  syl -- lab word word
  \revert LyricHyphen.minimum-distance
  syl -- lab word word
}
```

Formattazione delle sillabe del testo vocale

La modalità markup può essere usata per formattare le singole sillabe del testo vocale.

```
mel = \relative c'' { c4 c c c c1 }
lyr = \lyricmode {
  Your lyrics \markup { \italic can } \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}
```

```
<<
  \new Voice = melody \mel
  \new Lyrics \lyricsto melody \lyr
>>
```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
  wa~o~a
}

wa o a
```

Modello per inno

Il codice seguente presenta un modo di impostare un inno in cui ogni verso inizia e finisce con una misura parziale. Mostra anche come aggiungere delle strofe come testo separato sotto la musica.

```

  \once \override LyricText.self-alignment-X = 1
  "This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
  \override Stem.stencil =
```

```

#(lambda (grob)
  (let* ((x-parent (ly:grob-parent grob X))
        (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
    (if is-rest?
        empty-stencil
        (ly:stencil-combine-at-edge
         (ly:stem::print grob)
         Y
         (- (ly:grob-property grob 'direction))
         (grob-interpret-markup grob
                                (markup #:center-align #:fontsize -4
                                           #:musicglyph "noteheads.s2cross"))
         -2.3))))
}

speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
}

\score {
  \new Staff {
    \relative c' {
      a4 b a c
      \speakOn

    }
  }
}

```

Ottenere la spaziatura del testo della vecchia versione 2.12

Il motore di spaziatura verticale è cambiato a partire dalla versione 2.14. Ciò può far sì che il testo vocale abbia un posizionamento diverso.

È possibile impostare delle proprietà dei contesti `Lyric` e `Staff` che facciano sì che il motore di spaziatura si comporti come nella versione 2.12.

Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|"
}

\score {
  <<
    \context ChordNames { \theChords }
    \context FretBoards { \theChords }
    \new Staff {

```

```

\context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
  \lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
  \lyricsto "voiceMelody" \verseII
}
}
>>
\layout { }
\midi { }
}

```

1. This is the first verse
2. This is the second verse.

Modello di rigo singolo con note e testo

Questo piccolo modello presenta una semplice linea melodica con un testo. Copialo e incollalo, aggiungi le note e le parole. Questo esempio disabilita la disposizione automatica delle travature, come è consuetudine per le parti vocali. Per usare la disposizione automatica delle travature, cambia o commenta la relativa linea di codice.

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
    \new Voice = "one" {
      \autoBeamOff
      \melody
    }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}

```

Skips in lyric mode

The `s` syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
  \relative c'' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

Skips in lyric mode (2)

Although `s` skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores (_) are available.

So for example:

```
<<
  \relative c'' { a4 b c d }
  \new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gambi che forniscano questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"
```

```
\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper"
      <<
        { \voiceOne \arpeggioBracket
          a2( b2
            <b d>1\arpeggio)
            <cs e>\arpeggio ~
            <cs e>4
          }
        }
      }
    }
}
```

```

\addlyrics { \lyricmode { A -- men. } }
>>
\new Voice = "lower"
{ \voiceTwo
  a1 ~
  a
  a ~
  a4 \bar "|"
}
>>
}
\layout { ragged-right = ##t }
}

```

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare “pause d'intero” (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata *trascrizione*.

```

menrest = #(define-music-function (note) (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  })

Be = \tag #'mod
  #(begin
    (ly:expect-warning (G_ "stem does not fit in beam"))
    (ly:expect-warning (G_ "beam was started here"))
    (make-span-event 'BeamEvent START))

Am = \tag #'mod ]

MenStyle = {
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
  \omit Slur
  \omit Beam
}

finalis = \section

Music = \relative c'' {

}

```

Vertically aligning stanza numbers of different staves

It can happen that stanza numbers don't align vertically if the verses are attached to different staves. To fix that, override the `self-alignment-X` property of the `LyricText` grob.

```

\markup { default behavior }

<<
  \new Staff { b b b b }
  \lyrics {
    \set stanza = "3."
    a a a a
  }

  \new Staff { b b b b }
  \lyrics {
    \set stanza = "1."
    aaaaaaaaaa a a a
  }
  \lyrics {
    \set stanza = "2."
    a a a a
  }
>>

\markup \vspace #1
\markup {
  using \typewriter "self-alignment-X = #LEFT" }

<<
  \new Staff { b b b b }

```

```

\new Lyrics \lyricmode {
  \set stanza = "3."
  a a a a
}

\new Staff { b b b b }
\new Lyrics \lyricmode {
  \set stanza = "1."
  \once \override LyricText.self-alignment-X = #LEFT
  aaaaaaaaaa a a a
}
\new Lyrics \lyricmode {
  \set stanza = "2."
  a a a a
}
>>

```

```
\paper { tagline = ##f }
```

default behavior

using self-alignment-X = #LEFT

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```

dropLyrics = {
  \override LyricText.extra-offset = #'(0 . -4.5)
  \override LyricHyphen.extra-offset = #'(0 . -4.5)
  \override LyricExtender.extra-offset = #'(0 . -4.5)
}

```

```

\override StanzaNumber.extra-offset = #'(0 . -4.5)
}

raiseLyrics = {
  \revert LyricText.extra-offset
  \revert LyricHyphen.extra-offset
  \revert LyricExtender.extra-offset
  \revert StanzaNumber.extra-offset
}

skipFour = \repeat unfold 4 { \skip 8 }

lyricsA = \lyricmode {
  The first verse has
  \dropLyrics
  \set stanza = #"  All:"
  the com -- mon __ words
  \raiseLyrics
  used in all four.
}

lyricsB = \lyricmode { In stan -- za two,   \skipFour al -- so ap -- pear. }

lyricsC = \lyricmode { By the third verse, \skipFour are get -- ting dull. }

lyricsD = \lyricmode { Last stan -- za, and \skipFour get used once more. }

melody = \relative c' {
  c4 d e f |
  g f e8( e f) d |
  c4 e d c |
}

\score {
  <<

```

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

```
\paper {

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga

fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

```

}

```

Chords

See also Sezione “Chord notation” in *Guida alla Notazione*.

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+>4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

```

Aggiungere stanghette al contesto ChordNames

Per mostrare le stanghette nel contesto `ChordNames`, aggiungere l’incisore `Bar_engraver`.

```

\new ChordNames \with {
  \override BarLine.bar-extent = #'(-2 . 2)
  \consists "Bar_engraver"
}

\chordmode {
  f1:maj7 f:7 bes:7
}

```

Adjusting figured bass alteration glyphs

In figured bass, specially designed glyphs for 6\\, 7\\, and 9\\ are used by default. Similarly, specially designed glyphs for symbols 2\\+, 4\\+, and 5\\+ are used by default if plus signs appear after the number.

To change that, pass an alist to `figuredBassPlusStrokedAlist` and set the glyph in question to `#f` (or omit it).

```
\figures {
  \set figuredBassPlusDirection = #RIGHT
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r

  \set figuredBassPlusStrokedAlist =
    #'((2 . "figbass.twoplus")
      ;; (4 . "figbass.fourplus")
      ;; (5 . "figbass.fiveplus")
      (6 . "figbass.sixstroked")
      ;; (7 . "figbass.sevenstroked")
      ;; (9 . "figbass.ninestroked")
    )
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r
}
```

6 7 9 2 4 5⁺ 6 7 9 2 4 5⁺

Modifica del separatore dell'accordo

L'elemento che separa le diverse parti di un accordo può essere impostato su qualsiasi testo di tipo markup.

```
\chords {
  c:7sus4
  \set chordNameSeparator
    = \markup { \typewriter | }
  c:7sus4
}
```

C⁷ sus4 C⁷|sus4

Changing the chord names to German or semi-German notation

The english naming of chords (default) can be changed to german (`\germanChords` replaces B and Bes with H and B) or semi-german (`\semiGermanChords` replaces B and Bes with H and Bb).

```
scm = \chordmode {
  c1/c | cis/cis
  b1/b | bis/bis | bes/bes
}
```

```
\layout {
```

```

    ragged-right = ##t
    \context {
      \ChordNames
      \consists "Instrument_name_engraver"
    }
  }

<<
  \new ChordNames {
    \set instrumentName = #"default"
    \scm
  }
  \new ChordNames {
    \set instrumentName = #"german"
    \germanChords \scm
  }
  \new ChordNames {
    \set instrumentName = #"semi-german"
    \semiGermanChords \scm
  }
  \new ChordNames {
    \set instrumentName = #"italian"
    \italianChords \scm
  }
  \new ChordNames {
    \set instrumentName = #"french"
    \frenchChords \scm
  }
  \context Voice { \scm }
>>

```

default	C/C	C#/C#	B/B	B#/B#	Bb/Bb

Nome dell'accordo di settima maggiore

La formattazione dell'accordo di settima maggiore può essere regolata con la proprietà `majorSevenSymbol`.

```

\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}

```

$$C^{\Delta} C^{i7}$$

Chord names alternative

Chord names are generated from a list of pitches. The functions which construct these names can be customised.

Here are shown chords following Ignatzek (pp. 17-18, 1995), used by default since LilyPond 1.7.20, compared with an alternative Jazz chord notation and Harald Banter's (1987) notation. A smaller font is used in the latter case, as these tend to be overly verbose.

This mirrors the mechanism originally used in early LilyPond versions (pre-1.7); not having been properly maintained, however, some features have been lost (mainly chord exception lists) and bugs have been introduced.

```
%%% Legacy chord naming functions (formerly in scm/chord-generic-names.scm)
%%% Copyright (C) 2003--2023 Jan Nieuwenhuizen <janneke@gnu.org>
```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

```
% The code below will print two warnings, which may be omitted by uncommenting:
%#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
```

```

<c' bes'>
<c'\2 bes'>
\set maximumFretStretch = 5
<c' bes'>
<c'\2 bes'\1>
}

```

```

<<
\new FretBoards \mus
\new TabVoice \mus
>>

```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```

fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

```

```

<<
\new Staff \fragment
\new Staff \makeClusters \fragment
>>

```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi <> anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
}

```

```

<c-1 e-3 a-5>4
\set fingeringOrientations = #'(up)
<c-1 e-3 a-5>4
\set fingeringOrientations = #'(left)
<c-1>2
\set fingeringOrientations = #'(down)
<e-3>2
\set stringNumberOrientations = #'(up left down)
<f\3 a\2 c\1>1
\set strokeFingerOrientations = #'(down right up)
<c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}

```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```

\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
      { r4
        \override Stem.cross-staff = ##t
        \override Stem.length = #19 % this is in half-spaces,
          % so it makes stems 9.5 staffspaces long
        \override Stem.Y-offset = #-6 % stems are normally lengthened
          % upwards, so here we must lower the stem by the amount
          % equal to the lengthening - in this case (19 - 7) / 2
          % (7 is default stem length)
        e e e }
      { s4
        \change Staff = "bottom"
        \override NoteColumn.ignore-collision = ##t
        c, c c
      }
    >>
  }
>>
}
\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a

```

```
}
>>
```

Customizing the chord grid style

Custom divisions of chord squares can be defined through the `measure-division-lines-alist` and `measure-division-chord-placement-alist` properties of `ChordSquare`. These are both alists. Their keys are measure divisions, namely lists which give the fraction of the measure that each chord (or rest, or skip) represents. More precisely, a measure division alist is made of positive, exact numbers adding up to 1, for example: '(1/2 1/4 1/4). The exactness requirement means that, e.g., 1/2 is valid but not 0.5.

The values in `measure-division-lines-alist` are lists of lines, which are represented as $(x1\ y1\ x2\ y2)$. The line starts at the point $(x1\ .\ y1)$ and ends at $(x2\ .\ y2)$. Coordinates are expressed in the $[-1, 1]$ scale relative to the extent of the square.

The values in `measure-division-chord-placement-alist` are lists of $(x\ .\ y)$ pairs giving the placement of the respective chords.

This example defines a peculiar chord grid style that has a rule for measures divided in three equal parts.

```
\paper {
  line-width = 10\cm
  ragged-right = ##f
}

\new ChordGrid \with {
  \override ChordSquare.measure-division-lines-alist =
    #'(((1) . ()))
    ((1/3 1/3 1/3) . ((-1 -0.4 0 1) (0 -1 1 0.4)))
  \override ChordSquare.measure-division-chord-placement-alist =
    #'(((1) . ((0 . 0)))
    ((1/3 1/3 1/3) . ((-0.7 . 0.5) (0 . 0) (0.7 . -0.5))))
}

\chordmode {
  \time 3/4
  c2.
  c4 c4 c4
}
```

Customizing the no-chord symbol

By default, rests in a ChordNames context cause the “N.C.” symbol to be printed. This markup can be customized.

```
<<
\chords {
  R1
  \set noChordSymbol = "----"
  R1
  \set noChordSymbol = \markup \italic "Ssh!"
  R1
}
{
  R1*3
}
>>
```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
  \once \override Stem.length = #11
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}
```

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case lilypond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier `\!` to a number, which breaks any extender attributed to that number right before the number.

```
bassfigures = \figuremode {
```

```

\set useBassFigureExtenders = ##t
<6 4>4 <6 4\!> <6 4\!> <6 4\!> | <6\! 4\!> <6 4> <6 4\!> <6 4>
}

<<
\new Staff \relative c'' { c1 c1 }
\new FiguredBass \bassfigures
>>

```

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

```

#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "For sequential @code{ChordNames} with same root, but different bass, the root
    markup is dropped: D D/C D/B -> D /C /B
    The behaviour may be controlled by setting the @code{chordChanges}
    context-property."

}

```

The image displays a musical score template. At the top, three fretboard diagrams are shown for chords C, G, and C. Each diagram is a six-string guitar fretboard with notes indicated by dots. Above the first and third diagrams is the letter 'C', and above the middle diagram is the letter 'G'. To the right of each diagram is a fret number: '3fr' for the first and third, and '0fr' for the middle. Below the diagrams is a single staff of music in treble clef, C major, 4/4 time. The melody consists of the notes C4, D4, E4, F4, and G4, each held for one measure. Below the staff, the lyrics are listed: '1. This is the first verse' and '2. This is the second verse.'

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see ‘Discant symbols’ in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with `\markup` can be tweaked by changing the `\translate-scaled` arguments. `\translate-scaled` is used here rather than `\translate` in order to let the positioning of the symbol parts adapt to changes of font-size.

```
discant = \markup {
  \musicglyph "accordion.discant"
}
dot = \markup {
  \musicglyph "accordion.dot"
}

\layout { ragged-right = ##t }

% 16 voets register

Simboli di registro della fisarmonica

I simboli di registro della fisarmonica sono disponibili sia come `\markup` sia come eventi musicali autonomi (perché i cambi di registro capitano solitamente tra reali eventi musicali). I registri bassi non sono troppo standardizzati. I comandi disponibili si trovano nella sezione «Registri della fisarmonica» della Guida alla notazione.

```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
    { r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 % this is in half-spaces,
        % so it makes stems 9.5 staffspaces long
      \override Stem.Y-offset = #-6 % stems are normally lengthened
        % upwards, so here we must lower the stem by the amount
        % equal to the lengthening - in this case (19 - 7) / 2
        % (7 is default stem length)
      e e e }
    { s4
      \change Staff = "bottom"
      \override NoteColumn.ignore-collision = ##t
```

```

        c, c c
      }
    >>
  }
  \new Staff = bottom
  \relative c' {
    \clef bass
    \voiceOne
    g8 a g a g a g a
  }
>>

```

Tremoli attraverso i righi

Dato che `\repeat tremolo` si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando `\change Staff`.

```

\new PianoStaff <<
  \new Staff = "up" \relative c'' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c'' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
}
>>

```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper { ragged-right = ##f }

\relative c' {
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
  c2\sostenutoOn c
  c2\sostenutoOff c
}
```

Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio

Una parentesi quadrata dell'arpeggio può indicare che delle note su due righe diversi devono essere suonate con la stessa mano. Per farlo, bisogna far sì che PianoStaff accetti gli arpeggi trasversali ai righe e gli arpeggi siano impostati nella forma della parentesi quadrata nel contesto PianoStaff.

(Debussy, *Les collines d'Anacapri*, m. 65)

```
\new PianoStaff <<
  \set PianoStaff.connectArpeggios = ##t
  \override PianoStaff.Arpeggio.stencil =
    #ly:arpeggio::brew-chord-bracket
  \new Staff {
    \relative c' {
      \key b \major
      \time 6/8
      b8-.(\arpeggio fis'-.\> cis-.
        e-. gis-. b-.)\!\fermata^\laissezVibrer \bar "||"
    }
  }
  \new Staff {
    \relative c' {
      \clef bass
      \key b \major
      <<
      {
        <a e cis>2.\arpeggio
      }
      \\\
      {
        <a, e a,>2.
      }
    }
  }
}
```

```

    }
  >>
}
}
>>

```

Modello per combo jazz

Ecco un modello piuttosto complesso, per un gruppo jazz. Si noti che tutti gli strumenti sono in `\key c \major`. Si tratta della tonalità reale; sarà trasposta automaticamente includendo la musica all'interno di una sezione `\transpose`.

```

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

Percussion

See also Sezione “Percussion” in *Guida alla Notazione*.

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
    \new DrumStaff \with {
      instrumentName = "timbales"
      drumStyleTable = #timbales-style
      \override StaffSymbol.line-count = #2
      \override BarLine.bar-extent = #'(-1 . 1)
    }
    <<
      \timb
    >>
    \new DrumStaff \with { instrumentName = "drums" }
    <<
      \new DrumVoice { \stemUp \drh }
      \new DrumVoice { \stemDown \drl }
    >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows a musical score for two percussion parts: timbales and drums. The timbales part is on a single staff with a C-clef and a common time signature. It features notes for 'crash' (marked with a cross), 'h.h.' (marked with a plus), and other rhythmic patterns. The drums part is on a single staff with an F-clef and a common time signature. It features notes for 'bd' (bass drum), 'sn' (snare), 'tom' (tom), and 'cb' (conga), with various rhythmic patterns and stems.

Cow and ride bell example

Two different bells, entered with 'cb' (cowbell) and 'rb' (ridebell).

```
\paper { tagline = ##f }

#(define mydrums '((ridebell default #f 3)
                  (cowbell default #f -2)))

\new DrumStaff \with { instrumentName = #"Different Bells" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \set DrumStaff.clefPosition = 0.5
  \override DrumStaff.StaffSymbol.line-positions = #'(-2 3)
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)

  \time 2/4
  rb8 8 cb8 16 rb16-> ~ |
  16 8 16 cb8 8 |
}
```

Heavily customized polymeric time signatures

Though the polymeric time signature shown was not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song!).

```
melody = \relative c'' {

Graphic symbols for percussion instruments are not natively supported; however it is possible to include such symbols, either as an external EPS file or as embedded PostScript code inside a markup, as demonstrated in this example.

```
stick = \markup {

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with block` can be used to add bar numbers to the relevant staff.

```

The image displays a musical score for two instruments: Bass Clarinet (Bassklarinette) and Percussion (Percussion). The score is written in 3/4 time. The top staff, for the Bass Clarinet, features a melodic line with slurs and fingerings (2, 4, 3). The bottom staff, for the Percussion, shows a rhythmic accompaniment with rests and notes.

Fretted strings

See also Sezione “Fretted string instruments” in *Guida alla Notazione*.

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' ' {
  c4-1 d-2 f-4 e-3
}
```

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of `\markup` and `\finger`.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}
threeFour = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 4
  }
}

\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
    e8\4~\one b\2 <g\3 e'\1>~>[ b\2 e\4]
    <a\3 fis'\1>~>~\threeTwo[ b\2 e\4]
  }
}
```

Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
```

```
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }
```

```
low = { c4 r4 c8 r8 g,8 b, }
```

```
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```
\score {
  \new TabStaff {
    \repeat unfold 2 << \high \ \ low \ \ pulse >>
  }

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
```

```

\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}

```

Automatic Fretboards Barre

When automatic fretboards are used, barre indicators will be drawn whenever one finger is responsible for multiple strings.

If no finger indications are given in the chord from which the automatic fretboard is created, no barre indicators will be included, because there is no way to identify where barres should be placed.

```

\new FretBoards {
  <f, -1 c-3 f-4 a-2 c'-1 f'-1>1
  <f, c f a c' f'>1
}

```

Cambiare l'orientamento della tastiera

I diagrammi dei tasti possono essere orientati in tre modi.

```

\include "predefined-guitar-fretboards.ly"

```

Glissando di accordi in intavolatura

I glissati (o slide) di accordi vengono indicati sia nel rigo (contesto Staff) sia nell'intavolatura (contesto TabStaff). I numeri di corda sono necessari per TabStaff, perché i calcoli automatici della corda sono diversi per gli accordi e per le note singole.

```

myMusic = \relative c' {
  <c e g>1 \glissando <f a c>
  <cis, eis gis>1 \glissando <f a c>
  <cis eis gis>1 \glissando <f a c\3>
}

```

```

      \omit StringNumber
      \myMusic
    }
    \new TabStaff \myMusic
  >>
}

```

```

\score {
  <<
    \new Staff {
      \clef "treble_8"
      \omit StringNumber
      \myMusic
    }
    \new TabStaff \with { \override Glissando.style = #'none } {
      \myMusic
    }
  >>
}

```

```

\paper { tagline = ##f }

```

Cambi di accordo nei diagrammi dei tasti

Si può impostare il contesto FretBoards in modo che mostri il diagramma solo quando l'accordo cambia o all'inizio di una nuova linea.

```
\include "predefined-guitar-fretboards.ly"
```

```
\paper { tagline = ##f }
```

```
myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}
```

```
<<
  \new ChordNames { \myChords }
  \new FretBoards { \myChords }
  \new Staff { \myChords }
>>
```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

*%% The code below will print two warnings, which may be omitted by uncommenting:
 %#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))*

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}
```

```
<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
```

```

<c-1>2
\set fingeringOrientations = #'(down)
<e-3>2
\set stringNumberOrientations = #'(up left down)
<f\3 a\2 c\1>1
\set strokeFingerOrientations = #'(down right up)
<c\rightHandFinger 1 e\rightHandFinger 2 c'\rightHandFinger 4 >
}

```

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

Definire diagrammi dei tasti predefiniti per altri strumenti

Si possono aggiungere diagrammi dei tasti predefiniti per nuovi strumenti oltre a quelli standard per chitarra. Questo frammento mostra come farlo definendo una nuova accordatura e alcuni diagrammi predefiniti per il *cuatro* venezuelano.

Mostra anche come includere le diteggiature negli accordi usati come punti di riferimento per la consultazione degli accordi e come mostrarle nel diagramma dei tasti e in TabStaff, ma non nella musica.

Questi diagrammi non sono trasponibili perché contengono informazioni sulle corde. È prevista una correzione in futuro.

```

% add FretBoards for the Cuatro
% Note: This section could be put into a separate file
% predefined-cuatro-fretboards.ly
% and \included into each of your compositions

```

```

cuatroTuning = #`((ly:make-pitch 0 6 0)

}

```

Flamenco notation

For flamenco guitar, special notation is used:

- a *golpe* symbol to indicate a slap on the guitar body with the nail of the ring finger
- an arrow to indicate (the direction of) strokes
- different letters for fingering (“p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger)
- 3- and 4-finger *rasgueados*; stroke upwards with all fingers, ending with an up- and down using the index finger
- *abanicos*: strokes (in tuples) with thumb (down), little and index finger (both up). There’s also an *abanico 2* where middle and ring finger are used instead of the little finger.
- *alza pua*: fast playing with the thumb

Most figures use arrows in combination with fingering; with *abanicos* and *rasgueados*, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as ‘flamenco.ly’ and included in source files.

```

The musical score is divided into two sections: *Abanico* and *Alzapua*. The *Abanico* section consists of four measures, each featuring a descending eighth-note scale (G4, F#4, E4, D4, C4) on the treble clef staff, with a bass clef staff below it. The *Alzapua* section consists of five measures, each featuring a descending eighth-note scale (G4, F#4, E4, D4, C4) on the treble clef staff, with a bass clef staff below it. The score includes a key signature of three sharps (F#, C#, G#) and a common time signature (C). The notation includes various musical symbols such as notes, rests, and dynamic markings (p, m).

Fret diagrams explained and developed

This snippet shows many possibilities for obtaining and tweaking fret diagrams.

```

The image displays musical notation for three systems of chords. Each system consists of a treble clef staff with a whole note chord and five fretboard diagrams. The first system shows two A major chords. The second system shows three C major chords and two D major chords. The third system shows three C major chords and two D major chords. Each fretboard diagram includes fingerings (numbers 1-4) and other markings like 'x' for muted strings or 'M' for barre.

Tabelle alternative per i diagrammi dei tasti

Si possono creare tabelle alternative per i diagrammi dei tasti. Queste possono essere usate per avere diagrammi alternativi per uno stesso accordo.

Per poter usare una tabella alternativa, deve prima essere creata. Quindi si aggiungono i diagrammi alla tabella.

La tabella può essere vuota oppure ricopiata da una tabella esistente.

La tabella da usare nel mostrare i diagrammi predefiniti viene selezionata dalla proprietà `\predefinedDiagramTable`.

```
\include "predefined-guitar-fretboards.ly"
```

```
% Make a blank new fretboard table
```

```
#{define custom-fretboard-table-one
  (make-fretboard-table))

```

The image displays six fretboard diagrams for chords C and D, arranged in two rows of three. The top row shows the 'Default table' for C and D, and the bottom row shows the 'New table' for C and D. The diagrams are labeled with 'C' and 'D' above them. The first diagram (C) has notes on strings 1, 2, and 3, with frets 3, 2, and 1 indicated below. The second diagram (D) has notes on strings 2, 3, and 4, with frets 1, 3, and 2 indicated below. The third diagram (C) has notes on strings 3, 4, and 5, with frets 3, 2, and 1 indicated below. The fourth diagram (D) has notes on strings 4, 5, and 6, with frets 1, 3, and 2 indicated below. The fifth diagram (C) has notes on strings 1, 2, and 3, with frets 3, 2, and 1 indicated below. The sixth diagram (D) has notes on strings 2, 3, and 4, with frets 1, 3, and 2 indicated below. Below the diagrams is a staff with three measures. The first measure is labeled 'Default table' and contains a C chord. The second measure is labeled 'New table from empty' and contains a D chord. The third measure is labeled 'New table from default' and contains a C chord. The staff is in treble clef with a key signature of one sharp (F#).

```

The image shows a musical score for guitar. The top staff is a treble clef with a key signature of one sharp (F#) and a common time signature (C). It contains a series of notes with diamond-shaped flags above them, indicating harmonics. The notes are labeled with fret numbers and techniques: 8, AH 16, AH 17, AH 19, PH (pizzicato harmonics), TH 17, TH 19, TH 17, and TCH (tapped harmonics). Below the staff is a tablature section with three staves labeled T, A, and B. The T staff shows fret numbers (4), (7), and (5). The A staff shows fret numbers (5), (7), (5), (7), (5), and (9). The B staff shows fret numbers (7) and (5). The tablature is divided into measures by vertical lines.

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

```

%% Hide fret number: useful to draw slide into/from a casual point of
%% the fretboard.

```

```

hideFretNumber = {
  \once \hide TabNoteHead
  \once \hide NoteHead
  \once \hide Stem
  \once \override NoteHead.no-ledgers = ##t
  \once \override Glissando.bound-details.left.padding = #0.3
}

```

```

    This is my song.
    I like to sing.
  }
}
>>

```

The image shows a musical score for a song. At the top, there are four guitar fretboard diagrams for the chords C, F, G, and C. Each diagram shows the fretting pattern for the six strings. Below the diagrams is a musical staff with two staves. The top staff is a guitar staff with a treble clef and a key signature of one flat (B-flat). The bottom staff is a vocal staff with a treble clef and a key signature of one flat. The melody is written on the vocal staff, and the lyrics are written below it. The lyrics are "This is my song. I like to sing." The melody consists of a series of eighth and quarter notes, with some rests. The guitar staff shows the fretting pattern for the chords C, F, G, and C, which correspond to the lyrics "This is my song. I like to sing."

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

The image shows a musical staff with a treble clef and a key signature of one flat (B-flat). The staff contains a single note, a quarter note, with a slur over it. The slur is labeled with the numbers 3, 5, 5, and 3, indicating the fretting pattern for the hammer-on and pull-off technique.

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un “doppio arco” impostando la proprietà `doubleSlurs` su `#t`.

```

\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}

```

Martellato e strappato usando le voci

L'arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```

      (-3 . ,UP)
      (-1 . ,UP))
  <c d e f>4\laissezVibrer r
}
```

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in layout as well.

```
%\layout {
%  \context {
%    \Score
%      stringOneTopmost = ##f
%  }
%  \context {
%    \TabStaff
%      tablatureFormat = #fret-letter-tablature-format
%  }
%}
```

```
m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}
```

The image displays a musical score for open string harmonics on a guitar, organized into three systems. Each system consists of a treble clef staff with a common time signature (C), a guitar-specific staff (Guitar staff) with a treble clef, and a bass staff with a bass clef. The first system shows the first three harmonics (1st, 2nd, and 3rd) with fret positions (12, 7, 19, 5, 24) indicated below the guitar staff. The second system shows the fourth and fifth harmonics (4th and 5th) with fret positions (4, 9, 16, 3) indicated below the guitar staff. The third system shows the sixth, seventh, and eighth harmonics (6th, 7th, and 8th) with fret positions (2.7, 2.3, 2) indicated below the guitar staff. The guitar staff is labeled with 'G' for guitar and 'B' for bass. The bass staff is labeled with 'B' for bass. The fret positions are indicated by numbers in parentheses below the guitar staff.

Posizionamento delle diteggiature della mano destra

È possibile avere un maggior controllo sul posizionamento delle diteggiature della mano destra impostando una specifica proprietà, come illustrato nell'esempio seguente.

```

\define RH rightHandFinger

```

```

\relative c {
  \clef "treble_8"

  \set strokeFingerOrientations = #'(up down)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >4

  \set strokeFingerOrientations = #'(up right down)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >4

  \set strokeFingerOrientations = #'(left)
  <c\RH 1 e\RH 2 g\RH 3 c\RH 4 >2

  \set strokeFingerOrientations = #'(right)
  c\RH 1

```

}

Polifonia in intavolatura

La polifonia in TabStaff funziona proprio come nel rigo normale.

  }
}

```

Comportamento di gambi e travature in intavolatura

La direzione dei gambi nell'intavolatura è regolata nello stesso modo della notazione tradizionale. Le travature possono essere rese orizzontali, come illustrato in questo esempio.

```

\new TabStaff {
  \relative c {
    \tabFullNotation
    g16 b d g b d g b
    \stemDown
    \override Beam.concaveness = 10000
    g,,16 b d g b d g b
  }
}

```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}
```

Unfretted strings

See also Sezione “Unfretted string instruments” in *Guida alla Notazione*.

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach’s 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
    {
      d16( a') s a s a[ s a] s a[ s a]
    }
    \\\
    {
      \slurUp
      bes,16[ s e](
      \hideNotes a)
      \unHideNotes f[(
      \hideNotes a)
      \unHideNotes fis](
      \hideNotes a)
      \unHideNotes g[(
      \hideNotes a)
      \unHideNotes gis](
      \hideNotes a)
    }
  >>
}
```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```
\relative c' '' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}
```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^\snappizzicato
  <c, e g>4_\snappizzicato
}
```

Modello per quartetto d’archi (semplice)

Questo modello presenta un semplice quartetto d’archi. Impiega anche una sezione `\global` per definire il tempo e l’armatura di chiave.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c' {
  c2 d
  e1
  \bar "|"
}

violinTwo = \new Voice \relative c' {
  g2 f
  e1
  \bar "|"
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|"
}

    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

The image shows a musical score for a string quartet. It consists of four staves, each labeled on the left: Violin 1, Violin 2, Viola, and Cello. The staves are grouped by a large brace on the left. The music is written in 4/4 time and C major. The first two measures show a melody in the violins and a bass line in the viola and cello. The piece ends with a double bar line.

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d'archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità \tag per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all'inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

Violin 1

Violin 2

Viola

Cello

The image shows a musical score for four string instruments: Violin 1, Violin 2, Viola, and Cello. The score is written in common time (C) and consists of two measures. Violin 1 and Violin 2 are in treble clef, Viola is in alto clef, and Cello is in bass clef. The notes are as follows:

Instrument	Measure 1	Measure 2
Violin 1	G4 (quarter), A4 (quarter)	B4 (half)
Violin 2	F#4 (quarter), G4 (quarter)	A4 (half)
Viola	E4 (quarter), F#4 (quarter)	G4 (half)
Cello	D3 (quarter), E3 (quarter)	F#3 (half)

Winds

See also Sezione “Wind instruments” in *Guida alla Notazione*.

Cambiare la dimensione dei diagrammi per legni

La dimensione e lo spessore dei diagrammi per legni possono essere modificati.

```
\relative c' ' {
  \textLengthOn

Ancient notation

See also Sezione “Ancient notation” in *Guida alla Notazione*.

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don't want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+ >4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

```

Incipit

Quando si trascrive musica mensurale, un incipit all'inizio del brano è utile per indicare il tempo e l'armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all'epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare “pause d'intero” (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata trascrizione.

```
menrest = #(define-music-function (note) (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  })

Be = \tag #'mod
  #(begin
    (ly:expect-warning (G_ "stem does not fit in beam"))
    (ly:expect-warning (G_ "beam was started here"))
    (make-span-event 'BeamEvent START))

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
\tweak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped
```

```
\relative c' {
  a'4^\upline a( c d')_\upline
}
```

World music

See also Sezione “World music” in *Guida alla Notazione*.

Improvvisazione araba

Per improvvisazioni o *taqasim* a tempo libero, si può omettere l’indicazione di tempo e usare `\cadenzaOn`. Può essere necessaria la modifica dello stile delle alterazioni, perché l’assenza delle stanghette farà sì che l’alterazione sia contrassegnata una volta sola. Ecco un esempio di quello che potrebbe essere l’inizio di un’improvvisazione *hijaz*:

```
\include "arabic.ly"
```

```
\relative sol' {
  \key re \kurd
  \accidentalStyle forget
  \cadenzaOn
  sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

}

Turkish Makam example

This template uses the start of a well-known Turkish Saz Semai that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

Contexts and engravers

See also Sezione “Changing defaults” in *Guida alla Notazione* and Sezione “Contexts and engravers” in *Manuale di Apprendimento*.

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+>4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
      }
    }
  >>
}

```

```

    <<
    {
      c1 | d
    }
    \new Staff {
      \once \omit Staff.TimeSignature
      c1 | b
    }
  >>
  c1
}
}
>>
}

```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```
\paper { tagline = ##f }
```

```

\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
}

```

}
 >>
 }
 }

The image shows three musical notation examples. The first example is a single staff with a treble clef and a key signature of one flat (B-flat). It contains two measures: the first measure has a whole note on C4, and the second measure has a whole note on C4. The text "Unwanted extra space" is placed above the second measure. The second example is a grand staff (treble and bass clefs) with a key signature of one flat. It contains four measures, each with a whole note on C4 in both staves. The text "Fixed here" is placed above the fourth measure. The third example is a grand staff with a key signature of one flat, containing seven measures, each with a whole note on C4 in both staves.

Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia

LilyPond può modificare la direzione del gambo della nota centrale di un rigo in modo che segua la melodia: occorre aggiungere l'incisore `Melody_engraver` al contesto `Voice`.

La proprietà di contesto `suspendMelodyDecisions` può essere usata per disattivare questo comportamento localmente.

```

\relative c' {
  \time 3/4
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t
  a b g f b g |
  \unset suspendMelodyDecisions
  c b d c b c |
}

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
  }
}

```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>
```

Impostare l'output MIDI su un canale per voce

Nella creazione del file di output MIDI, il comportamento predefinito prevede che ogni rigo sia assegnato a un canale MIDI, con tutte le voci del rigo amalgamate in un canale. Ciò diminuisce il rischio di esaurire i canali MIDI disponibili, dato che ce ne sono solo 16 per traccia.

Tuttavia, spostando `Staff_performer` nel contesto `Voice`, ogni voce in un rigo può avere il proprio canale MIDI, come è illustrato nell'esempio seguente: sebbene le voci siano sullo stesso rigo, vengono creati due canali MIDI, ciascuno con un diverso strumento MIDI (`midiInstrument`).

```
\score {
  \new Staff <<
    \new Voice \relative c''' {
      \set midiInstrument = "flute"
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" ~
      g fis ~
      fis4 g8 fis e2 ~
      e4 d8 cis d2
    }
    \new Voice \relative c'' {
      \set midiInstrument = "clarinet"
      \voiceTwo
      b1-"Clarinet"
      a2. b8 a
      g2. fis8 e
      fis2 r
    }
  >>
  \layout { }
  \midi {
    \context {
      \Staff
      \remove "Staff_performer"
    }
    \context {
      \Voice
      \consists "Staff_performer"
    }
  }
  \tempo 2 = 72
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
}

<<
  \new Staff {
    \scaleDurations 8/5 {
      \time 6/8
      \set Timing.measureLength = #6/5
      b8 b b b b b
      \time 2/4
      \set Timing.measureLength = #4/5
      b4 b
    }
  }
  \new Staff {
    \clef bass
    \time 2/4
    c2 d e f
  }
}>>
```

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
```

```

{
  \key g \minor
  \cadenzaOn
  \stemOff a'\breve bes'4 g'4
  \stemOn a'2 \section
  \stemOff a'\breve g'4 a'4
  \stemOn f'2 \section
  \stemOff a'\breve^\markup { \italic flexe }
  \stemOn g'2 \fine
}
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 20)

```

```

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}

```

```

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}

```

```
%}  
  
% uncomment these lines for "A4" size  
%{  
\paper {  
  #(set-paper-size "a4")  
  ragged-last-bottom = ##f  
  line-width = 180  
  left-margin = 15  
  bottom-margin = 10  
  top-margin = 10  
}  
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob) (grob-interpret-markup grob
    #{ \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
    #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```
\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}
```

```
\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
```

```

    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g g4 |
  }
>>

```

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver. This is basically a rewrite in Scheme of the code from `lily/ambitus-engraver.cc`.

```

#(use-modules (oop goops))

```

```

%%%
%%% Grob utilities
%%%
%%% These are literal rewrites of some C++ methods used by the ambitus engraver.

```

```

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with `\removeEmptyStaves`).

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done adding the `Keep_alive_together_engraver` in the grouper (e.g., a `GrandStaff` or a `StaffGroup`).

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

```

```

The image shows a musical score snippet with four staves: Flute, Violin I, Violin II, and Cello. The Flute staff is in treble clef and contains a melody of eighth notes. Violin I and Violin II are in treble clef and contain whole notes. Cello is in bass clef and contains a whole note in the first measure, followed by rests in the second and third measures. The staves are grouped by a brace on the left.

The image shows two systems of musical notation. The first system consists of two staves: a Flute (Fl) staff in treble clef and a Cello (Ce) staff in bass clef. The Flute part plays a melody of eighth notes, and the Cello part plays a bass line of half notes. The second system consists of four staves: a Flute (Fl) staff in treble clef, two Violin staves (Vi I and Vi II) in treble clef, and a Cello (Ce) staff in bass clef. The Flute part continues its melody. The Violin I staff plays a tremolo of sixteenth notes in the third measure. The Violin II staff is empty. The Cello part continues its bass line.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an *engraver*. In this example, (some) engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams, etc., form a *Voice* context. Engravers for key signature, accidentals, bar line, etc., form a *Staff* context.

  d2 \section e2
  f1 \fine
}

\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>
```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c'' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
```

```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
}

```

```

g'4 f' e' d'
\override Staff.MeasureCounter.count-from = #2
\startMeasureCount
\repeat unfold 5 {
  g'4 f' e' d'
}
g'4 f'
\bar ""
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount
}

```

```
\paper { tagline = ##f }
```

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

```

The image displays a musical score for two staves. The first staff contains six measures with the following chords: Dm, /C#, /C, Dm/B, E⁷, and E. The second staff begins with a measure number '5' and contains eight measures with the following chords: E/F, /G#, E, Em/F, Dm, /C#, /C, and Dm/B. The chords are written in a simplified notation style, with some using slash notation for altered notes.

Togliere i numeri di battuta da uno spartito

I numeri di battuta possono essere tolti rimuovendo l'incisore `Bar_number_engraver` dal contesto `Score`.

```

\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    %\remove "Bar_number_engraver"
  }
}

}

```
\paper { tagline = ##f }
```

Usare una parentesi quadra all'inizio di un gruppo di righe

Si può usare il segno `SystemStartSquare` (uno dei segni che delimitano l'inizio del sistema) impostandolo esplicitamente in un contesto `StaffGroup` o `ChoirStaff`.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<https://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```
bars = {
  \tempo "Allegro" 4=120
  s1*2
  \repeat unfold 5 { \mark \default s1*2 }
  \bar "||"
  \tempo "Adagio" 4=40

The image displays a musical score for a symphony orchestra, specifically focusing on the Winds, Trumpet, Trombone, and Strings sections. The score is divided into three systems, each with a tempo change and section markers.

System 1: Allegro (♩ = 120)

- Winds:** Measures 1-4, marked A and B.
- Trumpet:** Measures 1-4, marked A and B.
- Trombone:** Measures 1-4, marked A and B.
- Strings:** Measures 1-4, marked A and B.

System 2: Allegro (♩ = 120)

- Winds:** Measures 5-8, marked C and D.
- Strings:** Measures 5-8, marked C and D.

System 3: Adagio (♩ = 40)

- Winds:** Measures 9-12, marked E and F.
- Tbn:** Measures 9-12, marked E and F.
- Strings:** Measures 9-12, marked E and F.

The image shows a musical score for a vocal group with lyrics aligned above and below the staves. The score is divided into three systems, each with a measure number (16, 21, 26) at the beginning. The instruments are Winds, Strings, and Tpt (Trumpet). The lyrics are: G, H, J, K, L, M, N. The lyrics are aligned above the Winds and Strings staves and below the Tpt staff.

Modello per gruppo vocale con testo allineato sotto e sopra i righi

Questo modello è fondamentalmente analogo al semplice modello “Complesso vocale”, con l’unica differenza che qui tutti i versi del testo sono posizionati usando `alignAboveContext` e `alignBelowContext`.

Tweaks and overrides

See also Sezione “Changing defaults” in *Guida alla Notazione* and Sezione “Tweaking output” in *Manuale di Apprendimento*.

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, occorre spostare l’incisore `Ottava_spanner_engraver` nel contesto `Voice`.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \ottava -1
    <b,,, b,,,>4 ~ |
    q2
    \ottava 0
    <c e>2
  }
  >>
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: `point-and-click` is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```
#(define (add-link url-strg)
```

```

(lambda (grob)
  (let* ((stil (ly:grob-property grob 'stencil)))
    (if (ly:stencil? stil)
      (let* ((x-ext (ly:stencil-extent stil X))
             (y-ext (ly:stencil-extent stil Y))
             (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
             (new-stil
              (ly:stencil-add
               (ly:make-stencil url-expr x-ext y-ext)
               stil)))
        (ly:grob-set-property! grob 'stencil new-stil))))))

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```

glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

```

```

glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

```

```

\relative c' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff

}

```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c' ' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```

<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}

```

```

    }
  }
  % Reducing the minimum space below the staff and above the lyrics:
  \new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
      #'((basic-distance . 1))
  }
  \lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>

```

Adjusting slur positions vertically

Using `\override Slur.positions` it is possible to set the vertical position of the start and end points of a slur to absolute values (or rather, forcing LilyPond's slur algorithm to consider these values as desired). In many cases, this means a lot of trial and error until good values are found. You probably have tried the `\offset` command next just to find out that it doesn't work for slurs, emitting a warning instead.

The code in this snippet allows you to tweak the vertical start and end positions by specifying *relative* changes, similar to `\offset`.

```

Syntax: \offsetPositions #'(dy1 . dy2)

offsetPositions =
#(define-music-function (offsets) (number-pair?)
  #{
    \once \override Slur.control-points =
      #(lambda (grob)
        (match-let (((_ . y1) _ _ (_ . y2))
                    (ly:slur::calc-control-points grob))
          ((off1 . off2) offsets))
        (set! (ly:grob-property grob 'positions)
              (cons (+ y1 off1) (+ y2 off2))))
        (ly:slur::calc-control-points grob)))
  #})

\relative c' {
  c4(^"default" c, d2)
  \offsetPositions #'(0 . 1)
  c'4(^"(0 . 1)" c, d2)
  \offsetPositions #'(0 . 2)
  c'4(^"(0 . 2)" c, d2)
  \bar "||"
  g4(^"default" a d'2)
  \offsetPositions #'(1 . 0)
  g,,4(^"(1 . 0)" a d'2)
  \offsetPositions #'(2 . 0)

```

```
g,,4(^"(2 . 0)" a d'2)
}
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the details of the Stem. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```
\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
  a8[ a]
  \revert Stem.details.beamed-lengths
  a8[ a] a16[ a] a32[ a] r16
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
music = \relative c' {
  \repeat volta 3 {
    c4 d e f |
    \alternative {
      \volta 1 { c4 d e f | c2 d \break }
      \volta 2 { f4 g a b | f4 g a b | f2 a | \break }
      \volta 3 { c4 d e f | c2 d } } }
  c1 \bar ".|."
}

\markup "default"
{
  \music
}
```

```
\markup \typewriter "'numbers"
```

```
{
  \set Score.alternativeNumberingStyle = #'numbers
  \music
}
```

```
\markup \typewriter "'numbers-with-letters"
```

```
{
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \music
}
```

```
\paper { tagline = ##f }
```

default

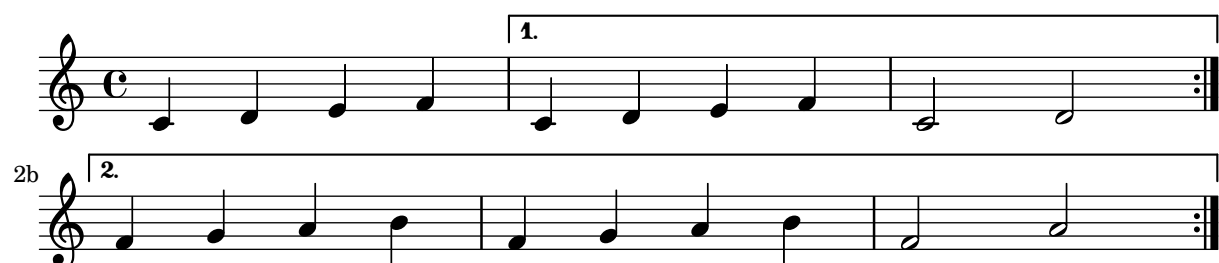

Three staves of music in treble clef, common time (C). The first staff is marked with a first ending bracket (1.) and ends with a repeat sign. The second staff is marked with a second ending bracket (2.) and ends with a repeat sign. The third staff is marked with a third ending bracket (3.) and ends with a repeat sign. The music consists of eighth and quarter notes.

'numbers

Three staves of music in treble clef, common time (C). The first staff is marked with a first ending bracket (1.) and ends with a repeat sign. The second staff is marked with a second ending bracket (2.) and ends with a repeat sign. The third staff is marked with a third ending bracket (3.) and ends with a repeat sign. The music consists of eighth and quarter notes.

'numbers-with-letters

Two staves of music in treble clef, common time (C). The first staff is marked with a first ending bracket (1.) and ends with a repeat sign. The second staff is marked with a second ending bracket (2.) and ends with a repeat sign. The music consists of eighth and quarter notes.

2b

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```
\paper { tagline = ##f }

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c'\startGroup d'\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e'\startGroup d'\stopGroup |
  c'\- \tweak HorizontalBracketText.text
    \markup \bold \huge "b" \startGroup
    - \tweak HorizontalBracketText.text "a" \startGroup
    d'\stopGroup
  e'\- \tweak HorizontalBracketText.text "a'" \startGroup
  d'\stopGroup\stopGroup |
}
```

```

c''-\tweak HorizontalBracketText.text foo \startGroup
d'' e'' f'' | \break
g'' a'' b'' c''\stopGroup
}

```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```

\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}

```

Breaking vertical alignment of dynamics and textscripts

By default, LilyPond uses `DynamicLineSpanner` grobs to vertically align successive dynamic objects like hairpins and dynamic text. However, this is not always wanted. By inserting `\breakDynamicSpan`, which ends the alignment spanner prematurely, this vertical alignment can be avoided.

```

{ g1\< |
  e''\f\> |
  c'\p }

{ g1\< |
  e''\breakDynamicSpan\f\> |
  c'\p }

\paper { tagline = ##f }

```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breath mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ~\markup { A tiny e }_~\markup { A big c }
}
```

Changing beam thickness and spacing

To make beams thicker or thinner alter the `Beam.beam-thickness` property. To adjust the spacing between beams alter the `Beam.length-fraction` property.

```
\relative f' {
  \time 1/8
  \override Beam.beam-thickness = #0.4
  \override Beam.length-fraction = #0.8
  c32 c c c
  \revert Beam.beam-thickness % 0.48 is default thickness
  \revert Beam.length-fraction % 1.0 is default spacing
  c32 c c c
  \override Beam.beam-thickness = #0.6
  \override Beam.length-fraction = #1.3
  c32 c c c
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di lunga e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = 3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
      grob 'stencil
      (grob-interpret-markup grob
        #{ \markup \lower #0.5
          (case sp
            ((-5) "m")
            ((-3) "c ")
```

```
((-2) #{ \markup \teeny \bold 2 #})
(else "bla")) #}))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Cambiare gli stili del testo e degli estensori per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà `'style` di `DynamicTextSpanner`. Il valore predefinito è `'dashed-line`; gli altri valori possibili sono `'line`, `'dotted-line` e `'none`.

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}
```

Changing the default text font family

The default font families for text can be overridden.

```
%{
You may have to install additional fonts.
```

Red Hat Fedora

```
dejavu-fonts-all
```

Debian GNU/Linux, Ubuntu

```
fonts-dejavu-core
```

```
fonts-dejavu-extra
```

```
%}
```

```
\paper {
```

```

%{
  run
    lilypond -dshow-available-fonts
  to show all fonts available in the process log.
}%
property-defaults.fonts.serif = "DejaVu Serif"
property-defaults.fonts.sans = "DejaVu Sans"
property-defaults.fonts.typewriter = "DejaVu Sans Mono"
}

{

                  \italic \bold { bold italic }
    }
  }
  g''2^\markup {
    \override #'(font-family . typewriter) {
      DejaVu Sans Mono: \bold bold
                      \italic italic
                      \italic \bold { bold italic }
    }
  }
}

```

Changing the staff size

Though the simplest way to resize staves is to use `#{set-global-staff-size xx}`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```

<<
  \new Staff {
    \relative c'' {
      \dynamicDown
      c8\ff c c c c c c c
    }
  }
  \new Staff \with {
    fontSize = #-3
  }

```

```

\override StaffSymbol.staff-space = #(magstep -3)
} {
\clef bass
c8 c c c c\ff c c c
}
>>

```

```
\set Staff.pedalSustainStrings = #("Ped" "*Ped" "*")
\sustainNotes
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper {
  ragged-right = ##t
  tagline = ##f
}

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando

Controlling the appearance of tremolo slashes

Using various properties of the `StemTremolo` grob it is possible to control the appearance of tremolo slashes.

- Property `slope` sets the slope for tremolo slashes.
- Property `shape` determines whether tremolo slashes look like rectangles (value `rectangle`) or like very small beams (value `beam-like`).

- Property `style` sets both the slope and the shape depending on whether the note has flags, beams, or only a plain stem. This is in contrast to the previous two properties, which change the slope and shape unconditionally. There are two styles defined.
 - `default`: slashes for down-stem flags are longer and more sloped than slashes for up-stem flags; slashes on beamed notes have a rectangular shape and are parallel to the beam.
 - `constant`: all slashes are beam-like and have the same slope except for down-stem flags.

```

music = {
  a''4:32 a':
  e''8: \noBeam e':
  a'':[ a':]
  f':[ g':]
  d':[ d':]
}

\new Staff {
  <>^\markup "default"
  \music
}

\new Staff {
  <>^\markup \typewriter "style = #'constant"
  \override StemTremolo.style = #'constant
  \music
}

\new Staff {
  <>^\markup \typewriter "shape = #'rectangle"
  \override StemTremolo.shape = #'rectangle
  \music
}

\new Staff {
  <>^\markup \typewriter "shape = #'beam-like"
  \override StemTremolo.shape = #'beam-like
  \music
}

\new Staff {
  <>^\markup \typewriter "slope = -0.2"
  \override StemTremolo.slope = -0.2
  \music
}

\paper {
  indent = 0
  tagline = ##f
}

```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà `'script-priority`. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto `TextScript`) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto `Script`) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```
\relative c''' {
  \once \override TextScript.script-priority = -100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = -100
  a2^\prall^\markup { \sharp }

  \set fingeringOrientations = #'(up)
  <c-2 a-1>2
  <a-1 c>\tweak script-priority -100 -2>2
}
```

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà 'bracket-visibility su `#t` (mostra sempre la parentesi), `#'if-no-beam` (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o `#f` (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto `@code{TupletBracket}` dall'output.

```
music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    \textMark \markup \typewriter "'if-no-beam" \music
    \override TupletBracket.bracket-visibility = ##t
    \textMark \markup \typewriter "#t" \music
    \override TupletBracket.bracket-visibility = ##f
    \textMark \markup \typewriter "#f" \music
    \omit TupletBracket
    \textMark \markup \typewriter "omit" \music
  }
}
```

```
\paper { tagline = ##f }
```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `#f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione $2/3$ si aggiusta la posizione orizzontale.

```
\relative c'' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
  }
}
```

```

\once \override AccidentalSuggestion.outside-staff-priority = ##f
\once \override AccidentalSuggestion.avoid-slur = #'inside
\once \override AccidentalSuggestion.font-size = -3
\once \override AccidentalSuggestion.script-priority = -1
\once \hideNotes
cis8\turn \noBeam
}
d4.( e8)
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```

\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
    #{ \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
    #}))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}

```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```

\relative c' {
  c1-10
}

```

```

c1-50
c1-36
c1-29
}

```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```

\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2

  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \set Staff.middleCPosition = #-13
  \override TextSpanner.dash-period = #10
  \override TextSpanner.dash-fraction = #0.5
  \override TextSpanner.thickness = #10
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
  >>
\new Staff = bottom
  \relative c' {
    \clef bass
    \voiceOne
    g8 a g a g a g a
  }
>>
```

Cross-staff stems

This snippet shows how to use `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem lengths need not be specified, as the variable distance between noteheads and staves is calculated automatically. However, it is important that `\crossStaff` is applied to the correct voice or staff (i.e., on the opposite side of where a beam is or would be positioned) to get the desired effect.

```
\layout {
  \context {
    \PianoStaff
```

```

    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16\> e'8. g8 r\! |
    e'8 f' g'4
    \voiceTwo
    % Down to lower staff
    \crossStaff { e'8 e'8 } e'4 |
  }

  \new Staff {
    \clef bass
    \voiceOne
    % Up to upper staff
    \crossStaff { <e g>4 e, g16 a8. c8 } d |
    g8 f g4 \voiceTwo g8 g g4 |
  }
>>

```

Custodes

Custodes may be engraved in various styles.

```
\layout { ragged-right = ##t }
```

```

\new Staff \with { \consists "Custos_engraver" } \relative c' {
  \override Staff.Custos.neutral-position = #4

```

```

  \override Staff.Custos.style = #'hufnagel
  c1^"hufnagel" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'medicaea
  c1^"medicaea" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'vaticana
  c1^"vaticana" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'mensural
  c1^"mensural" \break
  <d a' f'>1

```

}

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

```
% begin verbatim
```

```
\include "predefined-guitar-fretboards.ly"

Mostrare la parentesi anche se c'è un solo rigo nel sistema

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```

\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
}

\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = 4
    \override Score.SystemStartBar.collapse-height = 4
    \new Staff {
      c'1
    }
  >>
}

\paper { tagline = ##f }

```

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.
- For some grobs, the X- and Y-parents are the same.
- A particular *ancestor* may be related to a grob in multiple ways.
- The concept of *generations* is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

This macro prints (to the console) a textual representation of a grob's ancestry.

When called this way:

```
{ \once \override NoteHead.before-line-breaking = #display-ancestry c }
```

The following output is generated:

```
NoteHead
X,Y: NoteColumn
  X: PaperColumn
    X,Y: System
  Y: VerticalAxisGroup
    X: NonMusicalPaperColumn
      X,Y: System
    Y: VerticalAlignment
      X: NonMusicalPaperColumn
        X,Y: System
      Y: System

  g4\dim a4 b4\decresc c4\!
}

```

Extending a TrillSpanner

For TrillSpanner, the minimum-length property becomes effective only if the set-spacing-rods procedure is called explicitly.

To do this, the springs-and-rods property should be set to ly:spanner::set-spacing-rods.

```

\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-. des-.
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4
  \startTrillSpan { d16[( \stopTrillSpan es)] }
  c( c' g es c g' es d
  \hideNotes
  c8)
}

```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi \alternative può essere simulato aggiungendo all'inizio di ogni blocco \alternative una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```

Flat Ties

The function takes the default Tie.stencil as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding Tie.details.height-limit or with \shape. It's also possible to change the custom-definition on the fly.

%% <http://lsr.di.unimi.it/LSR/Item?id=1031>

}

```

The image displays a musical score for guitar, consisting of three systems of music. Each system features a treble clef staff with a guitar fretboard diagram positioned above it. The first system contains two measures, with fretboard diagrams labeled 'A' and '21'. The second system contains five measures, with fretboard diagrams labeled 'C', 'C', 'C', 'D', and 'D'. The third system also contains five measures, with fretboard diagrams labeled 'C', 'C', 'C', 'D', and 'D'. The fretboard diagrams include various notations such as fingerings (e.g., 1, 2, 3, 4), muting (M), and other guitar-specific symbols. The score is formatted with a ragged-right alignment and a specific system spacing.

Generating custom flags

The stencil property of the Flag grob can be set to a custom scheme function to generate the glyph for the flag.

```

\define-public (weight-flag grob)

```

```

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the \pp, there are several approaches:

- Simply use \once\override DynamicText.X-offset = #-9.2 before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

- Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once\override ...X-offset =` Drawback: `\once\override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```
\paper {
  ragged-right = ##f
  indent = 2.5\cm
  tagline = ##f
}
```

```
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
```

```
% Solution 2: Using a dynamic script & shifting with
%           \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1))))
```

```
% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
```

```
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
```

```
semppM =
#(make-dynamic-script
  (markup #:line
    (:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 5: Dynamic with explicit shifting inside the scheme function
```

```
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
```

```
% Drawback: One needs to set DynamicText.X-offset!
```

```
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
```

```
semppMII =

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
\header { tagline = ##f }
```

```
harmonies = \chordmode
```

```
{
```

```
  a8:13
```

```
% THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
```

```
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
```

```
  b8:13 s2.
```

```
% THIS LINE IS THE SECOND METHOD
```

```
  s4 s4  b4:13
```

```
}
```

```
\score
```

```

}
>>
}
>>
}

```

Inserire una cesura

I segni di cesura possono essere creati sovrascrivendo la proprietà 'text dell'oggetto BreathingSign. È disponibile anche un segno di cesura curvo.

```

\relative c' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}

```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with full-size-change.

```

\relative c' {

```

```

\clef "treble"
c1
\clef "bass"
c1
\clef "treble"
c1
\override Staff.Clef.full-size-change = ##t
\clef "bass"
c1
\clef "treble"
c1
\revert Staff.Clef.full-size-change
\clef "bass"
c1
\clef "treble"
c1
}

```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```

\relative c' ' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}

```

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\\
  {
    b8 g g e
  }
  >>
}
```

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà `breakable` e `after-line-breaking` su `#t`:

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

music = {
  \repeat unfold 16 f8 |
  f1\glissando |
  a4 r2. |
  \repeat unfold 16 f8 |
  f1\glissando \once\glissandoSkipOn |
  a2 a4 r4 |
  \repeat unfold 16 f8
}

\relative c'' {
  <>^\markup { \typewriter Glissando.breakable
               set to \typewriter "#t" }
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  \music
}
```

```

\relative c' {
  <>^\markup { \typewriter Glissando.breakable not set }
  \music
}

\paper {
  line-width = 100\mm
  indent = 0
  tagline = ##f
}

```

The image displays six staves of musical notation in treble clef, illustrating the effect of the `Glissando.breakable` setting. The first staff is labeled "Glissando.breakable set to #t" and shows a continuous glissando across a series of notes. The second staff shows a glissando that is broken by a measure rest. The third staff shows a glissando that is broken by a quarter rest. The fourth staff is labeled "Glissando.breakable not set" and shows a continuous glissando across a series of notes. The fifth staff shows a glissando that is broken by a measure rest. The sixth staff shows a glissando that is broken by a quarter rest.

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

```

\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}

```

The image shows a single staff of musical notation in treble clef, illustrating the effect of manually controlling beam positions. The notation shows a series of eighth notes with beams, where the beam positions are controlled manually using the `\override Beam.positions` command.

Measure-centered bar numbers

For film scores, a common convention is to center bar numbers within their measure. This is achieved through setting the `centerBarNumbers` context property to `true`. When this is used, the type of the bar number grobs is `CenteredBarNumber` rather than `BarNumber`.

This example demonstrates a number of settings: the centered bar numbers are boxed and placed below the staves.

```
\layout {
  \context {
    \Score
    centerBarNumbers = ##t
    barNumberVisibility = #all-bar-numbers-visible
    \override CenteredBarNumber.stencil
      = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \override CenteredBarNumberLineSpanner.direction = #DOWN
  }
}

\new StaffGroup <<
  \new Staff \relative c' {

  c1
  c''''1
}

```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>
```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```
\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
  e4( a)
  \override Slur.positions = #'(3 . 3)
  e4( a)
  \override Slur.positions = #'(4 . 4)
  e4( a)
  \override Slur.positions = #'(5 . 5)
  e4( a)
  \override Slur.positions = #'(0 . 5)
  e4( a)
  \override Slur.positions = #'(5 . 0)
  e4( a)
  \stemUp
  \override Slur.positions = #'(-5 . -5)
  e4( a)
  \stemDown
  \revert Slur.positions
  e4( a)
}
```

}

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = 4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                                          (SystemStartSquare b) ) c ) d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }

  \new Staff { c1 }
>>
```

Overriding articulations by type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use-case might be to create a style sheet.

With 2.16.2 and above it is possible to put the proposed function, `\customScripts`, into a `\layout-block`.

% Code by David Nalesnik and Thomas Morley

```
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:event-property
                  (ly:grob-property grob 'cause)
                  'articulation-type))
           (tweaks (assoc-ref ls type)))
      (if tweaks
          (for-each
            (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
            tweaks))))))
```

```
customScripts =
#(define-music-function (settings) (list?)
#{
  \override Script.before-line-breaking =
    #(custom-script-tweaks settings)
#})
```

```
revertCustomScripts = \revert Script.before-line-breaking
```

```
%%%%%%%%%%%%%%
% Example:
%%%%%%%%%%%%%%
```

% Predefine a list of desired tweaks.

```
#(define my-settings-1
  '(
    (staccato . ((color . (1 0 0))
                 (padding . 0.5)))
    (accent . ((font-size . 0)
               (color . (1 0 0))))
    (tenuto . ((rotation . (45 0 0))
               (padding . 2)
               (font-size . 10)))
    (staccatissimo . ((padding . 1)
                      (color . (1 0 0))))

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

```

\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}

```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia, nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

```
\relative c' ' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
  \override MultiMeasureRest.staff-position = -2
  R1
  \override MultiMeasureRest.staff-position = 0
  R1
  \override MultiMeasureRest.staff-position = 2
  R1
  \override MultiMeasureRest.staff-position = 3
  R1
  \override MultiMeasureRest.staff-position = 6
  R1
  \revert MultiMeasureRest.staff-position
  \break

  % In two Voices, odd-numbered voices are under the top line
  << { R1 } \ { a1 } >>
  % Even-numbered voices are under the bottom line
  << { a1 } \ { R1 } >>
  % Multi-measure rests in both voices remain separate
  << { R1 } \ { R1 } >>
```

```

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \\ { R1 } \\
    \once \override MultiMeasureRest.staff-position = 0
    { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
    \revert MultiMeasureRest.direction
    { R1*3 }
    \\
    \revert MultiMeasureRest.direction
    { R1*3 }
>>
}

```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```

\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(~\markup { \halign #-10 \natural } d4.) c8
}

```

Numeri di battuta racchiusi in rettangoli o cerchi

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```

\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = 2
}

```

```

% Draw a box round the following bar number(s)
\override Score.BarNumber.stencil
  = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
\repeat unfold 5 { c1 }

% Draw a circle round the following bar number(s)
\override Score.BarNumber.stencil
  = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
\repeat unfold 4 { c1 } \bar "|."
}

```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```

\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}

```

Printing note names with and without an octave marker

The `NoteNames` context can be used to print the text value of notes. The `printOctaveNames` property turns on or off the representation of the octave of the note.

```

scale = \relative c' {
  a4 b c d
  e4 f g a
}

```

```

\new Staff {
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##f
      \scale
    }
  >>
  R1
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##t
      \scale
    }
  >>
}

```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```

music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8]
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
    \override TupletBracket.bracket-visibility = #'if-no-beam
    { \textMark \markup \typewriter "'if-no-beam" \music }
  }
}

```

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c' ' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #1/16
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
    c2 \grace { c16[ c16] } c2
  }
  \new Staff {
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
    c1
  }
>>
```

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`, together with the clefs.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```
someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' ' \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}
```

```

    }
}

\paper { tagline = ##f }

```

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

```

\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  >>
}

```

Eliminare la prima linea vuota

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`, a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righe non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>

\paper { tagline = ##f }
```

Stili di pausa

Esistono vari stili di pausa.

```
restsA = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 s32
  s64 s128 s256 s512 s1024 s1024
}
restsB = {
  r\maxima r\longa r\breve r1 r2 r4 r8 r16 r32
  r64 r128 r256 r512 r1024 s1024
}

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  <>^\markup \typewriter { mensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'neomensural
  <>^\markup \typewriter { neomensural } \restsA \bar "" \break

  \override Staff.Rest.style = #'classical
  <>^\markup \typewriter { classical } \restsB \bar "" \break

  \override Staff.Rest.style = #'z
  <>^\markup \typewriter { z-style } \restsB \bar "" \break

  \override Staff.Rest.style = #'default
  <>^\markup \typewriter { default } \restsB \bar "" \break
}

\paper {
  indent = 0
}
```

```
tagline = ##f
}
```

The image shows five musical staves, each with a different notation style. The first staff is labeled 'mensural' and shows a single melodic line with vertical stems and horizontal beams. The second staff is labeled 'neomensural' and shows a single melodic line with vertical stems and horizontal beams, but with a different stem direction. The third staff is labeled 'classical' and shows a single melodic line with vertical stems and horizontal beams, but with a different stem direction and a different beam style. The fourth staff is labeled 'z-style' and shows a single melodic line with vertical stems and horizontal beams, but with a different stem direction and a different beam style. The fifth staff is labeled 'default' and shows a single melodic line with vertical stems and horizontal beams, but with a different stem direction and a different beam style.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

```
startPat = {
  \improvisationOn
  \omit Stem
}
stopPat = {
  \improvisationOff
  \undo \omit Stem
}

\new Voice \with {
  \consists Pitch_squash_engraver
} {
  c'4 d' e' f' |
  \startPat
  4 4 4 4 |
  \stopPat
  f'4 e' d' c'
}
```

The image shows a musical staff with a treble clef and a common time signature 'C'. The first measure contains four eighth notes: C, D, E, and F. The second measure contains four diagonal slashes, representing a rhythmic pattern. The third measure contains four eighth notes: F, E, D, and C.

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

The value of `break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. Each list describes the default order of prefatory matter at the end, in the middle, and at the beginning of a line, respectively. We are only interested in changing the behaviour in the middle of a line.

If you look up the definition of `break-align-orders` in LilyPond's Internal Reference (see the `BreakAlignment` (<https://lilypond.org/doc/v2.22/Documentation/internals/breakalignment>) grob), you get the following order in the second element:

```
...
staff-bar
key-cancellation
key-signature
...
```

We want to change that, moving `key-cancellation` before `staff-bar`. To make this happen we use the `grob-transformer` function, which gives us access to the original vector as the second argument of the lambda function, here called *orig* (we don't need the first argument, *grob*). We return a new vector, with unchanged first and last elements. For the middle element, we first remove `key-cancellation` from the list, then adding it again before `staff-bar`.

```
#(define (insert-before where what lst)
  (cond
    ((null? lst)           ; If the list is empty,
     (list what))         ; return a single-element list.
    ((eq? where (car lst)) ; If we find symbol `where`,
     (cons what lst))     ; insert `what` before curr. position.
    (else                  ; Otherwise keep building the list by
     (cons (car lst)      ; adding the current element and
           (insert-before ; recursing with the next element.
             where what (cdr lst))))))

cancellationFirst =
\override Score.BreakAlignment.break-align-orders =
#(grob-transformer
  'break-align-orders
  (lambda (grob orig)
    (let* ((middle (vector-ref orig 1))
           (middle (delq 'key-cancellation middle))
           (middle (insert-before
                               'staff-bar 'key-cancellation middle)))
      (vector
        ;; end of line
        (vector-ref orig 0)
        ;; middle of line
        middle
        ;; beginning of line
        (vector-ref orig 2)))))

music = { \key es \major d'1 \bar "||"

```

Shape individual ties in chords

To shape individual ties in chords use the method demonstrated below.

```
\paper { tagline = ##f }
```

```
\markup "Chords can be tied note by note"
```

```
{ <c'~ e'~ g'~ c''~>2 q }
```

```
\markup \wordwrap {
```

Affecting those *ties* with "`\\shape`" will not succeed, because *TieColumn* positions them on its own behalf and more or less ignores the "`\\shape-input`".

You may surpress this by setting '*positioning-done* true. Alas, '*positioning-done* is an internal property, setting it true means: all positioning is done, don't do anything further. So you better take care you really did. See the example below where this is missed: All directions are down and the *thickness* is not accurate:

```
}
```

```
{
```

```

    <c'~ e'~ g'~ c''~>2
    \once \override TieColumn.positioning-done = ##t
  q
}

\markup "To cure that, enter ties with explicit direction-modifiers"

{
  <c'_~ e'_~ g'_~ c''^~>2
  \once \override TieColumn.positioning-done = ##t
  q
}

\markup "Now you can use \shape for each tie as usual"

{
  <c'-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
    e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~
    g'-\shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
    c''-\shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
  >2
  \once \override TieColumn.positioning-done = ##t
  q
}

\markup "This works at line break as well."

{
  <c'-\shape #'(((0 . 0) (0 . -10) (0 . -10) (0 . 0))
                ((0 . 0) (0 . -10) (0 . -10) (0 . 0)))
    _~
    e'-\shape #'(((0 . 0) (0 . -5) (0 . -5) (0 . 0))
                ((0 . 0) (0 . -5) (0 . -5) (0 . 0)))
    _~
    g'-\shape #'(((0 . 0) (0 . -2) (0 . -2) (0 . 0))
                ((0 . 0) (0 . -2) (0 . -2) (0 . 0)))
    _~
    c''-\shape #'(((0 . 0) (0 . 5) (0 . 5) (0 . 0))
                ((0 . 0) (0 . 5) (0 . 5) (0 . 0)))
    ^~
  >2
  \break
  \once \override TieColumn.positioning-done = ##t
  q
}

\markup "Same with tieWaitForNote"

  \set tieWaitForNote = ##t
  c'4-\shape #'((0 . 0) (0 . -10) (0 . -10) (0 . 0)) _~
  e'-\shape #'((0 . 0) (0 . -5) (0 . -5) (0 . 0)) _~

```

```

g' - \shape #'((0 . 0) (0 . -2) (0 . -2) (0 . 0)) _~
c' - \shape #'((0 . 0) (0 . 5) (0 . 5) (0 . 0)) ^~
\once \override TieColumn.positioning-done = ##t
<c' e' g' c'>1
}

```

Chords can be tied note by note

Affecting those ties with `\shape` will not succeed, because `TieColumn` positions them on its own behalf and more or less ignores the `\shape`-input. You may surpress this by setting `'positioning-done true`. Alas, `'positioning-done` is an internal property, setting it true means: all positioning is done, don't do anything further. So you better take care you really did. See the example below where this is missed: All directions are down and the thickness is not accurate:

To cure that, enter ties with explicit direction-modifiers

Now you can use `\shape` for each tie as usual

This works at line break as well.

Same with tieWaitForNote

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support' would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
  <>^"Wrong"
  c2_\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet_\flageolet

  \stopStaff s1 \startStaff

  <>^"Works if written inside a chord"
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet^\flageolet>2
  <e_\fermata^\fermata>2
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #define-music-function (StringNumber) (string?)
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
```

```

\override TextSpanner.bound-details.left.text =
  \markup { \circle \number $StringNumber }
#})

\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}

```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}

```

Time signature in brackets

The time signature can be enclosed within brackets.

```

\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}

```

Time signature in parentheses

Enclose the time signature in parentheses.

```
\relative c' ' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (numero 7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-number`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a cifra singola (single-number) a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c' ' {
  \time 3/4
  c4 c c
  % Change the style permanently
  \override Staff.TimeSignature.style = #'single-number
  \time 2/4
  c4 c
  \time 3/4
  c4 c c
  % Revert to default style:
  \revert Staff.TimeSignature.style
  \time 2/4
  c4 c
  % single-number style only for the next time signature
  \once \override Staff.TimeSignature.style = #'single-number
  \time 5/4
  c4 c c c c
  \time 2/4
  c4 c
}
```

Tuplet bracket and change staff

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.

```

aigues = \relative c' {
  \time 6/8
  s4.
  \stemDown
  c16[ bes' e]
  \stemUp
  g c e
  \stemDown
  g8
}

basses = \relative c {
  \time 3/4
  \clef F
  \tweak positions #'(4.5 . 9.5)
  \tweak edge-height #'(1 . -1)
  \tuplet 7/6 {
    c16[ bes' e]
    \change Staff = md
    \stemUp
    g[ c e g]
  }
  s4.s8
}

\new PianoStaff
\with { \omit TimeSignature }
<<
  \new Staff = md \aigues
  \new Staff = mg \basses
>>

```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
\set Staff.middleCPosition = 6
\set Staff.middleCClefPosition = 6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = "clefs.C"
\set Staff.clefPosition = 4
\set Staff.middleCPosition = 4
\set Staff.middleCClefPosition = 4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = "clefs.G"
\set Staff.clefPosition = -2
\set Staff.clefTransposition = -7
\set Staff.middleCPosition = 1
\set Staff.middleCClefPosition = 1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = 0
\set Staff.clefTransposition = 0
\set Staff.middleCPosition = -4
\set Staff.middleCClefPosition = -4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = 2
c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
c'1
\set Staff.clefTransposition = 7
c'1
\set Staff.clefTransposition = 0
```

```

\set Staff.clefPosition = 0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = 0
c'1
}

\paper { tagline = ##f }

```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di Stem nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```

\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}

```

Using alternative flag styles

Alternative shapes for flags on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. LilyPond provides the following functions: `modern-straight-flag`, `old-straight-flag`, and `flat-flag`. Use `\revert` to restore the default shape.

To get stacked (i.e., vertically more compact) flags, call the command `\flagStyleStacked`, which can be reset with `\flagStyleDefault`.

Overriding the `Flag` stencil does not change how flag elements are positioned vertically. This is especially noticeable for flat flags: LilyPond doesn't dynamically adjust the vertical gaps between flag elements in the same way as it does for beams. A possible solution to harmonize the appearance is to replace flat flags with half beams, as shown in the second staff; however,

this can't be done automatically. In the code of this snippet, such half beams are entered with @ as a prefix, for example @c8.

Be aware that half beams are *not* Flag grobs. This means in particular that modifying Flag properties won't have any effect on them (you have to use Beam properties instead), and properties for their associated Stem grob will also behave beam-like.

```
"@" =
#(define-music-function (music) (ly:music?)
  #{ \set stemLeftBeamCount = 0 $music [] #})

testnotes = {
  \autoBeamOff
  c8 d16 e'32 f64 \acciaccatura { g,,8 } a128 b

}
```

Using `ly:grob-object` to access grobs with `\tweak`

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a `NoteHead` callback, but the technique is not limited to `NoteHeads`. However, the `NoteHead` callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The example function defined below (`"display-grobs"`) is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

```
#<Grob Accidental >
()
#<Grob Stem >
#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))
        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\~))
```

```

    (for-each
      (lambda (x) (format (current-error-port) "~a\n" x))
      (list accidental arpeggio stem))))

\relative c' {
  %% display grobs for each note head:
  %\override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

%% Updaters remark:
%% For unknown reasons this snippet returns a gs-error, but only, if compiled
%% with multiple others like: lilypond *.ly
%% Thus changing to a path-stencil.
%% TODO description needs to get adjusted --harm

```

```

parallelogram =
  #(ly:make-stencil
    '(path 0.1
      (rmoveto 0 0.25
        lineto 1.3125 0.75
        lineto 1.3125 -0.25
        lineto 0 -0.75)
      round
      round
      #t)
    (cons 0 1.3125)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Using the `\tweak` command to tweak individual grobs

With the `\tweak` command, every grob can be tuned directly. Here are some examples of available tweaks.

```
\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
    \tweak font-size #3 c
    \tweak color #red d-\tweak font-size #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}
```

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da `'staff-padding`. Se si imposta `'staff-padding` su un valore abbastanza grande, le dinamiche saranno allineate.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = 3
  \textLengthOn
  \override TextScript.staff-padding = 1
  \music
}
```

`\paper { tagline = ##f }`

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  { \skip 2
    <<
      \lyrics {
        \set alignBelowContext = "1"
        lyrics4 below
      }
      \new Staff \with {
        alignAboveContext = "3"
        fontSize = -2
        \override StaffSymbol.staff-space = #(magstep -2)
        \remove "Time_signature_engraver"
      } {
        \tuplet 6/4 {
          \override TextScript.padding = 3
          c8["ossia above" d e d e f]
        }
      }
    }
  }
>>
}
>>

\paper {
  ragged-right = ##t
}
```

Vertically aligning stanza numbers of different staves

It can happen that stanza numbers don't align vertically if the verses are attached to different staves. To fix that, override the `self-alignment-X` property of the `LyricText` grob.

```
\markup { default behavior }
```

```
<<
```

```
\new Staff { b b b b }
\lyrics {
  \set stanza = "3."
  a a a a
}
```

```
\new Staff { b b b b }
\lyrics {
  \set stanza = "1."
  aaaaaaaaaa a a a
}
```

```
\lyrics {
  \set stanza = "2."
  a a a a
}
```

```
>>
```

```
\markup \vspace #1
```

```
\markup {
  using \typewriter "self-alignment-X = #LEFT" }
```

```
<<
```

```
\new Staff { b b b b }
\new Lyrics \lyricmode {
  \set stanza = "3."
  a a a a
}
```

```
\new Staff { b b b b }
\new Lyrics \lyricmode {
  \set stanza = "1."
  \once \override LyricText.self-alignment-X = #LEFT
  aaaaaaaaaa a a a
}
```

```
\new Lyrics \lyricmode {
  \set stanza = "2."
  a a a a
}
```

```
>>
```

```
\paper { tagline = ##f }
```

default behavior

```
using self-alignment-X = #LEFT
```

```
<<
\relative c' {
  c8 c b b a a c16 c b b
  c8 c b b a a c16 c b b
  c8 c b b a a c c b b
}
\figures {

Paper and layout

See also Sezione “Spacing issues” in *Guida alla Notazione*.

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
      shortInstrumentName = "Left"
    }

    { c'1 \break c'1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #CENTER
      instrumentName = \markup \center-column {
        Centered
        "instrument name"
      }
      shortInstrumentName = "Centered"
    }

    { g'1 g'1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #RIGHT
      instrumentName = \markup \right-column {
        "Right aligned"
        "instrument name"
      }
      shortInstrumentName = "Right"
    }

    { e'1 e'1 }

  >>

  \layout {
    ragged-right = ##t
```

```

    indent = 4\cm
    short-indent = 2\cm
  }
}

```

Left aligned
instrument name

Centered
instrument name

Right aligned
instrument name

The image shows three musical staves, each with a treble clef and a common time signature 'C'. The first staff has a left-aligned instrument name, the second has a centered instrument name, and the third has a right-aligned instrument name. The instrument names are represented by the text labels to the left of the staves.

The instrument names are represented by the text labels to the left of the staves.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```

\header { tagline = ##f }

\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup
      .nonstaff-nonstaff-spacing
      .minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break

```

```

% ...

\voiceOne
s2 a'8^\aliceSings a' b'4 |
\oneVoice
g'1
}
\new Voice = "eve" {
s1 |
a'2^\eveSings g' |
s1 |
a'2^\eveSings g'
% ...

\voiceTwo
f'4^\eveSings a'8 g' f'4 e' |
\oneVoice
s1
}
>>
\new Lyrics \lyricsto "alice" {
may -- be
sec -- ond
% ...
Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
that the
words are
% ...
...and then I was like--
}
>>

```

The musical score is written on four staves. The first staff contains the lyrics 'may - be' and 'that the' with vocal lines for ALICE and EVE. The second staff contains 'sec - ond' and 'words are' with vocal lines for ALICE and EVE. The third staff contains '...and then I' and 'Shut up, you like--' with vocal lines for EVE and ALICE. The fourth staff contains 'fool!' with a vocal line for EVE. The lyrics are: may - be that the sec - ond words are ...and then I Shut up, you like-- fool!

Book parts

`\bookpart` can be used to split a book into several parts. Each part last page can be affected by `ragged-last-bottom`. Header and footer markups can detect a part last page, and make the difference with the book last page.

```
#(set-default-paper-size "a6")
```

```

\book {
  %% book paper, which is inherited by all children bookparts
  \paper {
    ragged-last-bottom = ##t
    %% Page footer: add a different part-tagline at part last page
    oddFooterMarkup = \markup {
      \column {
        \fill-line {
          %% Copyright header field only on book first page.
          \if \on-first-page \fromproperty #'header:copyright
        }
        \fill-line {
          %% Part tagline header field only on each part last page.
          \if \on-last-page-of-part \fromproperty #'header:parttagline
        }
        \fill-line {
          %% Tagline header field only on book last page.
          \if \on-last-page \fromproperty #'header:tagline
        }
      }
    }
  }
}

%% book header, which is inherited by the first bookpart
\header {
  title = "Book title"
  copyright = "Copyright line on book first page"
  parttagline = "Part tagline"
  tagline = "Book tagline"
}

Changing the staff size

Though the simplest way to resize staves is to use `#(set-global-staff-size xx)`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```
<<
  \new Staff {
    \relative c'' {
      \dynamicDown
      c8\ff c c c c c c c
    }
  }
  \new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
  } {
    \clef bass
    c8 c c c c\f c c c
  }
>>
```

Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with `-dclip-systems`; the snippets page may not adequately show the results. The result will be files named `'base-from-start-to-end[-count].eps'`.

If system starts and ends are included, they include extents of the `System` grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

```
#(ly:set-option 'clip-systems)
#(ly:set-option 'separate-page-formats "ps")
#(define output-suffix "1")

origScore = \score {
  \relative c' {
    \new Staff \with { instrumentName = "Instrument" }
    c1
    d1
    \grace c16 e1
    \key d \major
    f1 \break
    \clef bass
    g,1
    fis1
  }
}

\book {
  \score {
    \origScore
    \layout {
      % Each clip-region is a (START . END) pair
      % where both are rhythmic-locations.

      % (make-rhythmic-locations BAR-NUMBER NUM DEN)
      % means NUM/DEN whole-notes into bar numbered BAR-NUMBER

      clip-regions = #(list
        (cons
          (make-rhythmic-location 2 0 1)
          (make-rhythmic-location 4 0 1))

        (cons
          (make-rhythmic-location 0 0 1)
```

```

      (make-rhythmic-location 4 0 1))

    (cons
      (make-rhythmic-location 0 0 1)
      (make-rhythmic-location 6 0 1))
    )
  }
}

#(ly:set-option 'clip-systems #f)
#(ly:set-option 'separate-page-formats #f)
#(define output-suffix #f)

\book {
  \score { \origScore }
  \markup { \bold \fontsize #6 clips }
  \score {
    \lyrics {
      \markup { from-2.0.1-to-4.0.1-clip.eps }
      \markup {
        \epsfile #X #30.0 #(format #f "~a-1-from-2.0.1-to-4.0.1-clip.eps"
          (ly:parser-output-name)) }
    }
  }
}

```

Instrument

The image shows a musical score for an instrument and a bass line. The instrument part is written on a treble clef staff with a common time signature (C). It contains four measures: the first measure has a whole note G4; the second measure has a whole note A4; the third measure has a quarter note B4 followed by a whole note A4; the fourth measure has a key signature change to D major (indicated by two sharps, F# and C#) and contains a half note G#4 and a whole note F#4. The bass part is written on a bass clef staff with a key signature of D major (two sharps, F# and C#). It contains two measures: the first measure has a whole note D3, and the second measure has a whole note D3. A measure number '5' is positioned above the first measure of the bass staff.

5

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 20)

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}

```

Demonstrating all headers

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

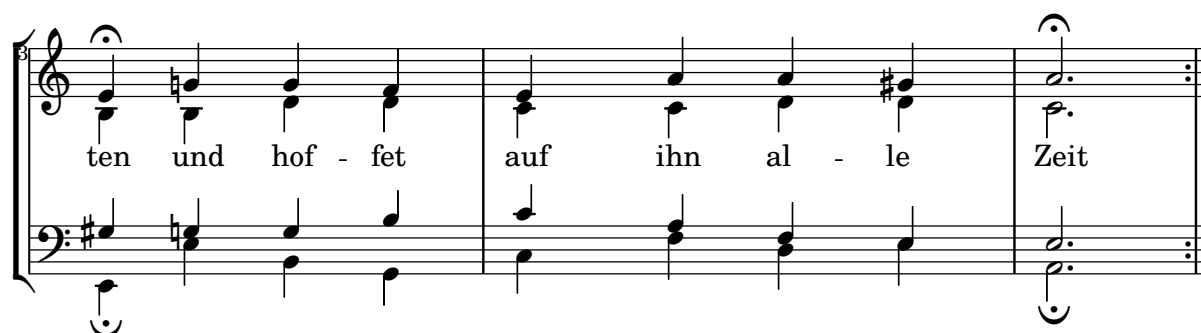

A musical score in C major, common time (C), for a two-part setting. The treble staff has a key signature of one sharp (F#) and a common time signature. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is simple, with the treble staff moving in a stepwise fashion and the bass staff providing a simple harmonic accompaniment.

Pupil: Here's my version!

A musical score in C major, common time (C), for a two-part setting. The treble staff has a key signature of one sharp (F#) and a common time signature. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is more complex than the Teacher's version, with the treble staff moving in a stepwise fashion and the bass staff providing a simple harmonic accompaniment.

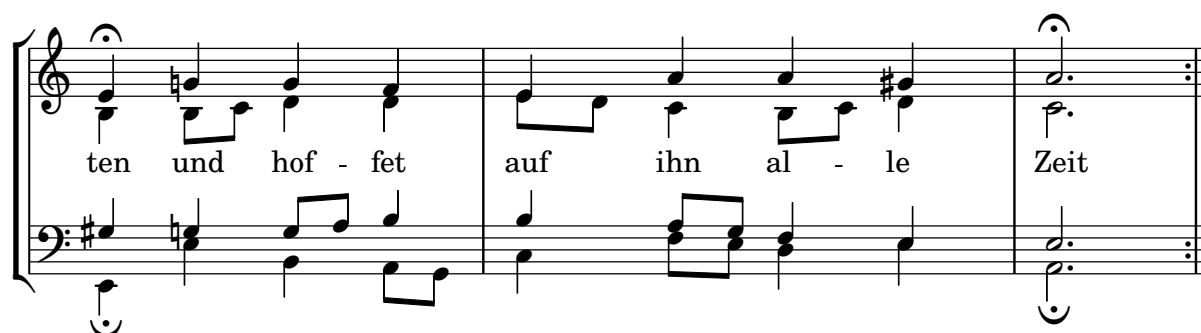

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

A musical score in C major, common time (C), for a two-part setting. The treble staff has a key signature of one sharp (F#) and a common time signature. The lyrics are: "Wer nur den lie - ben Gott läßt wal -". The melody is more complex than the Pupil's version, with the treble staff moving in a stepwise fashion and the bass staff providing a simple harmonic accompaniment.

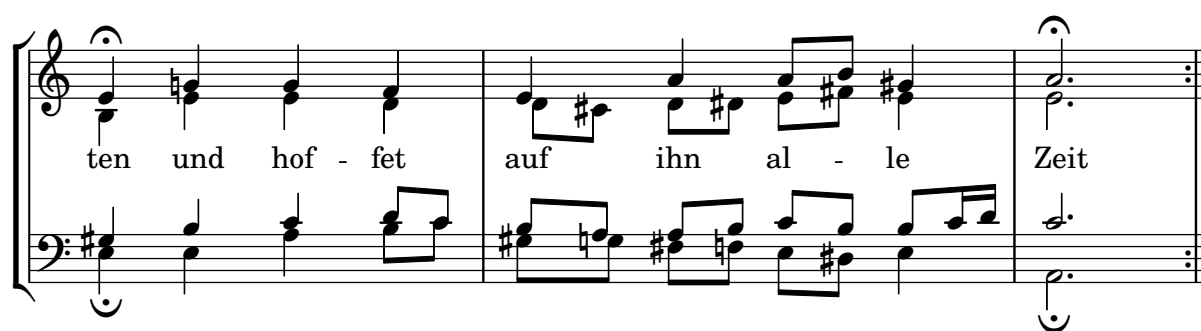

ten und hof - fet auf ihn al - le Zeit

This system shows a vocal melody in the treble clef and a piano accompaniment in the bass clef. The melody consists of quarter notes and half notes. The piano accompaniment features a steady eighth-note bass line. The system concludes with a repeat sign.

ten und hof - fet auf ihn al - le Zeit

This system continues the musical piece with the same vocal and piano parts. The piano accompaniment includes some eighth-note chords. The system ends with a repeat sign.

ten und hof - fet auf ihn al - le Zeit

This system continues the musical piece. The piano accompaniment features more complex eighth-note patterns. The system ends with a repeat sign.

Titles

See also Sezione “Titles and headers” in *Guida alla Notazione*.

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
\paper { tagline = ##f }

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c' {
    c4 c c c
  }
}

% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

27-09-2025

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
    }
}
```

```

    }
    shortInstrumentName = "Left"
  }

  { c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

Outputting the version number

It is possible to print the version number of LilyPond in markup.

\markup { Processed with LilyPond version $\#(\text{lilypond-version})$ }

Processed with LilyPond version 2.25.29

Spacing

See also Sezione “Spacing issues” in *Guida alla Notazione*.

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
```

```

\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}

```

Breaking vertical alignment of dynamics and textscripts

By default, LilyPond uses `DynamicLineSpanner` grobs to vertically align successive dynamic objects like hairpins and dynamic text. However, this is not always wanted. By inserting `\breakDynamicSpan`, which ends the alignment spanner prematurely, this vertical alignment can be avoided.

```

{ g1\< |
  e''\f\> |
  c'\p }

{ g1\< |
  e''\breakDynamicSpan\f\> |
  c'\p }

```

```

\paper { tagline = ##f }

```

Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```

\label license
\markup "This snippet is available under the Creative Commons
Public Domain Dedication license."

```

```

{
  \repeat volta 2 {
    \label startRepeat
    \repeat unfold 20 { c'2 2 }
    \pageBreak
  }
}

```

```

}
\textEndMark \markup {
  \with-link #'startRepeat \line {
    To page \page-ref #'startRepeat "0" "?"
  }
}
}

\markup {
  See page \page-ref #'license "0" "?" for
  licensing information.
}

```

This snippet is available under the Creative Commons Public Domain Dedication license.

The image shows a musical score with six staves. The first five staves are numbered 5, 9, 13, 17, and 21 at the beginning. The sixth staff is numbered 21 at the beginning and has the text "To page ?" at the end. Each staff contains a series of eighth notes.

See page ? for licensing information.

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```

\relative c' ' <<
\override Score.SpacingSpanner.strict-note-spacing = ##t
\set Score.proportionalNotationDuration = #1/16
\new Staff {
  c8[ c \clef alto c c \grace { d16 } c8 c] c4
  c2 \grace { c16[ c16] } c2
}
\new Staff {

```

```

c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
c1
}
>>

```

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da `'staff-padding`. Se si imposta `'staff-padding` su un valore abbastanza grande, le dinamiche saranno allineate.

```

music = \relative c' {
  a'2\p b\f
  e4\p f\f> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = 3
  \textLengthOn
  \override TextScript.staff-padding = 1
  \music
}

\paper { tagline = ##f }

```

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }

```

```

\new Staff = "3" { c4 c s2 }
{ \skip 2
  <<
    \lyrics {
      \set alignBelowContext = "1"
      lyrics4 below
    }
    \new Staff \with {
      alignAboveContext = "3"
      fontSize = -2
      \override StaffSymbol.staff-space = #(magstep -2)
      \remove "Time_signature_engraver"
    } {
      \tuplet 6/4 {
        \override TextScript.padding = 3
        c8[~"ossia above" d e d e f]
      }
    }
  >>
}
>>

\paper {
  ragged-right = ##t
}

```

MIDI

See also Sezione “Creating MIDI output” in *Guida alla Notazione*.

Impostare l’output MIDI su un canale per voce

Nella creazione del file di output MIDI, il comportamento predefinito prevede che ogni rigo sia assegnato a un canale MIDI, con tutte le voci del rigo amalgamate in un canale. Ciò diminuisce il rischio di esaurire i canali MIDI disponibili, dato che ce ne sono solo 16 per traccia.

Tuttavia, spostando `Staff_performer` nel contesto `Voice`, ogni voce in un rigo può avere il proprio canale MIDI, come è illustrato nell’esempio seguente: sebbene le voci siano sullo stesso rigo, vengono creati due canali MIDI, ciascuno con un diverso strumento MIDI (`midiInstrument`).

```
\score {
  \new Staff <<
    \new Voice \relative c''' {
      \set midiInstrument = "flute"
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" ~
      g fis ~
      fis4 g8 fis e2 ~
      e4 d8 cis d2
    }
    \new Voice \relative c'' {
      \set midiInstrument = "clarinet"
      \voiceTwo
      b1-"Clarinet"
      a2. b8 a
      g2. fis8 e
      fis2 r
    }
  >>
  \layout { }
  \midi {
    \context {
      \Staff
      \remove "Staff_performer"
    }
    \context {
      \Voice
      \consists "Staff_performer"
    }
  }
  \tempo 2 = 72
}
```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempohideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}
```

Creare dinamiche personalizzate nell'output MIDI

L'esempio seguente mostra come creare un segno di dinamica, non incluso nell'elenco predefinito, e assegnargli un valore specifico così che possa essere usato per cambiare l'output MIDI.

Al segno di dinamica \rfz viene assegnato il valore 0.9.

```
#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
      0.9
      (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = "cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}
}
```

Modificare l'equalizzazione predefinita degli strumenti MIDI

L'equalizzatore predefinito degli strumenti MIDI può essere modificato impostando la proprietà `instrumentEqualizer` nel contesto `Score` come una procedura `Scheme` definita dall'utente che usi il nome dello strumento MIDI come argomento insieme a una coppia di frazioni indicanti i volumi minimi e massimi da applicare a quello specifico strumento.

L'esempio seguente imposta i volumi massimo e minimo per il flauto e per il clarinetto.

```
#(define my-instrument-equalizer-alist '())
```

```
#(set! my-instrument-equalizer-alist
```

```

(append
  '(
    ("flute" . (0.7 . 0.9))
    ("clarinet" . (0.3 . 0.6)))
  my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
      (cdr entry))))

\score {
  <<
    \new Staff {
      \key g \major
      \time 2/2
      \set Score.instrumentEqualizer = #my-instrument-equalizer
      \set Staff.midiInstrument = "flute"
      \new Voice \relative {
        r2 g' \mp g fis~
        4 g8 fis e2~
        4 d8 cis d2
      }
    }
    \new Staff {
      \key g \major
      \set Staff.midiInstrument = "clarinet"
      \new Voice \relative {

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
chant = \relative c' {

```

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line).
- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines.
- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody side of the accordion are placed in three columns and about 12 rows.

In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys. Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command `displayLilyMusic`.
2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.
3. For each pull- or push-part translate the piano notes to the according tabulature representation.

```
verse = \lyricmode { Wie gross bist du! Wie gross bist du! }
```

```
harmonies = \new ChordNames \chordmode {
  \germanChords
  \set chordChanges = ##t
  bes8 bes8 bes8
  es2 f
  bes1
}
```

```
NoStem = { \hide Stem }
```

```
NoNoteHead = \hide NoteHead
```

```
ZeroBeam = \override Beam.positions = #'(0 . 0)
```

```
staffTabLine = \new Staff \with {
  \remove "Time_signature_engraver"
  \remove "Clef_engraver"
} {
  \override Staff.StaffSymbol.line-positions = #'(0)
  % Shows one horizontal line. The vertical line
  % (simulating a bar-line) is simulated with a gridline
  \set Staff.midiInstrument = #"choir aahs"
  \key c \major
  \relative c''
  {
    % disable the following line to see the noteheads while writing the song
    \NoNoteHead
    \override NoteHead.no-ledgers = ##t

    % The beam between 8th-notes is used to draw the push-line
    %How to fast write the push-lines:
    % 1. write repeatedly 'c c c c c c c c |' for the whole length of the song
    % 2. uncomment the line \NoNoteHead
    % 3. compile
    % 4. Mark the positions on which push/pull changes.
    %     In the score-picture click on the position
    %         the push- or pull-part starts
    %         (on the noteHead, the cursor will change to a hand-icon).
    %     The cursor in the source code will jump just at this position.
```

```

% a) If a push-part starts there, replace the 'c' by an 'e['
% b) If a pull-part starts there, replace the 'c' by an 's'
% 5. Switch into 'overwrite-mode' by pressing the 'ins' key.
% 6. For the pull-parts overwrite the 'c' with 's'
% 7. For every push-part replace the last 'c' with 'e]'
% 8. Switch into 'insert-mode' again
% 9. At last it should look like e.g.
% (s s e[ c | c c c c c c c c | c c c c c c e] s s)
% 10. re-enable the line \NoNoteHead
\autoBeamOff
\ZeroBeam
s8 s s e[ c c c c c c e] | s s s s s
}
}

      \harmonies
    }
    \new Staff \melody
  >>
  \layout{ }
  \midi { }
}
```

Modello di rigo singolo con note e testo

Questo piccolo modello presenta una semplice linea melodica con un testo. Copialo e incollalo, aggiungi le note e le parole. Questo esempio disabilita la disposizione automatica delle travature, come è consuetudine per le parti vocali. Per usare la disposizione automatica delle travature, cambia o commenta la relativa linea di codice.

```
melody = \relative c' {
  \clef treble
  \key c \major
```

```

\time 4/4

a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
    \new Voice = "one" {
      \autoBeamOff
      \melody
    }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}

```

Modello di rigo singolo con solo note

Questo modello molto semplice mette a disposizione un rigo con delle note ed è quindi adatto per uno strumento non accompagnato o per un frammento melodico. Copialo e incollalo in un file, aggiungi le note e hai finito!

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

```

```

\score {
  \new Staff \melody
  \layout { }
  \midi { }
}

```

Modello per quartetto d'archi (semplice)

Questo modello presenta un semplice quartetto d'archi. Impiega anche una sezione `\global` per definire il tempo e l'armatura di chiave.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c' {
  g2 f
  e1
  \bar "|."
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|."
}

cello = \new Voice \relative c' {
  \clef bass
  c2 b
  a1
  \bar "|."
}

\score {
  \new StaffGroup <<
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \violinOne >>
    \new Staff \with { instrumentName = "Violin 2" }
    << \global \violinTwo >>
    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}
```

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d'archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità `\tag` per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all'inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

```
% piece.ly
% (This is the global definitions file)

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

```

\paper {
  top-system-spacing.basic-distance = 10

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

Modello per gruppo vocale con strofa e ritornello

Questo modello crea una partitura che inizia con una sezione solistica e prosegue in un ritornello a due voci. Illustra anche l'uso delle pause spaziatrici all'interno della variabile `\global` per definire i cambi di tempo (e altri elementi comuni a tutte le parti) nel corso di tutta la partitura.

```
\header { tagline = ##f }
```

```
global = {
  \key g \major
```

```
  % verse
  \time 3/4
  s2.*2
  \break
```

```
